SOFTWARE TESTING PROFESSIONAL

Seeking challenging and growth oriented opportunities in the IT Industry

PROFILE

- Sincere & diligent individual professional over around **11+ years of experience in Software Testing.**
- Having **7+ years** of experience in **Performance Testing** using **JMeter & Load Runner, Cloud Akami.**
- Well versed in **Software Development Life Cycle, Test Life Cycle and Defect Life Cycle.**
- Proactively involved in the preparation of **Test Plan.**
- Exceptional experience on scripting protocols i.e. **WEB (HTTP/HTML), SAPGUI, Web Services using SOAP & Restful.**
- Extensive experience on **Jmeter script recording and Enhancements.**
- Experience in using **Fiddler** to debug the communication.
- Involved & coordinated with DB team in **Test Data preparations.**
- Well conversant with **Correlation, Parameterization and checkpoints.**
- Extensive experience in conducting different Performance testing's like **Baseline, Load, Stress, Endurance testing, Benchmark testing** etc.
- Well versed in Monitoring & Profiling tools like **Perfmon, Appdynamics and Dynatrace.**
- Implemented **Jenkins Master slave** and established **CI/CD** operation in micro server architecture.
- Worked in Service Virtualization using **CA Lisa tool.**
- Having Hands-on experience in **creating virtual stub** with request and response pair, recording mode for web services like soap, json, rest services in Service Virtualization.
- Reviewed **AWR REPORT** as per client requirements and submitted to the client.
- Work with others to **monitor performance of application(Data dog)**, create automated system administration monitoring and alert systems and respond to interruption of service events for running service
- Experience analysing and resolving **performance and scalability** issues.
- Coordinate and assist the Development Team to analyze the test execution result and fixing the Bottlenecks.
- Implementation experience using **AGILE Methodology and V-Model.**
- Proficient in **test scenario design, testability matrix design, test case design, test case execution and defects reporting.**
- Accountable for preparing the Checklist for **Functional, Security, Usability Testing.**
- Collecting and evaluating the test Metrics for **Schedule variance, Effort variance and Defect density.**
- Well acquainted with **orthogonal ways of testing.**
- Good Working Experience in Smoke testing, Functional, integration, Regression and system testing.

PROFESSIONAL EXPERIENCE

- Worked as **Sr.Software Test Engineer** in **Cenduit (India) Services Pvt Ltd** from 18 Feb 2013 to 11 Jul 2018
- Worked as **Performance Test Engineer** in **WIPRO TECHNOLOGIES** from 18 Jul 2018 to 02 Dec 2020
- Worked as **Senior Test Engineer** in **MAERSK GLOBAL SERVICE** from 09 Dec 2020 to 07 Jan 2022
- Working as **Test Specialist** in **COFORGE LIMITED** from 09 feb 2022 to till date

TECHNICAL SKILLS

Domain Knowledge	Clinical Trials Research, Healthcare, Supply Chain, Banking, Shipping
Languages	C, java
Web/Application Server	IIS, WebSphere
Database	MS SQL server, SQL server, Mongo DB
Configuration Management	VSS, SharePoint, Confluence
Monitoring Tool	Perfmon, Sitescope,Dynatrace,AppDynamics,Datadog
Defect Tracking Tool	B-Tracker, Jira
Project Tool	Load Runner, Splunk, Data power, Cloud test Akami

EDUCATIONAL & PROFESSIONAL CREDENTIALS

B.Tech Information Technology

Sri Ramakrishna Engineering College, Coimbatore

ACHIEVEMENTS

- ◆ Rewarded with **1000 Winner Circle points** for the project delivery and collaboration and **got 7/7 rating** from clients.
 - ◆ Received **"People Choice Award"** Award in the second Quarter of 2016.
 - ◆ Received **"STAR of the Quarter"** Award for testing activities during Q1-2015 for excellence in performance.
 - ◆ Received **"2014 Collaboration Award"** Award in the second Quarter of 2014.
 - ◆ Received **"Pat on back"** recognition of achieving exemplary feedback and appreciations from client
-

CERTIFICATION

- ✚ Certified by ISEB-ISTQB as “ISTQB Certified tester” (Foundation Level) with an aggregate of 95 percent.
- ✚ Certified by RANK SHEET as “PROFESSIONAL IN MANUAL TESTING” in 2012. <http://ranksheet.com/User/Cert.aspx?q=JUQ9izw7r%2fhkGjrD0o%2bD1igXOdz0cd64KfK06jlc2G%2bLqlqArKciPhMZST9w%2f0FyUlwNx3ktQA%3d>

PROJECTS UNDERTAKEN AT COFORGE LIMITED

Project Name	IDB, FINOMINAL, BRANDES
Environment	Java
Testing tools	Jmeter, InfluxDB, Grafana
Team size	2
Testing type	Performance

Summary The Application system developed with a customized and highly standardized and secure Applications ensuring compliance with ISO20022 messaging standards. By leveraging our event-driven architecture using micro-frontend and micro services, our clients can reduce costs, improve the experience and accelerate product evolution. Our legacy modernization framework allows banks and FIs to migrate from legacy to modern distributed platforms. With our expertise, our clients are better prepared to meet the challenges of the digital landscape.

Contributions:

- ⇒ Gathered NFRS from the BA and prepared the Volume metrics.
 - ⇒ Coordinate with the development team/onsite leads to gather clarity of the requirement.
 - ⇒ Collaborated with Architects and Developers to investigate high response times, identify bottlenecks, and provide actionable performance recommendations.
 - ⇒ Provided Training for new joiners and preparing the Generic Test Cases.
 - ⇒ Creating the Test **script recording** and **Enhancements** using Jmeter.
 - ⇒ Customize the script using **parameterization and correlation**.
 - ⇒ Conducted LOAD and Stress, Endurance tests through performance centre.
 - ⇒ Monitoring different graphs like transaction response time, hits per Second, throughput, windows resources and database server resources etc using integration of InfluxDB with Grafana.
 - ⇒ Created a Jenkins CI/CD pipeline integrating JMeter scripts with Jenkins.
 - ⇒ Monitoring various performance parameters during the Load Test across all the tiers (Web/App/DB server)
 - ⇒ Analysed the issues identify the bottlenecks of the system and reporting.
 - ⇒ Used Dynatrace to monitor the databases, application and web servers.
-

PROJECTS UNDERTAKEN AT MAERSK GLOBAL SERVICE

Project Name	GCD – Captain Manifest
Client	Maersk
Environment	VB.Net, Java
Testing tools	Jmeter, Confluence, Jira, Cloud test Akami
Cloud	Azure
Team size	1
Testing type	Performance, Devops

Summary Maersk Global Services can help simplify your importing and exporting process. It provides visibility and efficiency along with a smoother compliance process, keeping your goods moving all the time. Our global presence also ensures you have a local solution to tackle any customs challenges.

Contributions:

- ⇒ Under Stood the NFRs and prepared Volume metrics based on the Production data.
 - ⇒ Coordinate with the development team/onsite leads to gather clarity of the requirement
 - ⇒ Owned the Performance Testing Environment and Back End DB (**MongoDB**) and created Collections in DB levels.
 - ⇒ Maintained all the **Pods**, taken care of all the deployment activates, created the Replica set in **Kubernetes kubectl**.
 - ⇒ Monitored all Services using **Spring Boot Wall Board** and created Metrics to sure the Services UP and Running.
 - ⇒ Used **GITHUB** to created pull request for PERF environments from Pre-prod ENV.
 - ⇒ Creating the Test **script** using Cloud test Akami tool.
 - ⇒ Tailored the Clips using **parameterization and correlation** to ensure clips work for multiple iterations.
 - ⇒ Planned the Compositions as per the business requirement using Cloud test.
 - ⇒ Conducted LOAD and Stress, Endurance tests through performance centre.
 - ⇒ Monitoring different graphs like transaction response time, hits per Second, throughput, windows resources and database server resources etc.
 - ⇒ Tested various performance parameters during the Load Test across different Data centres to identify Network Latency.
 - ⇒ Analyse the issues identify the bottlenecks of the system and reporting.
 - ⇒ Used Data dog to monitor the databases, application and web servers.
 - ⇒ Published the test results and sending out results to the management and Application development teams and other stakeholders.
-

PROJECTS UNDERTAKEN AT WIPRO TECHNOLOGIES

Project Name	MBNA – Cards, CONSUMER ONBOARDING BANKING
Client	Lloyds, BOS, RBS, Halifax
Environment	VB.Net, Java
Testing tools	Load Runner, Confluence, Jira, AppDynamics
Team size	4
Testing type	Performance
Protocols	Web (HTTP/HTML), Web services

Summary Lloyds Banking Group are a financial services group with millions of UK customers with a presence in nearly every community; we are familiar on the high street and with over 1 million businesses through our portfolio of brands. Our business is focused on retail and commercial financial services. We thrive based on how well we serve our customers; on our relationships within the communities, we serve; and on helping Britain prosper.

Contributions:

- ⇒ Under Standing Client requirements [URS, SRS, MRS & RRS].
 - ⇒ Coordinate with the development team/onsite leads to gather clarity of the requirement
 - ⇒ Configuring the Endpoints from Application layer to the other layers through Gateways.
 - ⇒ Provided Training for new joiners and preparing the Generic Test Cases.
 - ⇒ Creating the Test **script recording** and **Enhancements** using Virtual User Generator.
 - ⇒ Customize the script using **parameterization and correlation**.
 - ⇒ Designing the scenario as per the business requirement using performance centre.
 - ⇒ Conducted LOAD and Stress, Endurance tests through performance centre.
 - ⇒ Monitoring different graphs like transaction response time, hits per Second, throughput, windows resources and database server resources etc.
 - ⇒ Monitoring various performance parameters during the Load Test across all the tiers (Web/App/DB server)
 - ⇒ Analyse the issues identify the bottlenecks of the system and reporting.
 - ⇒ Used Appdynamics & Dynatrace to monitor the databases, application and web servers.
 - ⇒ Involved in Analysing test results and sending out results to the management and Application development teams and other stakeholders.
-

PROJECTS UNDERTAKEN AT CENDUIT SERVICES PVT LTD

Project Name	CIRT 1.0.CIRT 2.0
Client	Novartis, AstraZeneca
Environment	Java, Oracle 10g
Testing tools	QC, VSS
Team size	8
Testing type	Manual, Performance
Protocol	Web services, Restful services

Summary The Cenduit Interactive Response Technology (C.I.R.T.) Xpress system to be developed for Novartis. The goal is to provide Novartis with a customized and highly standardized IVR/IWR Xpress System Platform, tailored to meet the specific requirements of Novartis for Open Label and Double-Blind studies, Roadmap for increased Interactive Response Technology (IRT) implementation to support lean Drug Supply Management, real time enrolment, patient management, study progression, medication tracking and the Resources. The proposed IVR/IWR Xpress System supports all aspects of patient and medication management from screening through to treatment completion, with static or stratified randomization. The system offers flexible site communications with two interfaces that can be used interchangeably by sites.

Contributions:

- ⇒ Involved in understanding the whole application, defining requirements, Understand the Application functionality, architecture details and components metrics along with workload characterization understanding of the business process to ensure correct deliverables to achieve client satisfaction.
 - ⇒ Execute the Test Scenarios with respect to Application Requirements.
 - ⇒ Effectively involving in preparation and execution of Test cases [SRT Plan]
 - ⇒ Tracking and reviewing of test case creation, Test Execution with the team preparing the SRT Summary Report.
 - ⇒ Preparing the System Traceability Matrix [STM]
 - ⇒ Performed Load test, Stress test and Soak test using Jmeter for testing the maximum load that the application can handle.
 - ⇒ Converted business requirements and design documentation into test design products: Test Scenarios and Test Scripts.
 - ⇒ Preparing Summary Reports, raising defects followed up with developers for timely resolution of defects.
 - ⇒ Measure, report, and recommend Performance Response Time Guidelines/SLAs.
 - ⇒ Conducting Review Meetings within the Team.
-
