

B Sampurna

Fullstack Developer

+91-9347827116 | sampurnab33@gmail.com | Bengaluru, INDIA | Experience: 2 Years 7 Months

Results-driven Software Engineer with 2.7 years of experience in designing and developing scalable, high-performance web applications. Strong expertise in frontend development using Node.js, React.js, TypeScript, Redux, and modern UI frameworks. Proven experience in building reusable, responsive components, integrating REST APIs, and optimizing application performance. Skilled in collaborating with cross-functional teams in Agile/Scrum environments and owning features end-to-end from development to deployment. Actively seeking opportunities to contribute to impactful products while continuously enhancing technical and problem-solving skills.

SKILLS

- Javascript
- MongoDB
- Github
- Redux
- HTML
- Less
- Agile
- Problem Solving
- React.js
- Bootstrap
- JIRA
- Restfull API
- CSS
- RESTful API
- Responsive Web Design
- Collaboration
- Node.js
- Sass / Less
- GIT
- Postman API
- Sass
- TypeScript
- UI/UX Design
- Material UI

WORK EXPERIENCE

Fullstack Developer - ClinoGenesis Research Institute

May 2026 - Present

End-to-End LMS Development: Architected and maintained a scalable Learning Management System portal to manage students, courses, assessments, and workflows.

Frontend Engineering: Built responsive, mobile-first UI using React.js, TypeScript, Redux, and modern CSS libraries for seamless user experience.

Backend & API Architecture: Designed secure RESTful APIs handling student enrollment, auth (JWT/OAuth), notifications, and progress tracking.

Database & Performance Optimization: Managed SQL/NoSQL schemas for student records and grades, optimizing queries for low latency and high concurrency.

Integrations & Delivery: Integrated third-party APIs/gateways and collaborated in Agile/Scrum environments from feature design to production deployment.

Software Engineer - My teknoland Software Pvt Ltd

Oct 2025 - Apr 2026

- Engineered scalable, high-performance frontend applications using React.js, TypeScript, and Redux.
- Developed reusable, modular UI components to enhance user experience and accelerate development cycles.
- Implemented robust state management strategies to maintain application consistency and reliability.
- Integrated RESTful APIs to optimize data flow and enrich application capabilities.
- Enhanced rendering efficiency, achieving significant gains in application speed and user engagement.
- Led feature development from initial concept through deployment, collaborating closely with cross-functional Agile teams.
- Delivered production-ready, maintainable solutions adhering strictly to best practices and coding standards.

Software Engineer - UNIFIED POINT TECH Pvt. Ltd.

Dec 2023 - Sep 2025

- Developed mobile-first, responsive web applications using React.js, JavaScript, HTML5, and CSS3.
- Built reusable UI components and efficiently managed application state using Redux and Redux Thunk.
- Integrated RESTful APIs with structured error handling, improving data consistency and UI reliability.
- Enhanced application performance and responsiveness through rendering optimization and code refactoring.

— Actively participated in Agile ceremonies, code reviews, and production deployments.

Projects

PROJECTS

Jewellery POS & Inventory System6 Months

- Architected and developed a comprehensive Jewellery Point of Sale (POS) system for retail operations, enhancing sales and inventory management.
- Engineered modular and reusable UI components using React.js and TypeScript, ensuring a consistent and responsive user experience across various devices.
- Implemented centralized state management with Redux, optimizing cart workflows and enhancing pricing calculations for real-time updates.
- Integrated RESTful APIs for diverse functionalities, including product catalog, customer data management, and order processing.
- Improved application stability through structured validation and error handling, leading to optimized rendering and enhanced performance.
- Utilized technologies such as Material UI, HTML5, CSS3, JavaScript, React.js, Node.js and Git to deliver a robust solution.

Fidium20 Months

- Developed high-performance service ordering interfaces for Fidium, ensuring real-time serviceability checks and plan customization.
- Implemented secure authentication workflows, incorporating SMS-based two-factor authentication and robust validation logic.
- Built responsive scheduling and checkout flows featuring dynamic form validation to enhance the user journey.
- Improved user experience through accessibility enhancements, UI optimization, and thorough edge-case handling.
- Utilized a tech stack that included React, TypeScript, Redux, Material UI, HTML5, CSS3, JavaScript, React js, Node.js, REST APIs, Git, and Azure to deliver innovative solutions.

Learning Management System (LMS)4 Months

- Architected and developed an end-to-end Learning Management System (LMS) portal for managing students, course enrollments, assessments, and progress tracking.
- Built responsive, intuitive user interfaces using React.js, TypeScript, and Material UI to deliver a seamless experience across desktop and mobile devices.
- Engineered secure RESTful APIs using Node.js/Express for user authentication (JWT/OAuth), student profiles, and real-time notifications.
- Designed and optimized database schemas to efficiently query student records, grades, and system activity with low latency.
- Integrated state management via Redux and implemented third-party API integrations for content delivery and payments.

EDUCATION

2024

B.Tech/B.E. - Bachelor of Technology / Engineering | Computer Science and Engineering (CSE)

Sree Vidyanikethan Engineering College, Tirupati

Marks - 82%

ADDITIONAL INFORMATION

Languages: English, Telugu, Kannada, Hindi
