11	Work Undertaken that Best Illustrates Capabilities to Handle the Tasks Assigned:				
	Name of assignments or projects:		BI Developer – Ministry of Canada Dashboard Development		
	Year:		2025		
	Location:		Bangalore		
	Client:		HSO (Canada Healthcare client)		
	Main project features:		Designed and developed end-to-end analytical dashboards for the Ministry of Canada using Microsoft Fabric and Power BI, delivering scalable, high-performance business intelligence solutions.		
	Positions held:		Power BI Developer		

		• Developed Microsoft Fabric views and stored procedures to support efficient data transformation and processing. • Designed and implemented a Fabric DirectLake semantic model integrated with Power BI for real-time reporting and analytics. • Implemented both Dynamic and Static Row-Level Security (RLS) to ensure secure, role-based access to business data. • Optimized semantic model performance using Tabular Editor, improving report responsiveness and query execution. • Integrated Power Apps with Power BI to enable secure data access and streamline business workflows. • Gathered business requirements and prepared comprehensive Business Requirements Documents (BRD) and technical documentation. • Collaborated with business stakeholders to design and deliver scalable, user-centric dashboards aligned with organizational objectives.
	Activities performed:	
	Name of assignments or projects:	BI Developer
	Year:	2024
	Location:	Bangalore
	Client:	RBC (Canada Banking client)
	Main project features:	Development of interactive Tableau dashboards integrated with PostgreSQL, featuring KPI tracking, drill-down analysis, dynamic filtering, and performance-optimized reporting to support business decision-making.
	Positions held:	Tableau BI Developer for a banking sector
	Activities performed:	• Developed interactive and visually appealing dashboards in Tableau based on business requirements. • Connected Tableau to PostgreSQL databases and designed efficient data models for reporting. • Created calculated fields, parameters, sets, filters, and Level of Detail (LOD) expressions to support advanced analytics. • Optimized dashboard performance through query tuning, data extracts, and visualization best practices.

		- Designed 35 KPI scorecards, trend analysis, and drill-down reports to provide actionable business insights. - Collaborated with business stakeholders to gather requirements, validate report outputs, and incorporate feedback. - Performed data validation and reconciliation to ensure report accuracy and consistency. - Published and maintained Tableau workbooks on Tableau Server/Cloud, managing user access and permissions. - Prepared technical documentation and provided end-user support for dashboards and reports
	Name of assignments or projects:	Enterprise Data Modeling and Data Validation
	Year:	2023
	Location:	Bangalore
	Client:	ABN (Netherlands Banking client)
	Main project features:	Designed and maintained enterprise data models and source-to-target mappings to support scalable data integration, governance, and reporting. Validated and analyzed data using Databricks and SQL, ensuring data quality, lineage, and alignment with Power BI semantic models for reliable business intelligence and analytics.
	Positions held:	Data Modeler / BI Consultant
	Activities performed:	- Designed and maintained Source-to-Target Mappings (STTM), Business Data Models (BDM), and Logical Data Models (LDM) using erwin Data Modeler. - Translated business requirements into scalable and standardized enterprise data models. - Leveraged Databricks and SQL to validate source and target tables, ensuring data accuracy and consistency. - Performed column-level data profiling, mapping validation, and reconciliation to maintain high data quality. - Analyzed and documented data lineage to ensure traceability, governance, and compliance across data pipelines. - Collaborated with business and technical stakeholders to refine data models and mapping specifications. - Aligned enterprise data models with Power BI semantic models to support accurate reporting and advanced analytics.

		Prepared and maintained technical documentation, including data dictionaries, mapping documents, and model specifications.
