

ROHIT LAVETI

Entry-Level Full Stack Developer

masterrohit94391@gmail.com | +91 9668443829 | [Github](#) | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Software Engineer with strong foundations in Java Full Stack and MERN Stack development, experienced in building scalable, end-to-end web applications through full-time and internship experience. Proficient in object-oriented programming, data structures, algorithms, REST APIs, and SQL/NoSQL databases, with hands-on exposure to SDLC, Agile methodologies, debugging, testing, and code reviews. A quick learner with strong problem-solving skills and a collaborative mindset.

EXPERIENCE

Full Stack Developer

August 2025 – August 2026

DevSkillZ private Limited, Remote, India

- Developed and delivered **multiple full-stack applications** including an **EdTech learning platform**, **Student Management System**, and **Admin/Employee portals** using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- Engineered **role-based authentication (RBAC)** and secure login systems, building customized dashboards for **100+ daily active users** across different user roles
- Designed and implemented **scalable RESTful APIs** for core modules including user management, course workflows, and administrative operations, while managing and optimizing **500+ user records**, improving data retrieval efficiency and reducing API response times by **20–30%**.
- Integrated **Razorpay payment gateway** for secure transactions within the learning platform, achieving **~99% uptime** during testing
- Built responsive and dynamic **frontend interfaces using React.js** while enhancing overall system performance through **optimized database queries, modular architecture, and efficient state management**, ensuring a consistent and high-performance user experience across web and mobile devices.
- Collaborated in an **Agile environment**, contributing to end-to-end development, testing, and deployment of multiple features across projects.

Java Full Stack Intern

March 2024 – August 2024

Digital Lync, Hyderabad, India

Learning Management System (LMS) Portal:

- Developed and enhanced web application features, improving system performance, scalability, and user experience for **200+ users**.
- Followed **SDLC practices and coding standards**, using Git for version control, contributing to **maintainable and high-quality code across 10+ modules**
- Participated in **code reviews, debugging, and defect resolution**, reducing reported issues by **20–25%** and improving release stability.
- Optimized application performance by identifying and resolving bottlenecks, improving page load time by **15–20%**.

Human Resource Management System (HRMS):

- Designed and developed a **microservices-oriented HRMS application** using **Spring Boot, React.js, and MySQL**, supporting **employee data management for 100+ records**.
- Built and integrated **RESTful APIs and frontend components**, enabling seamless communication between services and improving system responsiveness.
- Implemented **CRUD operations and database management**, ensuring efficient data handling and reducing query execution time by **15%**.
- Supported **unit and functional testing, debugging, and QA processes**, contributing to a **25% reduction in defects** and improved application reliability.

SKILLS

Programming Languages: Java, JavaScript (Node.js), TypeScript, Python, C/C++

Core Concepts: Data Structures, Algorithms, OOP, DBMS, OS

Web Development: React.js, Node.js, Express.js, Spring Boot, REST APIs, Django, FastAPI, Pandas, Chart.js, HTML, CSS

Databases: MySQL, MongoDB, SQLite

Cloud & DevOps: AWS (basic), CI/CD (basic), Build Tools (Maven, Gradle – basic exposure)

Tools & Practices: Git, VS Code, Eclipse, Agile, SDLC, Debugging, Unit Testing

Other: API Integration, System Design Basics, Performance Optimization

Soft Skills: Problem Solving, Communication, Team Collaboration

PROJECTS

Stock Data Intelligence Dashboard | Python, FastAPI, SQLite, Pandas, Chart.js

- Built a full-stack financial data platform fetching 1 year of real NSE stock data for 14 companies using the Yahoo Finance API and Pandas, storing 3,486 rows of OHLCV data in SQLite via SQLAlchemy ORM.
- Designed and exposed 5 REST API endpoints using FastAPI with auto-generated Swagger documentation, covering company listing, OHLCV data, 52-week summary, and stock comparison.
- Computed financial metrics including daily return, 7-day moving average, 52-week high/low, and a custom annualised volatility score ($30\text{-day std} \times \sqrt{252}$) using Pandas and NumPy.
- Built an interactive dark-themed dashboard with Chart.js featuring real-time stock charts, top gainers/losers panel, two-stock correlation comparison, and date range filters (30D / 90D / 180D).

Event Ticket Booking Application | MERN Stack

- Developed a full-stack **event ticket booking application** using the MERN stack, enabling users to browse events, select seats, and book tickets seamlessly.
- Implemented **real-time seat selection and temporary reservation logic**, preventing double booking and ensuring a smooth user experience.
- Integrated secure **payment workflow** and booking confirmation system, allowing users to reserve and confirm tickets efficiently.

EDUCATION

B.E. || Computer Science

Rungta College of Engineering & Technology — 8.0 CGPA

12th || APBIE || PCM

Sri Chaitanya Junior College — 84%

10th || CBSE

Centurion Public School — 9.2 CGPA

CERTIFICATIONS

- Java Full Stack Internship Certification | Digital Lync | 2024
- Java Full Stack Training Certification | Digital Lync | 2024
