Senior PostgreSQL DBA | High Availability | Performance Tuning | Upgradation | Migration | DR

Senior Database Administrator with 16+ years of overall professional experience, including 4.6+ years of hands-on expertise in PostgreSQL administration across large-scale government and enterprise environments. Proven experience in database architecture, high availability, replication, performance tuning, backup and disaster recovery, cloud/on-prem migrations, and production support. Strong experience in leading critical incidents, stakeholder communication, SOP creation, and mentoring junior teams.

Recognized as Star Performer of the Year (2023) for delivering high-impact database solutions, production stability, and operational excellence.

Core Competencies

- PostgreSQL Administration (Installation, Configuration, Upgrades)
- PostgreSQL High Availability: Patroni, Replication, Failover Planning
- Performance Tuning: Query optimization, VACUUM, REINDEX, ANALYZE, Memory tuning
- Backup & Recovery: Logical / Physical backups, Barman, pgBackRest, PITR
- Replication: Streaming Replication, Logical Replication, troubleshooting
- Database Migrations: On-prem to Cloud / Cloud to On-prem.
- Security: User management, Roles, Access controls, pg_hba.conf
- Table Partitioning and Database Optimization
- Linux Administration and Cron Automation
- MySQL Administration
- Backup Tools: Commvault, Veeam
- Cloud Exposure: AWS, Azure, VMware, Hyper-V
- Client Management and Incident Handling
- SOP / Documentation / Team Mentoring

Professional Experience

PostgreSQL DBA | Epic Minds | Mar 2026 – Present

Project: Karnataka Government Database Environment

- Managing production PostgreSQL databases for mission-critical government applications.
- Closely working with the departmental expert team on designing, reviewing, and supporting Patroni-based high availability architecture and failover readiness.
- Supporting HA setup validation, node health review, replication monitoring, and failover preparedness for production resilience.

- Performing database security hardening, user and role management, and access controls.
- Leading production backup automation, restore validation, and recovery readiness activities.
- Managing production-to-staging refreshes and cloud migration activities based on client requirements.
- Performing memory tuning, query optimization, partitioning, and routine maintenance for improved performance.
- Supporting PostgreSQL FDW / DB link integrations across environments.
- Coordinating deployment support, production changes, and client reporting.
- Contributing to environment planning for enterprise PostgreSQL / EDB deployments.
- Postgres server version upgrades.

PostgreSQL DBA | ESDS Software Solutions Ltd | Dec 2021 – Feb 2026

- Administered PostgreSQL production environments for multiple enterprise and government clients.
- Managed installation, configuration, upgrades, backup, restore, and replication setup.
- Performed performance tuning for high-load transactional systems.
- Implemented routine maintenance activities including VACUUM, REINDEX, ANALYZE, and bloat reduction.
- Managed cloud migrations, server refresh, and DR drills.
- Troubleshoot critical production issues including database slowness, locks, IO bottlenecks, authentication issues, and recovery incidents.
- Automated backup and maintenance tasks using Linux cron.
- Prepared SOPs and operational runbooks.
- Mentored junior DBAs and coordinated with clients during escalations.
- Awarded Star Performer of the Year (2023).

Backup Administrator / DBA Support | ESDS / Prior Roles

- Managed Commvault and Veeam enterprise backup environments.
- Handled DB backup scheduling, restore requests, VM backups, reporting, and OEM coordination.
- Supported database operations and infrastructure reliability.

Key Projects and Highlights

- Supported PostgreSQL environments for Maharashtra and Karnataka government departments.
- Worked on production HA / replication readiness and failover support using Patroni ecosystem.
- Led database migrations across on-premises and cloud platforms.
- Improved database performance and operational stability through tuning and maintenance.
- Supported major production restores and DR readiness exercises.
- Contributed to recovery efforts during critical database incidents, including large-volume environments.

Technical Skills

Databases: PostgreSQL, MySQL, Couchbase

HA / DR: Patroni, Streaming Replication, Failover Support, Backup / Restore

Third party Backup Tools: Commvault, Veeam

Platforms: Linux, Windows

Cloud / Virtualization: AWS Basics, Azure, VMware, Hyper-V

Automation: Shell scripting, Cron jobs

Certifications

- Couchbase CD100 Certified (Aug 2025)
- Oracle Cloud Data Management Foundations Associate
- Veeam Sales Professional (VSP)
- Veeam Technical Sales Professional (VTSP)

Education

M.Tech (Computer Science & Engineering) – MIT, RGPV Bhopal, 2017

B.E. (Information Technology) – Pune University, 2008

Diploma in Computer Engineering – MSBTE, 2003

Additional Strengths

- Strong client communication and stakeholder management
- Production incident ownership and RCA support
- Team mentoring and knowledge transfer
- Documentation, compliance, and operational governance

Best regards,

Shrikant N. Bamne
