

NARENDRA SINGH

Solution Architect | Enterprise Architect | Cloud Architect | AI/LLM | 13+ Years

New Delhi, India | +91 9811569198 | narendra.singh.tech01@gmail.com | linkedin.com/in/narendrasingh-architect

PROFESSIONAL SUMMARY

Solution Architect with 13+ years architecting, modernizing, and governing cloud-native, distributed enterprise systems across Healthcare, BFSI, Retail, SaaS, and Government. Expert in C#/.NET Core, Microservices, Event-Driven Architecture, AWS/Azure, Kubernetes, and CI/CD, with hands-on AI/LLM platform experience — RAG, MCP, and multi-agent orchestration. Proven leader in architecture governance, cloud modernization, and production readiness across SLA/RPO/RTO, security, and cost optimization.

KEY ACHIEVEMENTS

- Architected high-volume cloud platforms supporting millions of transactions per month, ensuring 99.9% availability and meeting defined SLA/SLO targets.
- Modernized legacy monolithic platforms into event-driven microservices across AWS and Azure, including mission-critical mortgage processing systems, boosting scalability and transaction throughput 2-3x while improving resilience and maintainability.
- Delivered an enterprise AI knowledge platform using VectorDB, RAG pipelines, and Gemini API — improving developer onboarding efficiency by 40%.

CORE COMPETENCIES

Solution & Enterprise Architecture (.NET/C#) | Cloud Architecture (AWS/Azure) | Microservices & Event-Driven Architecture | AI/LLM Architecture (RAG, MCP, Agents) | High Availability & DR | Cloud Governance & FinOps | IAM & Security (OAuth2, RBAC, Zero Trust, Entra ID/Azure AD, SSO, SCIM) | Enterprise AI Assistants (ChatGPT Enterprise, Claude Enterprise, Microsoft Copilot, GitHub Copilot) | AI SaaS License & Consumption Management | Responsible AI & AI Governance | DevOps & CI/CD (GitHub Actions, Azure DevOps) | Containerization (Docker, Kubernetes) | API & Integration Architecture

PROFESSIONAL EXPERIENCE

Independent Solution Architect | Artificial Wit

May 2026 – Present

- Architected Artificial Wit AI, an enterprise AI enablement platform wrapping legacy ERPs, CRMs, and internal APIs (SAP, Oracle, Salesforce, Dynamics) into a unified layer usable by any LLM via a native MCP client/server with OAuth and role-based access control.
- Designed a multi-agent orchestration engine (Sequential, Parallel, and Loop topologies) and generative UI artifacts — live dashboards and text-to-SQL analytics — for grounded, cited RAG-driven enterprise assistants.
- Worked hands-on with ChatGPT Enterprise, Claude Enterprise, Microsoft Copilot, and GitHub Copilot, evaluating each for enterprise LLM integration patterns and feeding the findings into the Artificial Wit platform design.
- Implemented SSO for the platform using Entra ID (Azure AD), with SCIM-based user provisioning layered on top of the existing OAuth and role-based access control.
- Built license and consumption tracking for AI SaaS tools into the Artificial Wit platform, monitoring per-user and per-agent usage across integrated LLM services to manage cost and license allocation.
- Extended the platform's AI governance beyond architecture and security to include Responsible AI practices: grounding, source citation, and audit logging for RAG-driven assistant outputs.

Technical Architect | ARCS Group Ltd, Delhi

Mar 2024 – Dec 2025

- Architected CI/CD pipelines using GitHub Actions and Azure DevOps with automated quality gates, reducing deployment issues by 80%.
- Architected an enterprise AI knowledge platform using Python, VectorDB, embedding workflows, Gemini API, and real-time synchronization — improving developer productivity by 40%.
- Applied Responsible AI principles — data grounding, access control, and audit logging — to the enterprise AI knowledge platform, extending its architecture and security governance into AI compliance and risk considerations.

Technical Manager | Sriggle Tech Pvt. Ltd.

Jun 2023 – Jan 2024

- Led cloud modernization initiatives, decomposing monolithic applications into event-driven microservices on AWS and Azure using .NET Core.

Senior System Analyst / Technical Architect | SitusAMC India Pvt. Ltd., Gurgaon

Aug 2017 – Feb 2023

- Modernized mission-critical mortgage processing platforms from legacy monoliths to AWS-based microservices using C#/.NET Core, improving scalability, resilience, and maintainability.

Project Lead | LiveCareer India Pvt. Ltd., NCR (Aug 2013 – Jul 2017) | Sr. Technical Consultant | Coforge (formerly NIIT Technologies), New Delhi (Oct 2007 – Jul 2013)

EDUCATION

Master of Information Technology — Annamalai University (2007) | Bachelor of Arts (Economics) — Shaheed Bhagat Singh College, Delhi (2002)

CERTIFICATIONS

TOGAF 9.2 Certified — The Open Group | AWS Solutions Architect Training — Simplilearn | Azure Cloud Architecture Training — Simplilearn
