PROFESSIONAL SUMMARY

AI Engineer / Data Scientist with ~3 years of experience developing ML Models, Agentic AI, RAG pipelines, and enterprise-grade LLM systems, supported by a strong foundation in Machine Learning and Neural Networks. Skilled in leveraging GraphDB-driven knowledge reasoning and cloud-native architectures to deliver scalable, high-impact AI solutions.

WORK EXPERIENCE | PROJECTS

Genpact : AI Engineer | Data Scientist (Bengaluru)

March 2023 - Present

- **Pfizer (Pharma)** - Site Activation & Due Diligence Automation

Designed and deployed an end-to-end Agentic AI solution to automate site activation and due diligence workflows, reducing manual effort by ~95%. Collaborated directly with Pfizer's R&D stakeholders to build a production-grade system using LangGraph-based multi-agent orchestration, with deployment on Azure cloud infrastructure.

- **Chime (Banking)** - Call Center Verbatim Analytics

Built a GenAI-powered Streamlit application to summarize call center verbatims and analyze agent/system issues. Integrated a RAG architecture to generate recommendations grounded in historically similar problems and resolution patterns using vector search, significantly reducing manual analysis effort by >90%.

- **Stock Market Insights Assistant** -

Stock Intelligence Assistant built with LangChain and MCP, combining RAG-based document retrieval with live stock data to answer company insights and market queries in a single chatbot flow.

- **Time Series Forecasting Accelerator - Genpact Internal**

Developed a Streamlit-based forecasting web application supporting multiple time series models, data transformations, feature scaling, and advanced null-value handling. Enabled interactive visualization and future-date prediction to support data-driven decision-making across teams.

- **CBRE (BCM)** - Headcount Optimization & ML Modeling

Developed an optimization-based headcount planning solution to improve workforce allocation and operational efficiency. Built a machine learning pipeline incorporating ensemble-based feature selection to reduce high-dimensional datasets to a compact, high-performing feature set, improving model accuracy and computational efficiency.

- **Walmart (Retail)** – ETL & Workflow Automation

Built ETL pipelines in Dataiku to extract, transform, and load data into structured storage for optimized workflows. Developed automated testing scripts to validate and ensure reliability of deployed data processes.

SKILLS

Programming: Python, C++, R

Generative AI & LLM Systems: LLMs, RAG, Agentic AI, LangChain, LangGraph, MCP

Machine Learning & AI: Machine Learning, Deep Learning, NLP, Time Series Forecasting, Feature Engineering

Data & Databases: SQL, NoSQL, GraphQL

Frameworks & Tools: Streamlit, Dataiku

Cloud & Deployment: Google Cloud (ACE Certified), Azure

EDUCATION

M.Tech in Artificial Intelligence and Machine Learning
BITS Pilani (WILP) | 2025-27 | 8.3 GPA*

B.Tech in Information Science and Engineering - Bengaluru

Nitte Meenakshi Institute of Technology | 2019-2023 | 9.1 CGPA

LOCATION

Bengaluru

A Minimalistic Model for Converting Basic Cars into
Semi-Autonomous Vehicles using AI and Image
Processing
