Summary

Frontend Developer with a B.Tech in Computer Science and 2 years 8 months of full-time experience (3 years 7 months total tenure) at Cosmotech AI. Specialized in building scalable, responsive enterprise web applications using React.js, Next.js, and Angular. Proven track record in API integrations, modular UI architecture, and debugging. Gained 1 year of global engineering exposure through a rotating deployment model at the parent company, Cosmotech PH (Philippines), collaborating with international teams on enterprise applications. Actively expanding into full-stack capabilities with Node.js and MongoDB.

Technical Skills

Frontend Stack: React.js, Next.js, Angular (v18), TypeScript, Redux, TanStack Query, Context API, Tailwind CSS, JavaScript, HTML5/CSS3.

Backend & Tools: Git/GitHub, Vite, REST APIs, Node.js (Learning), Express.js (Learning), MongoDB (Learning).

Professional Experience

Cosmotech AI

Dec 2023 – Present

Frontend Developer (Full-time)

Noida, Uttar Pradesh (Offsite Deployment)

Enterprise HR Portal – Landbank Philippines (Ongoing Project: 2025 – Present)

- Engineering responsive frontend UI layout components using **Next.js** and **TypeScript** for a private internal employee management system customized for a major overseas public financial institution.
- Translating complex administrative workflows into modular, low-latency views while configuring optimized internal routing paths to manage dense personnel records safely offsite.

QMS (Queuing Management System – Completed Project: 2024 – 2025)

- Collaborated within a 4-member agile engineering pod to code intuitive terminal kiosk interfaces and staff token tracking dashboards using **React.js** and utility-first **Tailwind CSS** properties.
- Implemented role-specific layouts using component-driven protected routing, utilizing **Git** and **Azure DevOps** for version control, collaborative Pull Request validations, and daily sprint tracking.

Cosmotech AI

Jan 2023 – Nov 2023

Frontend Developer Intern / Trainee

Noida, Uttar Pradesh (Offsite Deployment)

HRIS (Human Resource Information System – Completed Project: 2023 – 2024)

- Promotion Timeline: Initially joined as a 6-month intern; extended into a 5-month probationary trainee phase based on strong project delivery.
- Developed and maintained core scalable modules covering employee records and performance profiles offsite using **Next.js**, **TypeScript**, and **Tailwind CSS** to automate company lifecycles.
- Configured file-based dynamic routing to ensure smooth page-to-page navigation across personnel screens, integrating backend web endpoints securely via native **Fetch API** protocols.

Projects

Hotel Booking Application | Next.js, Supabase, JavaScript, Tailwind CSS

Completed

- Engineered a responsive, full-stack customer-facing application using **Next.js** and **Tailwind CSS**, enabling users to browse catalog listings and explore detailed room options dynamically.
- Integrated a backend system using **Supabase** to execute real-time availability checks and manage secure booking workflows, validating client-side inputs efficiently.

Education

B.Tech in Computer Science — Sharda University, Greater Noida, UP

2019 – 2023
