Noida, UP 201304

Skills

- **Java**
- **JavaScript**
- **ReactJS**
- Python
- CSS
- SQL
- C
- C++

Certifications

- **Certified Full Stack Developer-Amazon Full Stack Web Developer** – Gained hands-on expertise across frontend, backend, API development, databases, and full-cycle application deployment.
- **Oracle Java Foundations:** Completed coursework covering core Java, OOP principles, and foundational application development skills.

Shoolin Tyagi

Summary

Full-stack developer, specializing in Adobe Experience Manager (AEM) with strong expertise in Java, JavaScript, and Python. I build scalable, user-focused solutions—ranging from backend services to dynamic frontend interfaces. Currently focused on AEM development, creating seamless digital experiences through custom components and smart integrations. Passionate about clean code, performance, and solving real-world problems with technology.

Experience

IBM India Pvt Ltd (DynPro Payroll) - Application Developer

Pune, India

09/2024 - Current

- Working in the website development team for **Vodafone-Idea (Vi)**, contributing to both backend services and AEM-driven frontend workflows.
- Specifically handled the **payments module**, managing end-to-end backend flows including API integrations, servlet enhancements, and onboarding of new payment modes.
- Built **dynamic and configurable AEM components** using Java, JavaScript, and HTL (Sightly) to support evolving UI/UX and business requirements.
- Ensured **high performance, secure data handling, and scalability** across backend services and AEM components.
- Contributing to the **AEM to Liferay migration** for Vi website by building **backend services from scratch using Spring Boot**, implementing and handling REST APIs, and supporting seamless integration with existing systems.
- Collaborated with cross-functional teams (frontend, backend, QA, DevOps, and client stakeholders) to deliver seamless customer journeys and reduce turnaround time for change requests.
- Worked with **GitLab for version control** (branching, merge requests, code reviews) and **Jenkins for automated build execution and deployment pipelines**.

Parallel Contribution - Network Performance Monitoring (NPM) Project

- Optimized the NPM analytics platform by improving **Druid-based database workflows, query performance, and data accuracy** while simultaneously delivering features for the Vi payments project.
- Worked extensively on the Java-based backend for the NPM platform, leveraging **Spring and REST APIs** to handle high-volume data processing and integrations.
- Contributed to both **backend and frontend flows of the NiFi-based web interface** being developed for Vi, ensuring smooth data processing and UI interaction between pipeline and monitoring layers.
- Demonstrated strong multitasking and ownership by contributing to two high-priority projects under tight timelines, helping the NPM product reach production maturity.

Airtel X Labs - Intern

06/2023 - 08/2023

- During my three-month internship at Airtel X Labs, I had the opportunity to work on cutting-edge projects within the realm of Java, Spring Boot, and microservices
- Collaborating with experienced professionals, I gained valuable hands-on experience in software development and architecture.

Education And Training

06/2024

BTECH Information Technology:

Jaypee Institute Of Information Technology

Noida, UP

- **Projects and Research:**
- **Location Tracking App (Android, Java):** Built a GPS-based Android app in Java for real-time location tracking with optimized performance and accurate movement monitoring.
- **Punctuation Prediction (ML, NLP, Python):** Developed a punctuation prediction model using ML and NLP to automatically enhance text readability with high-accuracy punctuation insertion.
- **Diabetes Predictor (ML, Python):** Created a diabetes risk prediction system using advanced ML algorithms and patient data preprocessing to achieve high prediction accuracy.
- **Resume Scanner & Job Portal (Django):** Built a resume scanner and job portal in Django using cosine similarity to match candidates with job requirements for improved recruitment efficiency.
