

KEERTHANA K

Full Stack Developer | Java • Spring Boot • React.js • MySQL

Tumkur, Karnataka • +91 6364769271 • keerthanakanthraj0063@gmail.com • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with ~3 years of experience building secure, scalable web applications for Government of Karnataka projects at Centre for Smart Governance (CSG). Hands-on expertise in React.js, Java, Spring Boot, RESTful APIs, MySQL, and MVC architecture. Delivered across full SDLC with strong skills in JWT authentication, role-based access control, SQL optimization, and schema design for enterprise systems serving multiple government departments.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React.js, React Hooks, Redux, JavaScript ES6+, HTML5, CSS3, Bootstrap, Responsive UI, Cross-browser Compatibility, Axios, REST API Integration

Backend: Java, Spring Boot, Spring MVC, RESTful APIs, Microservices, Hibernate, JPA, MVC Architecture, JWT Authentication

Database: MySQL, SQL Query Optimization, Schema Design, Joins, Indexes

Tools & Practices: Git, GitHub, Postman, Maven, Eclipse, VS Code, PuTTY, Linux, Agile, Scrum, Code Review, Unit Testing

Domain: Government Tech — secure data handling, role-based access control, multi-department workflows, audit compliance

WORK EXPERIENCE

Associate Software Engineer — Centre for Smart Governance (CSG), Bengaluru

Oct 2023 – Present

- Built and maintained **3 full-stack enterprise web applications** using React.js, Java, and Spring Boot, following MVC architecture across multiple government departments.
- Designed and deployed **40+ RESTful APIs** with Spring Boot, enabling real-time data exchange between internal modules and external government services.
- Developed responsive, cross-browser compatible UIs using React.js, JavaScript ES6+, HTML5, CSS3, and Bootstrap across web portals serving multiple departments.
- Designed and optimized **MySQL schemas (30+ tables)** and complex SQL queries, reducing report generation time and improving system reliability.
- Implemented role-based access control (RBAC) and JWT-based authentication, protecting sensitive government data; collaborated in Agile/Scrum team across full SDLC.

KEY PROJECTS

Employee Management System (EMS) React.js • Spring Boot • MySQL • REST API

- Built full-stack EMS handling attendance tracking, payroll processing, resource allocation, and multi-level approval workflows for government employees across departments.
- Designed optimized MySQL schema with normalized tables and compliance modules ensuring accurate, audit-ready records; integrated automated reporting reducing manual reporting effort.

IT Equipment Management System React.js • Spring Boot • MySQL • Barcode Generation

- Developed asset-tracking platform managing **500+ equipment items** and **200+ asset requests** across departments, with purchase order processing and vendor invoice handling.
- Implemented automated barcode generation and assignment workflows, eliminating manual asset tagging errors; built real-time procurement dashboards in React.js consuming live REST APIs.

Housing Allotment & Quarter Management System React.js • Spring Boot • MySQL • Workflow Automation

- Designed government web application for housing quarter allotment, with NOC generation, applicant records, availability tracking, and multi-level approval workflows.
- Automated manual approval processes with role-based dashboards for applicants, officers, and approvers; secure document upload/download, reducing processing time and improving compliance.

CERTIFICATIONS & EDUCATION

Certifications: Advanced React and Redux — Udemy (Verified) • Master Microservices with Spring Boot & Spring Cloud — Udemy (Verified)

B.E. — Computer Science & Engineering, Sri Siddhartha Institute of Technology, Tumkur (2019 – 2023 | CGPA: 8.3 / 10)
