Profile

.NET Developer with 5 years 8 months of experience building scalable, cloud-native applications using Microsoft technologies. Skilled in ASP.NET Core, Web API Core, Entity Framework Core, SQL Server, and Azure services. Strong expertise in Angular UI components for modern, user-centric interfaces. Proven track record in delivering enterprise solutions across eCommerce, compliance, and insurance domains.

Skills & Abilities

- **Backend:** ASP.NET Core MVC, Web API Core, Entity Framework Core, SQL Server
- **Frontend:** Angular (UI components, dashboards)
- **Cloud:** Azure Functions, Blob Storage, Service Bus, Web App Services
- **Architecture:** Microservices, Monolithic
- **Tools:** Git, CI/CD pipelines

Experience

Consultant | Capgemini | Nov 2024 – Present Project: Koozie Group (B2B eCommerce platform)

- "Made in USA" Watermark: Implemented a dynamic watermark feature to highlight products manufactured in the USA, improving product transparency and brand trust.
- Content Access Control: Developed a feature to restrict internal content visibility on the Topic Index for non logged-in users, enhancing content security and user segmentation.
- Custom Product Filters: Created specialized filters such as "Tariff-Free in USA" to support compliance and simplify product discovery for U.S. customers.
- Geo-Specific Product Visibility: Engineered logic to prevent Canada-only products from displaying on the U.S. storefront, ensuring accurate regional product targeting.

Associate | PwC | Jan 2023 – Nov 2024 Project: Global Independence Assessment Application (Compliance tool)

- Enhanced stored procedures to meet evolving compliance requirements.
- Resolved bugs and optimized performance, improving system stability.
- Developed Angular UI components to modernize user experience.
- Leveraged Azure Functions for scalable, event-driven backend logic.

Software Engineer | LTIMindtree | Sep 2020 – Dec 2022 Project: Navigators (Insurance policy lifecycle management)

- Implemented RESTful APIs to streamline policy creation and management.
- Debugged and fixed application issues, improving reliability.

- Wrote SQL scripts for synchronizing user access across applications.
- Actively contributed to sprint planning and code reviews.
