

R. GANAPATHY

Bangalore 560068 | +91 6360691603 | ganapathyr605@gmail.com | linkedin.com/in/r-ganapathy-a74a91157

PROFESSIONAL SUMMARY

Dynamic AI Consultant and Dot Net Architect / Lead - Cloud & Enterprise Solutions with 15 years of experience in designing and implementing cloud-based solutions, optimizing performance, and enhancing system interoperability. Proven track record leading projects that increased development efficiency by 15% and reduced delivery time by 20% using agile methodologies. Skilled in managing complex SDLC, Full Stack development, troubleshooting, problem solving, driving API integration, migration of legacy .Net applications into containerized Microservices, enhancements, scalable, secure technical strategy, and in mentoring teams to deliver on time. Technical Leadership, Requirements gathering, stakeholder management, budgeting, risk management.

TECHNICAL SKILLS

- **AI Tools:** Cursor, GitHub Copilot, Codex, Claude Code, Gemini, Context/Prompt Engineering, MCP, RAG, Agent
- **Cloud & DevOps:** Azure DevOps, AWS, Kubernetes, Docker, CI/CD Pipelines
- **.NET Ecosystem:** Angular, .NET Core MVC, C#, Blazor, EF Core, LINQ, WPF, VB.Net
- **Architecture & Integration:** API Design, Microservices, RESTful Services
- **Data & Tools:** SQL Server, Data Modeling, MySQL, Performance Tuning, JQuery, JavaScript, Jira
- **Domain Expertise:** Enterprise Systems, IOT / Smart Metering (GPRS, GSM, DLMS), Financial Services, Banking, Healthcare, MIS, Manufacturing, HR Systems & Costing.

PROFESSIONAL EXPERIENCE

AI Cloud Consultant | Accudia Industries, Bangalore

Dec 2023 – Mar 2025

- Leveraging AI tools to build and mentor .NET ecosystem projects using modern AI assistants, native Microsoft frameworks, and structured context strategies.
- Fine-tune Enterprise cloud solutions enhancing performance, scalability, and interoperability across distributed systems, containerized .NET Core Microservices using Docker with reusable images and environment specific configurations.
- Led the team managing Operational Technology (SCADA, DCS, PLC) for production systems, Developed and deployed applications to Kubernetes enabling auto-scaling, load balancing, and high availability.
- Managed deployments, services, and ingress configurations for reliable service exposure and traffic routing. Implemented rolling deployments with pod health monitoring for zero-downtime releases.
- Collaborated with DevOps on container orchestration and cluster performance tuning; integrated containerized workloads into Azure DevOps CI/CD pipelines for automated build, push, and deployment.

Environment: AI Tools, Azure DevOps, Kubernetes, AWS, Angular, API, Microservices, SQL, Jira

Lead Architect | Invendis Technologies India Pvt. Ltd.

Sep 2022 – Nov 2023

- Engineered development of .NET Core APIs and Microservices supporting large-scale energy monitoring and billing systems. Migrated monolithic, legacy applications to modern containerized application.
- Enforced EF Core-based data models and improved SQL Server performance for high-volume IOT and billing workloads, deployed containerized workloads via Docker and Kubernetes for system resilience and scalability.
- Established DevOps best practices and automated CI/CD pipelines to improve release frequency and production stability; Mentored Agile teams, owned architecture decisions, and ensured on-time delivery.
- Automated IOT processes, performed requirement analysis, and optimized SQL query performance across planning, architecture, and R&D of new tools and POCs.
- Designed distributed service architecture with secure API integrations and service-to-service communication.
- Handled architecture decisions, and ensured on-time delivery of complex enterprise solutions.

Environment: Azure DevOps, Kubernetes, AWS, .NET Core MVC, API, Microservices, SQL, Jira

Assistant Architect Lead | Viatrix**Oct 2019 – Sep 2022**

- Architected and Oversaw multiple financial projects: E-Reimbursement Claim System, Budget Management, E-Compensation System, and Housing Loan Interest Subsidy System.
- Drove strategic planning, technical design, and architecture through creativity, conflict resolution, and decision-making, critical problem solving, adaptability, and prioritization across teams.
- Applied single sign-on and security compliance; investigated custom nested grid views and user controls, guided team activity planning, task allocation, and incident management.
- Performed data modeling, database design, and complex SQL query optimization for stored procedures, views, and functions, delivered cloud-native solutions, R&D, POCs, migrations, and performance tuning.
- Database Optimization, Task management, identified gaps, and improved system modularity and interoperability by adopting RESTful API strategies.

Environment: *NET Core MVC, API, EF, Microservices, JQuery, LINQ, SQL Server***Senior Lead Developer | Jags Technologies Group Pvt. Ltd.****Jul 2014 – Sep 2019**

- Developed and deployed cryptocurrency exchange, banking, financial, HR, and computerized MIS systems; contributed to best practices, techniques, and tools for project planning and execution.
- Handled two projects simultaneously, delivering web applications and APIs to meet customer requirements, led projects from requirements through deployment, owning schedules, scope, and budget estimation.
- Executed TCP/IP socket connectivity for microsecond-level exchange rate retrieval, extended all modules of banking solutions, including data validation, bulk data uploads, and client deployment.
- Business analysis and tasks progress during conversion project. Design, development, and maintenance.
- Data validation, bulk data upload to DB server, sub sector data, deployment at client base & Documented.
- Presented Computerized Inventory Control & Production and Hospital Management systems, collected requirements, ran feasibility studies, and built prototypes and transaction reports.

Environment: *ASP.NET MVC, C#, JQuery, LINQ, EF, Core API, SQL Server***Senior Software Engineer | Matrix Energy Pvt. Ltd.****Nov 2010 – May 2014**

- Enlarged and deployed a Computerized Meter Reading System (GPRS, GSM, direct device) and a Computerized Transformer Management System for alarm/temperature monitoring via GPRS.
- Built a Water Pump Handling System with automatic level checks and on/off control; modernized global standard meter reading protocols for instantaneous, billing, and tamper values.
- Launched Street Lighting solutions with DLMS protocol and smart metering; provided dispersed automation for power utilities and automatic metering infrastructure.
- Developed Costing, Engine Operations, and Wind Predictor systems; gathered requirements and built API interfaces for project enhancements.
- Created Forms and views for equipment, units, attributes, and manufacturers for costing estimation.

Environment: *Classic ASP.Net, C#, JavaScript, ADO.Net, Ajax, WPF, VB.Net, SQL Server***LICENSES & CERTIFICATIONS**

- Diploma in Certified Associate in Project Management
- Advanced Diploma in Cloud Computing for AWS & Certificate of AWS Summit India 2023
- Diploma in Certified Information Systems Security Professional
- Certificate of Microsoft Azure Administrator
- Certificate of Agile Scrum Master (ASM) & Scrum Fundamentals Certified (SFC)

EDUCATIONAL QUALIFICATIONS

- Master of Science in Information Technology — Annamalai University
- Post Graduate Diploma in Computer Applications — Gobi Arts College, Bharathiar University
- Bachelor of Science in Mathematics — Sri Vasavi College, Bharathiar University
