

JAGANNATH SAHU

Azure Solution Architect | Principal Engineer | AI Solutions Architect

Enterprise Cloud Architecture | Azure OpenAI & Generative AI | Cloud Modernization | Technical & Delivery Leadership

Bengaluru, India | +91 9886331363 | sahu_jagannath@yahoo.com | linkedin.com/in/jagannath-sahu

PROFESSIONAL SUMMARY

Azure Solution Architect and Technical Leader with 17 years of IT experience designing, architecting, and delivering enterprise-scale Microsoft Azure and .NET cloud solutions. Proven track record leading complex cloud modernization programs, migrating legacy mainframe and on-premises systems to cloud-native Azure architectures. Hands-on expertise in Azure DevOps, CI/CD automation, Microservices, Azure Functions, Azure Data Factory, Azure Storage, Azure Service Bus, and Disaster Recovery design. Skilled in building AI-powered solutions using Azure OpenAI, Retrieval-Augmented Generation (RAG), Azure AI Search, and Vector Search, reducing manual support effort by approximately 80% on a recent engagement. Experienced technical leader across Government, Banking, Financial Services, Capital Markets, and IoT domains, managing Agile teams of up to 15 engineers, stakeholder relationships, and end-to-end release governance. Microsoft Certified: Azure Solutions Architect Expert (AZ-305), Azure Developer Associate (AZ-204), Azure Fundamentals (AZ-900); Certified ScrumMaster (CSM). U.S. onsite experience on an H-1B visa.

CORE COMPETENCIES

Azure Solution Architecture • Cloud Modernization & Migration • Azure OpenAI & Generative AI • Retrieval-Augmented Generation (RAG) • Azure AI Search & Vector Search • Microservices & REST APIs • Azure Functions & Durable Functions • Azure Data Factory • Azure DevOps & CI/CD • Docker • Disaster Recovery & High Availability • Technical & Delivery Leadership • Agile / Scrum Delivery • Stakeholder & Risk Management • Release Management • Requirement Gathering & Solutioning

PROFESSIONAL EXPERIENCE

UNISYS

Associate Principal Engineer — Solution Architect | Technical Lead | Technical Project Manager | Scrum Master May 2017 – Present

- Architect enterprise-scale Azure cloud solutions for mission-critical applications using Microsoft Azure, .NET, Microservices, Azure Functions, Azure Data Factory, Azure Storage, Azure Service Bus, and Azure SQL Database.
- Lead cross-functional Agile teams of 5–10 engineers, providing technical direction, mentoring, sprint planning, backlog refinement, and release governance.
- Drive architecture reviews, solution design, technology selection, and engineering best practices to deliver scalable, secure, and highly available applications.
- Design and implement Azure DevOps CI/CD pipelines, reducing deployment effort and improving release quality through automation.
- Collaborate with Product Owners, business stakeholders, and enterprise architects to define technology roadmaps aligned with business objectives.
- Lead cloud modernization initiatives, migrating legacy applications to cloud-native Azure architecture.
- Implement Disaster Recovery (DR) strategies and operational monitoring to improve platform resilience and business continuity.
- Manage production deployments, issue resolution, performance optimization, and continuous improvement initiatives.

Key Project — Job Service North Dakota (JSND), USA | Solution Architect | May 2022 – Present

- Architected the modernization of a legacy mainframe workforce-management platform into a cloud-native Microsoft Azure solution, enabling scalable processing and reliable data transmission across workforce and unemployment program systems.
- Designed enterprise integration using Azure Data Factory, Azure Functions, Azure Storage, Azure Service Bus, and Azure SQL Database.
- Established Azure DevOps CI/CD pipelines supporting automated deployments across Development, UAT, and Production environments.

- Implemented Disaster Recovery architecture for business-critical workloads, ensuring high availability and business continuity.
- Designed and implemented an AI-powered support assistant using Azure OpenAI, Retrieval-Augmented Generation (RAG), Azure AI Search, and Vector Search, reducing manual support effort by approximately 80% through AI-assisted knowledge retrieval.
- Led a cross-functional team of 6 engineers, facilitating Daily Scrum, sprint planning, backlog grooming, sprint reviews, and retrospectives to ensure effective Agile delivery.
- Acted as key point of contact for client stakeholders, negotiating scope, timelines, and deliverables, and conducting periodic project and release reviews with risk identification and mitigation.
- Developed and maintained project plans, roadmaps, and stakeholder presentations to communicate progress and strategic direction.

Key Project — Elevate™ by Unisys | Technical Lead & Scrum Master | Apr 2017 – May 2022

- Led technical delivery for Elevate™, an integrated Omni channel digital banking software suite spanning mobile, internet, branch, and contact-center channels, integrating with core banking systems.
- Led Agile Scrum delivery, facilitated daily stand-ups, and removed blockers to ensure smooth sprint execution.
- Analyzed user stories and translated business requirements into technical solutions; provided technical leadership in development, code reviews, and defect resolution.
- Managed releases, tracked progress, and communicated status to stakeholders while ensuring code quality through unit testing and adherence to standards.

TECH MAHINDRA

Project Manager

Jan 2014 – May 2017

- Led end-to-end delivery of multiple enterprise software projects across Banking and IoT domains, ensuring alignment with business objectives, timelines, and quality standards.
- Managed cross-functional teams (Development, QA, and DevOps) using Agile/Scrum methodologies to drive efficient project execution and continuous improvement.
- Collaborated with clients and stakeholders to gather requirements, define project scope, and translate business needs into technical solutions.
- Monitored project progress through KPI tracking, risk management, and mitigation strategies to ensure predictable outcomes.
- Oversaw CI/CD pipelines, release management, and process optimization initiatives to improve deployment reliability and operational efficiency.

Conext Smart Box — Schneider Electric, Canada | Solution Architect | Jul 2015 – Apr 2017

- Contributed to the architecture and development of Conext Insight, a cloud-enabled remote monitoring and asset-management platform for distributed IoT/PV plants.
- Implemented Agile (Scrum) practices, facilitating daily stand-ups, sprint ceremonies, and retrospectives to ensure efficient delivery.
- Developed and deployed application components using C#, .NET, and Azure services; performed code reviews, release coordination, and production support.

MTGO — Wizards of the Coast, Seattle, USA | Technical Project Manager | Jan 2015 – Jul 2015

- Served as Onsite Coordinator and primary liaison between the client and offshore team for Magic: The Gathering Online (MTGO), a digital adaptation of the physical card game.
- Led test automation efforts using Coded UI, managed sprint planning, status reporting, and release coordination.

MPHASIS

Senior Software Engineer

Sept 2007 – Jan 2014

- Led the design, development, and delivery of key application modules using C#, ASP.NET, .NET Framework, SQL Server, and Oracle, ensuring scalable solutions aligned with project architecture.
- Managed and mentored development teams by assigning tasks, conducting code reviews, and enforcing coding standards and best practices.
- Collaborated with architects, QA, DevOps, and UI/UX teams to deliver high-quality, well-integrated solutions.

- Owned the complete module lifecycle — development, testing, deployment, production support, and continuous improvement.

ONSITE EXPERIENCE

- USA (H-1B Visa): Wizards of the Coast, Seattle — 3-month onsite engagement as Technical Project Manager.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, AWS (working knowledge)

AI / Generative AI: Azure OpenAI, Retrieval-Augmented Generation (RAG), Azure AI Search, Vector Search, LLMs

Azure Services: Azure Functions, Durable Functions, Azure Data Factory, Azure Storage (Blob, Queue, Table), Event Hub, Azure Service Bus, Azure Key Vault, Azure SQL Database

Backend Development: C#, .NET, .NET Core, ASP.NET MVC, Web API, WCF, SQL Server, Oracle

Architecture: Microservices, REST APIs, Enterprise Architecture, Solution Design

DevOps & Tools: Azure DevOps, Git, GitHub, CI/CD, Docker, Bicep, ARM Template, TFS, Jira, Bitbucket, Postman, SoapUI

Methodologies: Agile, Scrum, Kanban, Release Management, Requirement Gathering, Stakeholder Management

CERTIFICATIONS

- AZ-305: Microsoft Certified — Designing Microsoft Azure Infrastructure Solutions
- AZ-204: Microsoft Certified — Azure Developer Associate
- AZ-900: Microsoft Certified — Azure Fundamentals
- Certified ScrumMaster (CSM), Scrum Alliance
- Generative AI Foundations Certificate — upGrad
- AI Tool Workshop — be10X

EDUCATION

Bachelor of Engineering, Computer Science & Engineering — Berhampur University
