

DHASARATHAN TAMILARASAN

Technical Lead | .NET Solution Architect | ASP.NET Core | Angular | Microservices | Azure | AI Integration

+91 7010420859 | dasatml@gmail.com | India

PROFESSIONAL SUMMARY

Technical Lead and .NET Solution Architect with 12+ years of experience designing, developing, and delivering enterprise applications using C#, ASP.NET Core, ASP.NET MVC, Web API, Angular, Microservices, SQL Server, Azure DevOps, REST APIs, and CI/CD. Hands-on experience in AI-enabled application development, including Retrieval-Augmented Generation (RAG), LLM integration, and AI-powered search. Strong background in solution architecture, secure API design, performance optimization, digital banking, identity management, enterprise integrations, technical leadership, code reviews, mentoring, and production delivery.

CORE TECHNICAL SKILLS

Languages: C#, JavaScript, HTML5, CSS3, SQL

Backend: ASP.NET Core, .NET Core, ASP.NET MVC, Web API, Entity Framework, RESTful APIs

Frontend: Angular, Micro Frontends (MFE), JavaScript, jQuery

Architecture: Solution Architecture, Microservices, Design Patterns, SOLID Principles, Enterprise Application Architecture

AI: AI Integration, Retrieval-Augmented Generation (RAG), LLM Integration, AI-powered Search

Cloud / DevOps: Azure, Azure DevOps, CI/CD, Git

Database: SQL Server, Stored Procedures, Query Optimization, Indexing

Security / Identity: OAuth 2.0, JWT, Identity & Access Management, LDAP, Active Directory, HSM

Engineering: Technical Leadership, Code Review, Mentoring, Performance Optimization, Security & Compliance, Agile/Scrum

PROFESSIONAL EXPERIENCE

Technical Lead | .NET Solution Architect | Careernet Technologies Pvt Ltd | December 2025 - August 2026

Client: Cognizant Technology Solutions (CTS)

Project: LexisNexis Protégé (Legal AI Platform)

- Designed and developed AI-powered legal research capabilities using Retrieval-Augmented Generation (RAG) architecture and LLM services.
- Engineered Angular Micro Frontend (MFE) modules integrated with ASP.NET Core microservices for modular enterprise application delivery.
- Designed and developed secure, scalable REST APIs for legal search, document retrieval, and AI-enabled workflows.
- Contributed to solution architecture decisions covering performance, scalability, security, maintainability, and service integration.
- Collaborated with global engineering teams to deliver enterprise AI features, production releases, and application enhancements.
- Worked across Angular frontend, ASP.NET Core APIs, microservices, AI/RAG integration, Git, and CI/CD workflows.

Technical Lead | .NET Solution Architect | iSolve Technologies Pvt Ltd | September 2024 - November 2025

Client: Surat and Rajkot Banking Clients

Project: iStart CAO (Customer Account Opening)

- Led architecture and implementation of digital banking and customer onboarding solutions.
- Integrated UIDAI eKYC, OVD, Finacle, Aadhaar Masking, HSM, CKYC, and related enterprise banking services.
- Designed and enhanced REST APIs and backend workflows supporting customer onboarding and banking integrations.
- Optimized API performance through query, code, and design improvements, reducing response latency by an estimated 30%.
- Orchestrated production deployments and release validation activities, maintaining stable post-release delivery.
- Mentored developers, conducted code reviews, supported technical design discussions, and established engineering standards.

Software Consultant | Deep Identity Pvt Ltd | July 2020 - August 2024

Client: ADB Bank

Project: Identity Management / Identity Governance and Administration (IGA)

- Engineered enterprise Identity Governance and Administration (IGA) solutions supporting secure access management.
- Built identity provisioning connectors for LDAP, Active Directory, SQL Server, and Microsoft Exchange/Outlook.
- Implemented identity lifecycle automation, provisioning workflows, and compliance modules.
- Developed enterprise IAM capabilities with focus on secure access, identity lifecycle management, and operational efficiency.
- Worked with enterprise integrations and client requirements to deliver secure identity management solutions.

Senior Software Engineer | Source HOV India Pvt Ltd | June 2018 - July 2020

Client: US Government-related Tax Operations

Project: Annual US Tax Modification

- Developed and maintained enterprise .NET applications supporting annual US tax law and tax calculation modifications.
- Implemented yearly tax-related business rule changes and application enhancements based on updated requirements.
- Developed and enhanced REST APIs and application modules supporting tax processing workflows.
- Optimized SQL Server queries, indexing, and database operations to improve application performance and reliability.
- Performed defect analysis, testing, production support, and release activities for tax-related changes.

Tech Associate | Flexicode Technologies | September 2016 - May 2018

Client: Fluatran India Bank

Project: Employee Expense Management System

- Developed and maintained .NET application components for an employee expense management system.
- Implemented application enhancements, debugging, testing, and defect resolution across releases.
- Collaborated with cross-functional teams to translate business requirements into stable software solutions.

Software Engineer | Desss Applying Technologies | February 2014 - August 2016

Client: US Client

Project: USAWarSupply

- Developed software modules and participated in end-to-end application delivery for client-focused business solutions.
- Performed defect analysis, code fixes, and functional enhancements to improve application reliability.
- Coordinated development and deployment activities with team members to deliver releases on schedule.

Desktop Support Engineer | Digitron Computers Pvt Ltd | April 2013 - February 2014

- Provided desktop support by troubleshooting hardware, software, operating system, and network-related issues.
- Installed, configured, and maintained desktops, peripherals, and operating systems within defined SLAs.
- Resolved user incidents and supported routine system maintenance.

EDUCATION

Bachelor of Engineering (Electronics & Communication Engineering) | Anna University | 2007 - 2011

SELECTED PROJECT

LexisNexis Protégé (Legal AI Platform)

- AI-powered legal research using RAG architecture and LLM services.
- Angular Micro Frontend (MFE) modules integrated with ASP.NET Core microservices.
- Secure REST APIs for legal search, document retrieval, and AI-enabled workflows.
- Solution architecture contributions covering scalability, security, performance, and maintainability.
