SUMMARY

Entry-level Software Developer with 1+ year of professional experience in Python scripting, automation, and backend development for enterprise IoT systems. Proficient in shell scripting, REST APIs, SQL, and CI/CD pipelines within Linux/Agile environments. MCA graduate (CGPA 8.93) with demonstrated ability to collaborate across DevOps, QA, and development teams to deliver quality automation solutions aligned with enterprise best practices.

TECHNICAL SKILLS

Languages: Python (primary), Java, JavaScript, PHP, C, SQL

Scripting & Automation: Python scripting, Shell scripting (Bash/Linux), PowerShell basics, Batch scripting, Event-driven pipelines

DevOps & CI/CD: GitHub Actions, Docker, Docker Compose, REST APIs, Webhook integrations

Databases: MySQL, PostgreSQL, Firebase (NoSQL) — query optimization, schema design

Frameworks & Tools: Flask, Django, React, Next.js, Git, VS Code

Methodologies: Agile/Scrum, Code Reviews, Structured Logging, Software Development Best Practices

EXPERIENCE

Software Developer | Pyrox-I-City Private Limited, Bengaluru

Nov 2024 – Mar 2026

- Developed and implemented Python automation scripts for backend system configuration and deployment, reducing manual provisioning effort and ensuring repeatable, quality delivery across enterprise workflows.
- Built shell scripting and Linux-based automation pipelines on Raspberry Pi using REST APIs, improving system reliability and reducing device downtime incidents in production environments.
- Authored Python data-processing scripts to optimize MySQL queries and schemas, achieving ~25% reduction in query latency and eliminating redundant records across enterprise automation datasets.
- Collaborated with cross-functional DevOps and development teams to design and deploy RESTful backend services in Python and PHP, enabling secure communication across distributed IoT systems.
- Diagnosed distributed system issues using structured logging, network diagnostics, and monitoring tools — following enterprise code quality and performance best practices.
- Integrated cloud webhook workflows with Amazon Alexa and Google Assistant APIs following standard enterprise integration and security practices.

Frontend Developer Intern (Unpaid) | ITJOBXS, India

Jul 2023 – Dec 2023

- Contributed to web module development in an Agile, Git-based team; implemented PHP + MySQL backend connectivity, integrated third-party services, and participated in code reviews following standard SDLC best practices.

PROJECTS

Dockerized Flask REST API with PostgreSQL & CI/CD | Python, Flask, PostgreSQL, Docker, GitHub Actions [GitHub](#)

- Built a production-grade Python Flask REST API with PostgreSQL using Docker Compose; implemented container networking, persistent volumes, and retry logic — demonstrating enterprise automation and scripting best practices.
- Automated build and push pipeline via GitHub Actions CI/CD; used environment variables for parameterized deployments across environments targeting AWS EC2.

AI-Powered Interview System | Python, Next.js, Firebase, OpenAI APIs

- Developed a real-time platform using Python-backed OpenAI API integration for NLP-based response analysis, voice interaction, and user performance tracking at scale.

EDUCATION

Master of Computer Applications (MCA)

2023 – 2025

Cambridge Institute of Technology, Bengaluru | CGPA: **8.93 / 10**

B.Sc. Computer Science, Mathematics & Statistics

2019 – 2022

Christ Academy Institute for Advanced Studies, Bengaluru | CGPA: **7.93 / 10**

CERTIFICATIONS

- Joy of Computing Using Python — NPTEL
- Mastering Full Stack Development — Udemy
- Artificial Intelligence Fundamentals — IBM
