PROFESSIONAL SUMMARY

Senior Automation Test Engineer with 6 years 5 months of experience architecting test automation frameworks for enterprise web and desktop applications in banking and government domains. Deep expertise in Selenium WebDriver, LeanFT, Java, and Cucumber BDD, with a track record of cutting manual testing effort by up to 75%, achieving 95%+ test reliability, and embedding automated tests into Jenkins CI/CD pipelines to speed up releases. Skilled at owning automation strategy end-to-end — from framework design to defect resolution — while partnering closely with developers, business analysts, and QA teams to ship high-quality software on schedule.

SKILLS

Automation Tools & Frameworks: Selenium WebDriver, Selenium Grid, LeanFT, Cucumber (BDD), TestNG, JUnit

Languages: Java, SQL

CI/CD & Build Tools: Jenkins, Maven, Git, GitHub

Testing Practices: Functional Testing, Regression Testing, Manual Testing, Exploratory Testing, Web & Desktop Application Testing, UI Automation, Test Strategy & Framework Design

Tools & Practices: JIRA, Postman, Test Plan / Test Case Design, Defect Management, Agile/Scrum

WORK EXPERIENCE

Senior Automation Test Engineer — Accenture

December 2025 - Present | Bangalore, Karnataka

Client: Bank of America | **Project:** Loan IQ

- Own automation test strategy for client **Bank of America's Loan IQ** platform, a Desktop application for Commercial Loan Lending, ensuring quality and regulatory compliance across loan servicing workflows.
- Architect and maintain scalable automation frameworks using LeanFT and Java, driving consistent test coverage across releases.
- Developed Cucumber BDD test scenarios, including automated PDF comparison, to validate Notices and Invoices generated for each transaction on the Loan IQ platform, ensuring accuracy across transaction types.
- Partner with developers, business analysts, and QA leads to translate business requirements into robust test strategies, reducing production defects and improving release quality.
- Review test cases from a 4-member QA team on the Bank of America account, contribute to test case authoring, and support project planning.

QA Automation Tester — DXC Technology

April 2022 - October 2025 | Bangalore, Karnataka

- Architected a comprehensive test automation framework using Selenium and Java from the ground up, reducing manual testing effort by 75% and increasing deployment confidence across releases.
- Directed functional testing for creation and publishing of tender flows, manually validating tendering workflows and edge cases to ensure a 99.9% tendering success rate during peak traffic periods such as budget releases.
- Drove exploratory testing sessions for new feature releases, uncovering critical edge cases that prevented 15+ potential production issues.

Automation Tester — Fidelis Corporate Solutions Pvt Ltd (Parent Company: DXC Technology)

April 2020 - March 2022 | Bangalore, Karnataka

- Delivered comprehensive automated testing for a procurement application serving 1M+ customers, ensuring compliance with security standards.
- Built an end-to-end test automation suite for bidding tender processes using Selenium and TestNG, achieving 85% test coverage.
- Integrated automated tests into Jenkins CI/CD pipelines with quality gates, cutting deployment time by 40% while maintaining 95%+ test reliability.
- Led usability testing sessions with end users, identifying UI/UX improvements that enhanced customer satisfaction by 20%.

Support Executive — ManpowerGroup Services India Private Limited

January 2020 - March 2020 | Bangalore, Karnataka

- Provided application workflow training to 350+ government departments across Karnataka.

PROJECT

Loan IQ (Bank of America) | December 2025 - Present

- Set up LeanFT-based automation scripts for core loan servicing workflows on the Loan IQ Commercial Loan Lending platform, focusing on regression coverage across releases.
- Built a Cucumber BDD suite with automated PDF comparison to verify Notices and Invoices against expected templates for every transaction type, cutting manual document verification effort.
- Logged and tracked defects in JIRA, working closely with developers and business analysts to resolve issues within release timelines.

E-Procurement (Government of Karnataka) | April 2020 - October 2025

- Prepared test plans, test scripts, and test cases based on functional specifications and user requirements.
- Implemented automation test scripts using Selenium WebDriver, Java, Maven, Cucumber BDD Framework, and JUnit.
- Executed test cases, reported and tracked defects using JIRA, and prepared weekly status reports.
- Collaborated effectively within a cross-functional team to deliver testing milestones on schedule.

EDUCATION

Bachelor of Engineering in Computer Science

Jawaharlal Nehru National College of Engineering, Shivamogga, Karnataka | July 2015 - June 2019

ACHIEVEMENTS

- Won 3 DXC Champs Awards (April 2022 - October 2025) for outstanding contributions to the project at DXC Technology.
- Won a Collaboration Award for excellent teamwork.
