CORE SKILLS

Troubleshooting | Threat Management
| Cyber Security | Technical
Troubleshooting | Risk Assessment |
Problem Diagnosis | Exception
Management | Hardware
Configurations | Vulnerability
Assessment | Software Installs |

Expertise

- VAPT Governance
- Bug Bounty Program
- Vulnerability Assessment
- Web Application Penetration Testing
- Android Penetration Testing
- iOS Penetration Testing
- API Penetration Testing
- Network Penetration Testing
- Application Security
- OWASP
- IOT Penetration Testing
- Server Hardening
- OSINT
- UAR 2021 to June 2024

TOOLS

- NESSUS
- NMAP
- BURPSUITE
- WIRESHARK
- SQLmap
- Kali (OS)
- MobSF
- Apk Tool
- Dek2jar
- Jd-Gui
- Hopper
- PostMan
- SoupUI
- Spiderfoot
- Acunetix

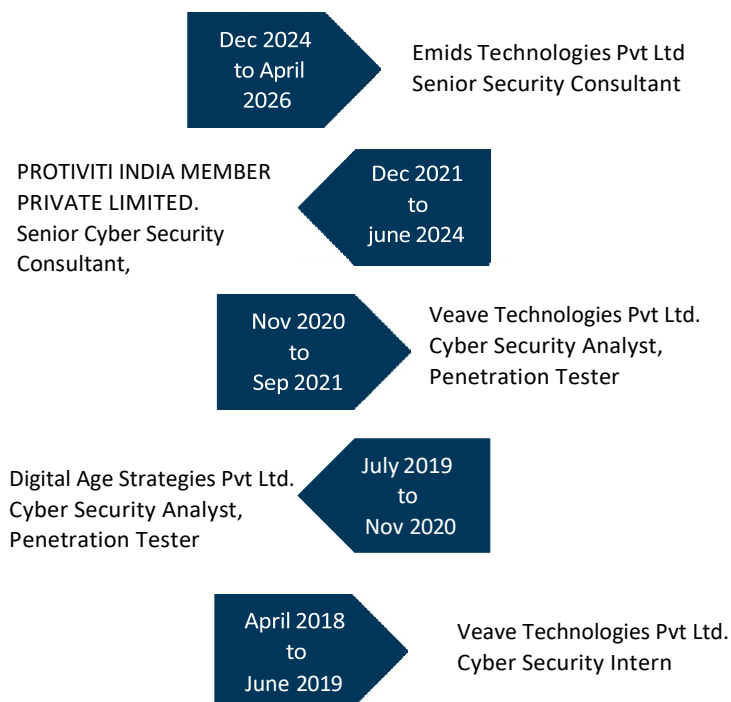

AI TOOLS

- Xbow AI
- Burp Suite With Burp AI
- Kali GPT
- Ethical Hacker GPT
- ChatGPT

PROFESSIONAL SUMMARY

To be Dedicated and detail-oriented Cyber security professional with 8 years of experience in the Vulnerability Assessment and Penetration Testing (VAPT) domain. Currently employed as a Senior Security Consultant at EMIDS TECHNOLOGIES PVT LTD, specializing in VAPT Governance, Bug Bounty Program, Network VAPT, Web Applications, Android, iOS, API, Secure Configuration Review, Phishing Campaigns, Cloud Security and source code review. Seeking opportunities to leverage my expertise and contribute to the cyber security field while continuing to learn and grow.

CAREER TIMELINE

CLIENTS RELATIONSHIP

Performed Vulnerability Assessment and Penetration Testing for Server, Router, Switches, Web Application, Mobile applications for the following domain:

- Government Administration.
- Banking Financial Services and Insurance (BFSI).
- Defense, Power Distribution, Hospitality
- Telecom, Infrastructure, Information Technology, Education
- Private Sector Labs, Manufacturing, Travel & Transport

ACADEMICS

- Bachelor of Engineering (VTU Belagavi)
- Diploma (DTE Bengaluru)

CERTIFICATION

- CEH (Certified Ethical Hacker)
Certificate no: ECC6237109458
- ISO 27001:2013 ISMS LEAD AUDITOR
- CompTIA A+
- AWS Security, Identity, and Compliance - Amazon Web Services.
- Web Application Penetration Testing and Ethical Hacking – Cybrary.
- Mobile App Security – Cybrary.
- Cybersecurity Essentials by CISCO
- Cloud Computing by EC Council. Cert No : 3683264268714
- CYBER HYGIENE PRACTICES by Ministry of Information technology. Cert no : Meit/ISEA/WCHP/021889

WORK EXPERIENCE

EMIDS TECHNOLOGIES PRIVATE LIMITED.

Dec 2024 – April 2026

Senior Security Consultant

- Conducted comprehensive Vulnerability Assessment and Penetration Testing (VAPT) for a cloud-based claims review platform, replacing multiple legacy systems with a centralized solution.
- Performed web and mobile application security testing, identifying critical vulnerabilities across platforms using tools like Burp Suite, OWASP ZAP, Nessus, Kali Linux, and mobile-specific tools/environments.
- Ensured alignment with OWASP Top 10 (Web and Mobile) by detecting and mitigating security flaws such as insecure data storage, improper platform usage, and insufficient transport layer protection.
- Executed Black Box and Grey Box testing methodologies to simulate attacker behavior and assess system defenses in real-world scenarios.
- Analyzed outputs from automated tools, manually verified vulnerabilities, and filtered out false positives for accurate and high-quality reporting.
- Prepared and presented detailed security assessment reports with risk ratings, impact analysis, and actionable remediation recommendations to development teams and stakeholders.
- Collaborated with cross-functional teams to address security gaps early in the SDLC, enhancing the platform's security posture across both web and mobile interfaces.
- Supported the secure design of a modular, configurable architecture, ensuring scalability, maintainability, and compliance across jurisdictions and future programs.

PROTIVITI INDIA MEMBER PRIVATE LIMITED.

Dec 2021 – June 2024

Senior Cyber Security Consultant

- VAPT Governance: Managing the VAPT Governance. The scope of work include, Monitoring all vulnerability assessment and penetration testing activities, Co-ordinating with all the stakeholders and addressing the challenges. Following up with application owners and tracking the mitigation status and challenges.
- Bug Bounty Program: Managing the Bug Bounty Program. The scope of work include, receiving the bugs regularly from the Onedesk tool, Verifying the bugs, assigning to the respective application owners, Following up with application owners and tracking the progression status, rewards and challenges.
- Conducting Vulnerability Assessment of Servers, Workstations, Switches, Routers, Firewalls/UTM Devices, IDS & IPS, Load Balancers and other Network devices.
- Vulnerability Assessment performed using Nessus, Kali Linux tools etc.
- Conducting Manual/Automated Security Testing for Internet and Intranet Web Applications.
- Performing Mobile Application Penetration Testing.
- Understanding of web application security concepts and standards, checking for vulnerabilities in application as per OWASP guidelines.
- Analyzing tool-based report and removing false positive results.
- Generating reports based on vulnerability assessments and presenting them to clients.
- Planning, Managing and Execution of projects.
- Perform penetration testing for web applications using manual and automated tools
- Performed VAPT using Black Box testing and Grey Box testing Techniques.
- Good Knowledge on OWASP Top 10 Vulnerabilities and TCP/IP

VEAVE TECHNOLOGIES PVT LTD, BANGALURU

Nov 2020 – Sep 2021

Cyber Security Analyst | Penetration Tester

- The Application PT performed against OWASP Top 10 Vulnerabilities using Burp Suite, Drib, Directory Buster etc., as well as Manually.
- Performed reviewing Vulnerability Assessment using Nessus NMAP etc.
- Manual, verifying the results and removing the false positives from the issues reported.
- Performed Mobile Application Penetration Testing of Android and IOS.
- Performed API Testing using Postman and Burp suite tools.

- Manages multiple tasks and priorities on very tight deadlines
- Create reports from results of vulnerability testing done and distribute the results to the Client.
- Identify and analyze Web application vulnerabilities based on latest industry attacks.
- Interaction with the client for the issues to be fixed and discussion about upcoming security measures to be implemented for the Web Applications.
- Performing Infrastructure Scans for various Servers using Nessus, and Nmap.
- Conducting Manual/Automated Security Testing for Internet and Intranet Web Applications.
- Exploit Development through burp suite, Kali Linux Tools

DIGITAL AGE STRETAGIES PVT LTD, BANGALURU

July 2019 – Nov 2020

Cyber Security Analyst | Penetration Tester

- Performed Web application Penetration testing and Vulnerability Assessment of Government Administration, Power distribution, BFSI, Defense, Private sector lab clients against OAWSP Top 10 Vulnerabilities.
- Performed Black Box and gray Box Testing for Internet and intranet.
- Performed Mobile application Penetration testing for Banking and Health insurance Sector.
- Performed Vulnerability Assessment testing for Banking, Defense, Government administration and various sector clients By using Nessus, Nmap and kali Linux tools
- Manual reviewing, verifying the results and removing the false positives from the issues reported.
- Create reports from results of vulnerability testing done and distribute the results to the Client.
- Manages multiple tasks and priorities on very tight deadlines

HOBBIES

- Playing Cricket and Foot Ball
- Bug Bounty Hunting
- Playing Chess
- Travelling
