

JITENDRA N . SHUKLA

Project Lead | Technical Project Lead

✉ Shukla_jit@yahoo.co.in ☎ +91-9870765857

Summary

- Strong leadership, analytical, decision-making, team mentoring, client management, and delivery-focused skills.
 - Experienced in Agile/Scrum delivery, 15-Day Sprint Planning, Jira/Confluence, requirements management, risk and issue resolution, UAT, release planning, and stakeholder management.
 - Experience integrating AI capabilities into enterprise applications using Azure AI Services, Azure OpenAI, RAG, LangChain, Ollama, ChromaDB, and Vector Databases.
 - Strong experience designing scalable solutions using N-Tier Architecture, Microservices, RESTful APIs, Design Patterns, and cloud-based solutions.
 - 6+ years of experience developing modern web applications using Angular, TypeScript, Node.js, Express.js, HTML5, and CSS3.
 - Strong hands-on expertise in C#, ASP.NET, ASP.NET MVC, .NET Core, .NET 10, Entity Framework, Azure, REST APIs, SQL Server, Oracle, PostgreSQL, and Snowflake.
 - Proven experience leading cross-functional development teams, managing end-to-end project delivery, sprint planning, release management, production support, stakeholder coordination, and client communication.
 - 16+ years of experience in software architecture, enterprise application development, technical leadership, project delivery, and solution implementation across Procurement, Maritime, Cyber Security, Banking, E-commerce, VAS, and Gaming domains.
 - Requirement Analysis | Solution Design | Risk & Issue Management | Production Support | Quality & Delivery Governance
 - Team Leadership & Mentoring | Stakeholder Management | Client Coordination | UAT Support
 - End-to-End Project Management | Agile/Scrum | Sprint Planning | Release & Deployment Management
- PROJECT LEADERSHIP & DELIVERY**

Professional Experience

Project Lead / Technical Project Manager, Trigun Infotech 11/2025 – Present
NAVIOX – Fleet Management System

- Project Description: NAVIOX is an enterprise fleet management solution developed for the maritime industry to manage vessel operations, crew management, maintenance planning, procurement, inventory, voyage planning, compliance, and reporting. The platform streamlines end-to-end fleet operations and improves operational efficiency through centralized management.

Key Responsibilities:

- Led end-to-end project delivery using Agile methodology, ensuring scope, schedule, quality, and delivery commitments were tracked.
- Led and coordinated a cross-functional team of 8–10 developers, including task planning, technical coordination, and delivery follow-up.
- Coordinated with clients and stakeholders for requirement gathering, clarification, solution design, and delivery alignment.
- Planned and facilitated sprint planning, daily stand-ups, sprint reviews, retrospectives, and delivery tracking.
- Managed release planning, deployment coordination, production support, risks, issues, and priority resolution.
- Ensured timely delivery, quality standards, stakeholder communication, and continuous improvement across the project lifecycle.

Technologies: .NET 6, ASP.NET, C#, SQL Server, Angular, REST API, Azure DevOps, Docker, Kubernetes, RAG, Claude, ChatGPT

Projects: Naviox, Crew Management system, ShramYogi, Royal ERP

Project Manager / Project Leader

12/2021 – 11/2025

Arcon Techsolutions Pvt. Ltd

Privileged Access Management (PAM)

- Project Description: Developed an enterprise cybersecurity solution for managing privileged user accounts, password vaulting, secure access control, session monitoring, and compliance auditing. The solution enhanced organizational security and reduced the risk of unauthorized access.

Key Responsibilities:

- Managed project planning and execution.
- Coordinated with business stakeholders and technical teams.
- Led Agile delivery and sprint execution.
- Managed project risks, issue resolution, and release planning.
- Conducted client demonstrations and UAT support.

Technologies: ASP.NET Core, Web API, SQL Server, Angular, Azure DevOps, REST API, RAG, Copilot, Open AI

Team Leader, Pegasus Infocorp Pvt. Ltd

08/2020 – 12/2021

Job Check Portal

- Project Description: Developed an online recruitment and employment verification portal that enabled job seekers to apply for jobs, employers to manage recruitment, and administrators to monitor hiring activities through a centralized platform.

Key Responsibilities:

- Led the development team throughout the project lifecycle.
- Managed task allocation and code reviews.
- Coordinated with clients to gather business requirements.
- Ensured on-time project delivery and quality assurance.

Technologies: ASP.NET MVC, C#, Angular 12.0, React.js, SQL Server, JavaScript, jQuery.

Project Specialist, Geeta InfoTech Pvt. Ltd

06/2019 – 08/2020

Regularization of Unauthorized Development (RUD)

- Project Description: Developed a government web application to automate the process of regularization of unauthorized developments, including online application submission, document verification, approval workflow, fee management, and status tracking.

Key Responsibilities:

- Participated in requirement analysis and solution design.
- Developed core modules and integrated business workflows.
- Collaborated with government stakeholders during UAT.
- Provided deployment and production support.
- Technologies: ASP.NET MVC, C#, SQL Server, JavaScript.

Projects: POCARA, RUD

Technical Skills

Programming Languages: C#, Typescript, Java, Sql, VB.Net, AJAX, SQL, PL/SQL

Technologies: ADO.NET, Web services, .Net, MVC 5.0, .NET Framework 2.0/3.0/3.5, 4.7, 8.0, IIS, Web API, Redis.

Scripting Languages: Angular 12.0, 18.3, Node.js, Java Script, jQuery, Ajax, XML.XSLT, React.js

Web Development: ASP.Net, HTML/HTML5, CSS3, Bootstrap 3.3.7

Framework: .Net Framework 2.0, 3.5, 4.7, 8.0., Entity Framework, C# 3.0, 4.0, 5.0, 6.0, 8.0, Scrum

Database: MS-Access, MS-SQL Server 2000/2005/2008/2019, 2022, SQLite., PostgreSQL, MY SQL

Operating System: Windows XP / Windows7

Tools & Applications: MS Visual Studio 2013, 2012, 2008, 2005, Crystal Reports, Ajax Control Toolkit, WinSCP, VScode

Artificial Intelligence: OpenAI, Large Language Models (LLMs), RetrievalAugmented Generation (RAG), LangChain, Ollama, ChromaDB (Vector Database), Prompt Engineering, Semantic Search, AI Agents, Indexing, AI-powered Code Search, Cursor AI, Copilot

Version Control: Visual Source Safe, GitLab, TFS, SVN

Web Servers: IIS 6.0 and IIS 7.0

Project Management: Jira, Zoho

Education

IET, Avadh University,

MCA (Masters of Computer Applications)

Faizabad, India

Team Leader, *Nazara Technologies Pvt. Ltd.*

06/2011 – 02/2019

Nazara M-Commerce Platform

- Project Description: Developed and maintained a mobile commerce platform for digital content, gaming, and value-added services. The platform supported content management, payment integration, user management, and high-volume transaction processing.
- Technologies: ASP.NET, C#, SQL Server, Web Services, JavaScript.

CMS – Content Management System

- Content Management System (CMS) is a bundled or stand-alone web application used to manage, store, and deliver content on mobile. CMS provides managements of video, audio, themes and mobile games. CMS is a centralized repository for creating portals that allows publishing, editing and modifying content and also maintain through a central interface with multiple features like automated templates, access controls, easily editable content, document management, multilingual and many more using CDR. CMS contains following features. Content management, Portal Management, MIS reports.

Roles & Responsibilities

- Led Technical Team – Managed developers, assigned tasks, and ensured timely project delivery.
- Application Development – Developed and maintained ASP.Net,C# web and mobile applications using 3-tier architecture.
- Third-Party Integration – Integrated payment gateways, cloud services (Amazon S3), and external APIs(Paytm, CCAvenue, Consent Gateway, Alt Balaji APIs)
- Database Development – Designed SQL Server Stored Procedures, Views, and optimized database performance.
- Client Coordination – Gathered requirements, provided technical solutions, and managed client communication.
- Deployment & Quality Assurance – Performed code reviews, unit testing, deployment, and application performance optimization.
- Team Mentoring & Documentation – Conducted knowledge transfer sessions and prepared technical documentation.

Technologies: C#, ASP.NET, .NET Framework, SQL Server, ADO.NET, HTML, React.js ,CSS, JavaScript, XML, IIS, Visual Studio, WAP.

Projects: Gaming services developed in Africa, Asia & Latam America countries, ibg.org.in, Quizlo.in

Software Programmer, *Coruscant Tech*

01/2009 – 06/2011

Online Charging Gateway (OCG)

Project Description: Developed a telecom Value-Added Services (VAS) platform that enabled secure purchase and delivery of digital content with real-time balance validation, charging, and WAP gateway integration.

Key Responsibilities:

- Developed web-based modules using ASP.NET,C#, and SQL Server.
- Implemented real-time balance validation and deduction for telecom subscribers.
- Designed and optimized SQL Server stored procedures, views, and database objects.
- Integrated WAP applications with telecom charging and content delivery systems.
- Prepared technical design documents and participated in requirement analysis.
- Performed unit testing, bug fixing, deployment support, and production maintenance.

Technologies: C#, ASP.NET, .NET Framework, SQL Server, ADO.NET,HTML, CSS, JavaScript, XML, IIS, Visual Studio, WAP.

Projects: OCR , WEB Portal , Ticket booking system

Software Engineer, *AG Technology*

02/2008 – 12/2008

UTOPIA – Call Centre Performance & Reporting System

Project Description: UTOPIA is a call-centre business application designed to integrate employee data from multiple sources, automate data processing, generate configurable performance reports, and support employee appraisal and organizational performance analysis.

Key Responsibilities:

Designed and developed modules including Security, Master, Upload, Employee, Attendance, and Reporting.

Technologies: C#, .NET Framework, Windows Forms, SQL Server, Stored Procedures, Views, Triggers, Layered Architecture
