

MUKESH MANRAL

Manager – Data Science | Customer Analytics & Insights

Bengaluru, India (Open to relocate: Chennai)

📞 +91 8384801974 ✉️ mukeshmanral777@gmail.com [🌐 LinkedIn](#) [🐙 GitHub](#)

Professional Summary

Data Science leader with **7+ years** delivering **client-facing analytics**, **customer insights**, and **measurable business outcomes** across insurance, EdTech, and enterprise retail. Proven people manager who has **mentored and led teams of 5–30** analysts and data scientists, owning day-to-day delivery, technical coaching, and stakeholder communication from discovery through production. Integrates **disparate datasets**, builds analytics-ready pipelines, and applies **predictive modeling**, **segmentation**, **recommendation systems**, and **text analytics** to solve marketing and customer performance problems. Track record translating analysis into executive-ready **insights and recommendations**: **Rs. 18–20 crore** projected annual savings, placement uplift from **18% to 40%**, **80%** faster document processing, and **2M+** customer records analyzed at scale. Experienced independently **managing end-to-end data science projects** — scoping client objectives, preparing data, developing reusable analytics code in **Python**, validating models, and presenting findings to business and leadership audiences. Combines hands-on modeling depth with account-style delivery: aligning data science solutions to **client goals**, performance targets, and long-term growth opportunities.

Core Competencies

Leadership & Client Delivery: Team Management, Mentoring, Project Ownership, Stakeholder Communication, Insight Presentation, Requirements Translation, Cross-functional Collaboration

Customer & Marketing Analytics: Customer Segmentation, CLV Modeling, Churn & Retention, Recommendation Systems, Campaign Analytics, ROI Measurement, Cohort Analysis, RFM, Performance Reporting

Data Science Methods: Predictive Modeling, Classification, NLP & Text Analytics, Document Intelligence, A/B Testing Concepts, Feature Engineering, Model Monitoring

Technical Toolkit: Python, SQL, Pandas, scikit-learn, PyTorch, FastAPI, PostgreSQL, AWS, GCP, MLflow, Git, Jupyter, Data Visualization

Professional Experience

NeoGenCode Technologies Pvt Ltd

February 2025 – June 2026

Data & AI Specialist - Manager (Care Health Insurance)

Bengaluru, India

- **Led client delivery** for Care Health Insurance analytics initiatives: scoped business problems, integrated policy and document datasets, and translated requirements into production analytics solutions with audit-ready reporting.
- **Managed and mentored a team of 20** analysts/engineers on customer document intelligence and operational analytics; supported technical development, code quality, and delivery timelines across Dev/UAT/Prod.
- Delivered **customer analysis at scale** on **2M+** records; improved operational efficiency and decision accuracy for KYC and claims workflows, enabling faster customer onboarding and compliance reporting.
- Built reusable **Python analytics and API services**; communicated findings, trade-offs, and business recommendations to client and internal leadership stakeholders.
- Introduced AI-assisted classification and retrieval workflows to improve edge-case accuracy and reduce manual review effort in high-volume customer operations.

Manralai

January 2023 – December 2024

Chief Product Officer – Data Science & ML Platform - Freelance

India

- **Led a distributed team of 30** across data science, engineering, and product; set delivery priorities, development standards, and training objectives for analytics execution.
- Owned end-to-end **recommendation and customer analytics platform** for EdTech: integrated behavioral, engagement, and content datasets to drive personalization and learner outcomes.
- Delivered **marketing-relevant DS solutions** — propensity modeling, recommendation ranking, and performance dashboards — connecting model outputs to business KPIs and growth goals.
- Independently **managed project delivery** from PoC to production on AWS; presented model value, roadmap, and results to leadership and partner stakeholders.

HCL (Guvi-IITM)

April 2023 – September 2023

Data Science Specialist – Analytics & MLOps

Bengaluru, India

- Partnered with business units to standardize analytics delivery; improved student **placement outcomes from 18% to 40%** in **6 months** through predictive modeling and pipeline redesign.

- Built data preparation workflows and an in-house prediction system; mentored junior analysts on reproducible modeling, tracking, and deployment practices.
- Served as bridge between **data science and business stakeholders**, translating leadership strategy into executable analytics roadmaps.

CloudyML

January 2022 – December 2022

Data Scientist – NLP & Document Analytics

Bengaluru, India

- Built text analytics solution for unstructured document operations: classification, entity extraction, and workflow automation reducing processing time by **80%**.
- Prepared and analyzed document datasets end-to-end; communicated operational insights and implementation recommendations to business users.

TechSim+

July 2019 – December 2021

Machine Learning Engineer – Customer Analytics

India

- Conducted **customer and transaction deep dives** on **20M+** records; integrated raw transactional, product, and behavioral datasets into curated modeling tables on AWS.
- Developed analytics models and insights contributing to estimated **Rs. 18–20 crore** annual savings; presented findings and architecture recommendations to R&D and business leadership.
- Owned analytics code development, ETL quality checks, and repeatable Jupyter/SageMaker workflows for ongoing client-style reporting and model refresh.

Selected Analytics Projects

Maximised ROI – Customer Spending Analytics | *Customer Analytics, AWS, SageMaker*

- Marketing-style customer performance analysis on **20M+** transactions; identified spend drivers and optimization levers supporting **Rs. 18–20 crore** projected savings.

Customer Lifetime Value (CLV) | *Segmentation, Cohort Analysis, BG/NBD* | GitHub

- Built CLV and RFM frameworks on **100K+** transactions to support retention strategy, customer prioritization, and revenue forecasting.

EdTech Recommendation Engine | *Personalization, Propensity, Business KPIs*

- Recommendation and ranking models to improve engagement and conversion; aligned model metrics with learner outcomes and platform growth targets.

Insurance Customer & Document Analytics | *Operational Insights, Scale Analytics*

- Large-scale customer document analytics (**2M+** records) enabling faster onboarding, compliance reporting, and operational decision support for insurance client workflows.

Education

Uttarakhand Technical University

Bachelor of Technology (B.Tech) – Information Technology / Engineering

India

Certification

- Deep Learning Specialization — DeepLearning.AI
- Machine Learning — Stanford University
- Master Data Science for Industry — KPMG
- Improving Deep Neural Networks — DeepLearning.AI
