Full Stack Software Engineer | React.js, Next.js, Node.js, TypeScript, PostgreSQL | REST APIs & System Architecture | **Available to Join Immediately**

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1.6+ years of experience developing, enhancing, and maintaining scalable, production-grade web applications using **React.js**, **Next.js**, **Node.js**, **Express.js**, **TypeScript**, and **PostgreSQL**. Proficient in writing clean, efficient, and well-documented code that adheres to established engineering standards—participating in **code reviews** and **automated testing** to ensure high-quality deliverables. Skilled in **REST API design**, **microservices architecture**, asynchronous job processing with **Redis** and **BullMQ**, real-time systems with **Socket.IO**, and **JWT-based authentication**. Strong background in **Agile/Scrum** delivery, cross-functional collaboration with product, design, and engineering teams, and troubleshooting/debugging across development, testing, and production environments. Leverages **AI-powered development tools** to improve productivity, code quality, and engineering efficiency. Seeking a **Software Development Engineer / Full Stack Engineer** role at a product-based company or high-growth AI startup.

WORK EXPERIENCE

- Mistura Technologies Pvt Ltd** Bangalore, India
UI Developer (Next.js, Redux, TypeScript) February 2026 – June 2026
 - Developed and maintained modern, responsive web applications using **React.js**, **Next.js**, **Redux**, **TypeScript**, **JavaScript (ES6+)**, **HTML5**, and **CSS3**—writing clean, efficient, and well-documented code that adheres to engineering standards and best practices.
 - Architected scalable frontend systems with **Redux** state management for large-scale, data-intensive applications, improving UI responsiveness by **20%** and reducing page load time by **25%** through optimized rendering strategies.
 - Participated in **code reviews** and **automated testing** activities (Jest, React Testing Library), incorporating feedback from peers and technical leaders to improve code quality, readability, and maintainability.
 - Troubleshoot and resolved UI issues by identifying defects, analyzing root causes through **React DevTools** and browser debugging tools, and implementing appropriate fixes across development and testing environments.
 - Designed and implemented **responsive, adaptive web interfaces** that provide seamless user experiences across desktop, tablet, and mobile devices—ensuring cross-browser compatibility and accessibility.
- Monospear Technologies Pvt Ltd** Bangalore, India
Software Engineer (React.js, Next.js, Node.js, PostgreSQL) January 2025 – February 2026
 - Developed, enhanced, and maintained 3+ production-grade full-stack web applications using **React.js**, **Next.js**, **TypeScript**, **JavaScript (ES6+)**, **HTML5**, **CSS3**, **Node.js**, and **PostgreSQL**—driving a **25% improvement in client satisfaction scores**.
 - Translated **Figma** UI/UX designs into pixel-perfect, **WCAG-accessible**, responsive interfaces optimized for desktop and mobile, reducing design-to-deployment cycle time by **30%**.
 - Managed **state** effectively using **Context API** and **Reducer patterns**, implementing complex user interactions and data flows while maintaining clean, modular component architecture.
 - Built core features for **AI-powered CRM and Voice Agent products**, integrating **LLM APIs** and automating workflows that reduced manual operational effort across teams by **40%**.
 - Supported and monitored applications across development, testing, and production environments—ensuring reliability, performance, and proactively identifying issues through structured logging and observability.
 - Leveraged **AI-powered development tools** to improve productivity, code quality, and problem-solving—using **Gemini AI** and **OpenAI APIs** for prompt engineering and workflow automation.
 - Collaborated cross-functionally with product, business, backend, design, and QA teams in an **Agile Scrum** environment, consistently shipping production-ready features on schedule.
- Subhanu Technologies and Solutions** Bangalore, India
Full Stack Developer Intern (React, Angular, Node.js, Docker, PostgreSQL) June 2024 – December 2024
 - Developed and maintained full-stack applications using **React**, **Angular**, **TypeScript**, **JavaScript**, **HTML5**, **CSS3**, **Node.js**, **Docker**, and **PostgreSQL**—owning feature development end-to-end from design through release.
 - Developed and launched the open-source **Smart HR Management System**, automating core HR operations and reducing manual workflows by **40%** through role-based access control.
 - Participated in **Agile Scrum** ceremonies—sprint planning, daily stand-ups, retrospectives—collaborating with cross-functional teams to design, develop, test, and deliver high-quality features throughout the SDLC.

PROJECTS

- Capalar — AI Voice Agent Platform** 06/2025 – 02/2026
React.js, Redux, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, Microservices [\[Live\]](#)
 - Developed and maintained a production-grade **AI-powered voice agent platform** using **React.js** (functional components/hooks), **Redux** for state management, and **TypeScript**—building responsive, adaptive interfaces that reduce operational costs by **40%**.
 - Integrated **REST APIs** (Twilio, ElevenLabs) enabling real-time voice communication and automated outbound calling—designing clean, well-documented API integration layers.
 - Built analytics dashboards and campaign-tracking modules with **PostgreSQL** aggregations, delivering a **35% improvement** in call-efficiency insights for operations teams.

- Debugged and resolved complex UI/performance issues using **React DevTools** and browser developer tools, ensuring smooth user experiences across multiple browsers and devices.
- **URL Health & Observability Platform** 06/2026
Next.js, React.js, TypeScript, Node.js, Express.js, PostgreSQL, Redis, BullMQ, Socket.IO, JWT, Docker
 - Designed and built a full-stack **URL monitoring platform** with **React.js** frontend and **TypeScript**—implementing secure JWT authentication, role-based access control, real-time dashboards, and historical analytics for uptime and response-time visualization.
 - Built responsive, adaptive web interfaces for monitoring application availability—ensuring seamless user experiences across desktop and mobile devices.
 - Architected a scalable **Node.js/Express.js** backend with concurrent URL health checks powered by a **Redis**-backed caching layer and **BullMQ** job queues, enabling automated scheduling and retry logic.
 - Implemented production observability with **Socket.IO** for real-time event streaming, structured logging, and distributed request tracing, improving operational reliability and system visibility.
- **AI Interview Assistant — Mock Interview SaaS Platform** 03/2026 – Present
Next.js, React.js, TypeScript, Node.js, Express.js, PostgreSQL, Redis, BullMQ, Gemini AI, ElevenLabs, Deepgram
 - Architected a production-grade AI SaaS platform for resume-based interview generation, AI-powered mock interviews, real-time voice interactions, and performance analytics—building responsive, accessible user interfaces with **React.js**, **Next.js**, and **TypeScript**.
 - Built a scalable **microservices-style backend** using **Node.js**, **PostgreSQL**, **Redis** caching, and **BullMQ** for asynchronous resume parsing and high-throughput event handling.
 - Integrated **Gemini AI** for dynamic interview question generation, **Deepgram** for speech-to-text, and **ElevenLabs** for voice synthesis, with **JWT**-based authentication and granular role-based access control.
 - Implemented efficient state management with **Context API** and **Zustand**, ensuring optimal performance and smooth user interactions across complex workflows.

EDUCATION

- **ATME College of Engineering** July 2019 – August 2023
B.E., Computer Science & Engineering | CGPA: 7.4/10.0 Mysore, India

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- **Frontend:** React.js (Functional Components & Hooks), Next.js, Angular, Redux, Redux Toolkit, Context API, Tailwind CSS, HTML5, CSS3, GSAP, Responsive/Adaptive Design, Web Accessibility (WCAG), DOM Manipulation
- **Backend:** Node.js, Express.js, REST API Design, GraphQL, JWT Authentication, OAuth, WebSockets, Socket.IO, Microservices Architecture
- **Testing & Quality:** Jest, React Testing Library (RTL), Unit Testing, Integration Testing, Functional Testing, Performance Testing, Code Reviews, Debugging (React DevTools, Browser Tools)
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis (Caching), Prisma ORM, Database Optimization, Relational Database Concepts
- **Cloud & DevOps:** Docker, CI/CD Pipelines, GitHub Actions, AWS (EC2, S3), Linux, System Design, Distributed Systems
- **AI & Automation:** OpenAI API, Gemini AI, LangChain, AI-Powered Development Tools, BullMQ (Job Queues), Prompt Engineering, Workflow Automation
- **Methodologies:** Agile (Scrum, Kanban), Iterative Development, User Story-Driven Delivery, Software Development Life Cycle (SDLC), Cross-Functional Collaboration, Requirements Analysis, Technical Documentation
