

Madhan Mohan.S

+91 9500791916

madhanlead15@gmail.com

CAREER OBJECTIVE: -

To prove myself as Database Administrator in a progressive managed organization that gives me scope to apply my knowledge and skills. I would like to be with team, which dynamically works towards success and growth of the organization and achieve the set goals.

PROFESSIONAL EXPERIENCE: -

- Worked as a **Senior Database Administrator with Rakuten Trade,Malaysia.** Nov 2025 – June 2026
- Worked as a Technical lead with Wipro Limited. May 2024 – OCT 2025

OTHER WORK EXPERIENCE AND CERTIFICATION: -

- Worked as a Technical Lead with, HCL Technologies Bangalore from Jan 2022 - Aug 2024.
- Worked as Senior Consultant in Affluent Global Services Aug 2021 - Dec 2021.
- Worked as Senior Consultant in Future Focus Infotech Pvt Ltd from Nov 2020 - July 2021.
- Worked as a Lead Database Administrator in Lucida Technologies Pvt Ltd from July 2019-Oct 2020
- Worked as a PostgreSQL Database Administrator in Appscore Solutions from June 2014–May 2019.

PROFESSIONAL SUMMARY:-

- A dynamic professional with 12+ years of experience in PostgreSQL DB on Linux/Unix and Windows Platform respectively.
- 5+ years of experience in Mongo DB Installation, configuration and upgradation MongoDB
- Community and Enterprise editions on Linux servers.
- Create and manage MongoDB databases, collections, and indexes.
- Monitor database health, performance, and resource utilization.
- Perform backup and restore using mongodump, mongorestore, and snapshot backups.
- Configure and manage Replica Sets for High Availability.
- Set up and maintain MongoDB Sharding for horizontal scaling.
- Experience in PostgreSQL Installation 9.3, 9.4, 9.5,9.6.X, 10 and 11(beta-DEV) Production support.
- Experience in PostgreSQL , MongoDB and Oracle Installation and Configuration, Database
- Backup and Recovery, SQL Tuning, User maintenance, Tablespaces management, Hot Standby and
- Replication, PITR and Up-gradation.
- Experience in Installation and creating Hot Streaming Replication (Master and Slave).
- Proficient in PostgreSQL DBA activities including configuration settings, database index creation and maintained and Query optimization.
- Experienced in Backup & Recovery using PG_DUMP and PG_DUMPALL, setting up WAL archiving,
- Point in time recovery.
- Patch Upgrade from 9.2.3 to 9.2.4 in production and Testing Environment.
- Install and Configure Backup and Recovery Tool (BART) and configure Prod and Testing Server.
- Monitor the Disk space and Database growth more than 10 Servers.
- Involving and handling in sql-tuning and Stored-Procedure –Tuning in PT of Production and Testing
- Server.
- Creating index and monitoring index using Explain Plan to make better Performance of Queries.
- Experience in VACUUM and REINDEX in Production Database for Maintenance Activities.
- Installing and working tools & clients like pg admin , pg agent pg web client , Putty and Toad.
- Basic knowledge in adding and deleting Database in a clone in Replication environment
- Configured and Database installation creating tables, schemas, roles and accessed PostgreSQL.conf files using client Request.

- Implementing and maintaining database security (create and maintain users, roles and assign privileges).
- Monitoring the production PostgreSQL alert logs for database errors. Configuration of PEM server, Pg-Admin to monitor the database server performance of query to monitor Cluster and replication.
- Migration of Oracle Database to Postgresql Database.
- Migration of AWS DMS to Postgresqs Database. Migration of Sybase Database to Postgresql Database.

Technical Competencies

Database	Postgresql 9.4,10 , NoSQL (Mongodb basic)
Operating System	Linux,RHEL,OEL-6.6,Windows 10
Tools	EDB-MTK,PG-Admin, PEM and ora2pg
Scripting	Shell Script
Server tools	Putty, Winscp. Win-rar

OTHER TECHNOLOGIES:-

-
- Install & configure development PostgreSQL 8.1.1 and 9.0 databases on RedHat Linux servers/Fedora.
- Knowledge in AWS(Schema conversion. Data-Migration-Nagios Monitoring).
- Knowledge in Oracle Database Connectivity, Installation and configuration .

PROJECT DETAILS:-

Client:	CITI BANK (NAM Region)	Infrastructure Code: Ansible ,teraform RHEL PostgreSQL 11.2
Duration :	JJune 2024 Feb 2025	Cloud platforms: AWS, Azure, Cloud
Operating System:	LINUX, OEL, RHEL	Monitoring: Grafana
RDBMS:	PostgreSQL 11.2	Automation and configuration Management: Ansible, Bash
Role & Responsibility : • • • Automated PostgreSQL deployment as a service using Ansible, reducing manual setup time by 80%. • Developed an Ansible playbook to install, configure, and manage PostgreSQL across cloud and on-premises environments. • Configured pg_hba.conf and postgresql.conf for secure authentication, performance tuning, and remote access. • Implemented user management, role-based access control (RBAC), and automated database provisioning. • Integrated PostgreSQL monitoring with Prometheus/Grafana for proactive performance tracking. • Ensured high availability by configuring replication and failover strategies. • Monitoring tools and create partition to manage data's separate. • Handling Memory configurations for database servers. • Backup and Point in time recovery in PostgreSQL. • Creating child partitions tables for every month in PostgreSQL • EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance improvements. • Monitoring the production PostgreSQL alert logs for database errors. • Check Log errors and make necessary actions to rectify them. • Creating Database Links from Testing to Production databases. • Monitoring the database for Index, partitioning Memory and I/O utilization.		

Client	Brambles (US) May
Duration	2022 – March 23
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 11.2,12,13
Role & Responsibility :	
• Oracle to Postgresql Migration using AWS-SCT. • DMS-Task Creation • Ability to understand Migration requirements and bridge the gaps • Expertise in architecture blueprints and detailed documentation. Create bill of materials, including • required Cloud Services (such as EC2, S3 etc.) and tools • Hands-on experience with EC2, ECS, ELB, EBS, S3, VPC, IAM, SQS, RDS, Lambda, Cloud Watch, Storage • Gateway, Cloud formation, Elastic Beanstalk and Autoscaling • Worked on Replication and Log shipping for Postgresql Server High Availability • Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers • and Constraints • Troubleshoot performance problems, fine-tuning of databases and index Analysis. • Monitoring tools and create partition to manage data's separate. • Handling Memory configurations for database servers. • Backup and Point in time recovery in PostgreSQL. • Creating child partitions tables for every month in PostgreSQL • EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance improvements. • Monitoring the production PostgreSQL alert logs for database errors. • Check Log errors and make necessary actions to rectify them. • Creating Database Links from Testing to Production databases. Monitoring the database for Index, partitioning Memory and I/O utilization.	

Client	Volvo UD Trucks
Duration	Jan 2022 – April 22
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 11.2
Role & Responsibility :	
• Worked on Replication and Log shipping for Postgresql Server High Availability Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers and • Constraints • Troubleshoot performance problems, fine-tuning of databases and index Analysis. • Monitoring tools and create partition to manage data's separate. • Handling Memory configurations for database servers. • Backup and Point in time recovery in PostgreSQL. • Creating child partitions tables for every month in PostgreSQL • EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance • improvements. • Monitoring the production PostgreSQL alert logs for database errors. • Check Log errors and make necessary actions to rectify them. • Prepare weekly and monthly reports on database health check and growth. • Creating Database Links from Testing to Production databases. Monitoring the database for Index, partitioning Memory and I/O utilization.	

Client	L&T Infotech Pvt Ltd
Duration	Aug 2021 – Dec 2021
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 11.2

Role & Responsibility :

-
- Up-gradation database from 10.1 to 11.2. Conversion of Stored Procedures using Schema Conversion Tool.
- Worked on Replication and Log shipping for Postgresql Server High Availability
Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers and Constraints
- Troubleshoot performance problems, fine-tuning of databases and index Analysis.
- Monitoring tools and create partition to manage data's separate.
- Handling Memory configurations for database servers.
- Backup and Point in time recovery in PostgreSQL.
Creating child partitions tables for every month in PostgreSQL EXPLAIN and EXPLAIN ANALYZE to identify and fine
- tune sql queries for performance improvements.
- Monitoring the production PostgreSQL alert logs for database errors.
- Check Log errors and make necessary actions to rectify them.
- Prepare weekly and monthly reports on database health check and growth.
- Creating Database Links from Testing to Production databases.
Monitoring the database for Index, partitioning Memory and I/O utilization.

Client	MasterCard International (US)
Duration	Nov 2020 – Mar 2021
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 11.2

Role & Responsibility :

-
- Up-gradation database from 10.1 to 11.2. Conversion of Stored Procedures using Schema Conversion Tool.
Worked on Replication and Log shipping for Postgresql Server High Availability Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers and Constraints Troubleshoot
- performance problems, fine-tuning of databases and index Analysis.
Monitoring tools and create partition to manage data's separate. Handling Memory configurations for database
- servers.
- Backup and Point in time recovery in PostgreSQL.
Creating child partitions tables for every month in PostgreSQL EXPLAIN and EXPLAIN ANALYZE to identify and
- fine tune sql queries for performance improvements.
- Monitoring the production PostgreSQL alert logs for database errors.
- Check Log errors and make necessary actions to rectify them.
- Prepare weekly and monthly reports on database health check and growth.
- Creating Database Links from Testing to Production databases.
Monitoring the database for Index, partitioning Memory and I/O utilization.

Client	Aspire Systems
Duration	Feb 2020 – Mar 2020
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 11.2
Role & Responsibility :	
• Up-gradation database from 10.1 to 11.2. • Conversion of Stored Procedures using Schema Conversion Tool. • Worked on Replication and Log shipping for Postgresql Server High Availability Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers and Constraints Troubleshoot performance problems, fine-tuning of databases and index Analysis. • Monitoring tools and create partition to manage data's separate. • Handling Memory configurations for database servers. Backup and Point in time recovery in PostgreSQL. • Creating child partitions tables for every month in PostgreSQL EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance improvements. • Monitoring the production PostgreSQL alert logs for database errors. • Check Log errors and make necessary actions to rectify them. • Prepare weekly and monthly reports on database health check and growth. • Creating Database Links from Testing to Production databases. Monitoring the database for Index, partitioning Memory and I/O utilization.	

Client	Nielsen, (Canada).
Duration	Jul 2019 – Oct 2019
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 11.2
Role & Responsibility :	
• Up-gradation of database from 10.1 to 11.2. • Migration of Oracle Database to Postgresql Database. Conversion of Schema, tables ,triggers, functions, store procedure using Ora to pg Tool. • Worked on Replication and Log shipping for Postgresql Server High Availability Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers and Constraints. • Troubleshoot performance problems, fine-tuning of databases and index Analysis. Monitoring tools and create partition to manage data's separate. • Handling Memory configurations for database servers. Backup and Point in time recovery in PostgreSQL. • Creating child partitions tables for every month in PostgreSQL EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance improvements. • Monitoring the production PostgreSQL alert logs for database errors. • Check Log errors and make necessary actions to rectify them • Prepare weekly and monthly reports on database health check and growth. • Creating Database Links from Testing to Production databases. Monitoring the database for Index, partitioning Memory and I/O utilization.	

Client	Veterans Health Administration., SC(USA).
Duration	Feb 2017 – May2019
Operating System	LINUX, OEL, RHEL
RDBMS	PostgreSQL 9.6, 10
Role & Responsibility :	
- Proficiency and expertise in Postgresql Replication, Backup/Recovery, Disaster recovery planning and Security Management. - Up-gradation of database from 9.1 to 9.2 and 9.3 to 9.4. Install & configure development PostgreSQL 8.1.1 and 9.0 databases on Red-Hat Linux servers/Fedora. - Worked on Replication and Log shipping for Postgresql Server High Availability Coding of new tables, views and modifications as well as SQL Stored Procedures, Data Types, Triggers and Constraints - Troubleshoot performance problems, fine-tuning of databases and index Analysis. - Monitoring tools and create partition to manage data's separate. - Knowledge in Application Performance Tuning and Database Design(ERVIN). - Handling Memory configurations for database servers. - Backup and Point in time recovery in PostgreSQL. - Creating child partitions tables for every month in PostgreSQL - EXPLAIN and EXPLAIN ANALYZE to identify and fine tune sql queries for performance improvements. - Monitoring the production PostgreSQL alert logs for database errors. - Check Log errors and make necessary actions to rectify them. - Prepare weekly and monthly reports on database health check and growth. - Creating Database Links from Testing to Production databases. Monitoring the database for Index, partitioning Memory and I/O utilization.	

Client	Kennerley & Co Tax & Business.(NZ) Nov
Duration	2014 – Dec 2016 LINUX, OEL, RHEL.
Operating System	FEDORA and WINDOWS
RDBMS	PostgreSQL 9.6, 10
Role & Responsibility :	
- Experience in XDB Replication from oracle to Mysql to PostgreSQL. - Installation and Configuration of multiple PostgreSQL servers using source code or using third party tools. - Configuration of pg-badger tool to analyze the log-file and generate the html report. - Configuration of rep-manager tool to automate the DR configuration. - Perform the switchover/switch back using the rep-manager tool. - Taking physical backup using the pg_basebackup tool. - Extensively worked on Active-Active and Active-Passive Clustering. - Cross-Platform Migration from windows to linux and sun-os to Mac. - Install and Configure Backup and Recovery Tool (BART) and configure Prod and Testing Server. - Experience in VACUUM and REINDEX in Production Database for Maintenance Activities. - Exposure in Backup and Recovery Methods in Postgresql Server using Tools and Scripts. - Configure and Manage Pg-pool to Load-balancing and Automatic Failover in community Version's. - Monitor the Disk space and Database growth more than 10 Servers. - Creating index and monitoring index using Explain Plan to make better Performance of Queries - Exposure in EDB tool like bart,Pem,Pg-agent,pg-cleint,PPAS-10,pg_cluu,PEM-AGENT,PG-Bench.	

EDUCATIONAL SUMMARY

- B.E (CSE) in Anna university in Mookambigai college of engg- pudukkottai (MAY' 2011) in with 69%
- Higher Secondary: Government Higher Secondary School (MAR' 2007) with 77.25%.
- S.S.LC: government Higher Secondary School (MAY' 2005) with 78.99%

PERSONAL DETAILS

Date of birth	04.05.1990
Nationality	INDIAN
Marital Status	Un Married
Present Address	No 12 Nisha Avenue, 1 st Main road, sembakkam .600073
