Bengaluru | +91-9900505448 | sanjeev.Kumar.Baranwal@Kyndryl.com | B. Tech (C.S.E)

LEAD ON-PREMISES & CLOUD DBA | SQL SERVER | POSTGRES SQL
MCP | AZURE | ITIL V3 (F) | PSM- I | FLMI | AINS 21 | LOMA-280, 290

CAREER SUMMARY

Lead Database Administrator with over 23 years of experience, including 17+ years as a SQL Server DBA in high-availability OLTP/OLAP environments across on-premises and Azure platforms.

CURRENT RESPONSIBILITIES

MS SQL Service Line Leadership

- **Database Administration** majorly **MSSQL Server** and **SPOC** for Database service operations.
- Deep expertise and **mission-critical support** with on-call production monitoring.
- Leading incident response, root cause analysis, remediation efforts, partner with leadership, and participate in 24/7 on-call rotation.

SQL Server Installation, Upgradation and Migration, fix packs, cumulative updates and hotfixes & Administration

- Managed **SQL Server deployment** across **production, development, and test environments**, handling databases up to 2 TB.
- Managing service pack installations, hotfixes, and general system maintenance.
- Delivered comprehensive DBA support, including installation, configuration, monitoring, and troubleshooting.

High Availability, Disaster Recovery

- Architecting, implementing, and maintaining **disaster recovery (HA/DR) solutions** using Always ON, Failover Cluster, Replication, Database Mirroring, Log Shipping, backup/restore and Troubleshooting ensuring uninterrupted system performance.
- Designing and implementing backup and recovery strategies using native and third-party tools.

Performance Optimization and troubleshooting

- Partitioning strategies, index design and tuning for high-volume tables and query plan analysis.
- Conducted **SQL Server architecture analysis**, recommending process improvements for scalability
- Proactively review and address database performance and capacity trends.
- Investigate and resolve complex database-related issues, including data corruption, performance problems, and connectivity challenges.

Monitoring & Alerts

- Transaction log space monitoring, backup health alerts, DML auditing, extended events, audit specification setup

Security, Compliance & Operational Management

- Established **security protocols**, monitored backups, scheduled events, and proactively resolved database issues.
- Ensured **ISO & SOX audit success**, maintaining full database compliance.
- Managed **stakeholder relationships**, engaging with **clients, vendors, and leadership** for seamless operations.

Documentation, Automation & Escalation Handling

- Authored **runbooks** and worked on tools team to improve incident response times and reduce MTTR across mission-critical SQL environments
- **Led critical incident analysis, post-incident reviews and blameless RCA sessions**, ensuring timely resolution within defined SLAs, contributing to systemic improvements and stability aligned with **SRE principles**

Reliability & Resilience Achievements

- **Datadog, Azure Log Analytics and App Insights** to monitor blocking sessions, disk utilization, and long-running queries
- Established basic **observability pipelines** using Extended Events and Azure Monitor, surfacing slow queries and deadlocks as early reliability risks
- Monitoring SQL Server health using custom scripts and performance counters
- Currently expanding capabilities in Site Reliability Engineering (SRE), with focus on automation, observability, and reducing operational toil through proactive performance tuning and incident response frameworks.

DOMAIN

Health care Provider, US Group Life Insurance, US Group Property and Causality, Manufacturing, Supply Chain Management, CRM Warehouse Management

CORE COMPETENCIES

Cloud DBA	Database Administration	Team Management	IT Operations & Support
-----------	-------------------------	-----------------	-------------------------

CERTIFICATIONS

Microsoft Certified Professional | MS Azure Solution Architect | MS Azure Fabric Data Engineer | Professional Scrum Master | US Insurance – FLMI (LOMA 280, LOMA 290), AINS 21

TOOLS

- **Databases:** SQL Server 2022/2019/2016/2014/2012/2008R2&R2/2008/2005
- **CLOUD:** Microsoft Azure
- **DBA Monitoring and Observability:** IDERA, Data Dog | AppDynamics | Nagios 5.6 | ScienceLogic | Azure Monitor | Azure Log Analytics | Azure App Insights | Extended Events | Networker | ScienceLogic
- **Ticketing tools:** Service Now, JIRA
- **Languages:** T-SQL, Gold, C/AL, Python
- **ERP:** Microsoft Dynamics NAV 5.0 Trade & Inventory, Microsoft Dynamics NAV 5.0 Installation & Configuration, Navision 4.0 C/SIDE Solution Development, Navision 4.0 C/SIDE Introduction

PROFESSIONAL EXPERIENCE

KYNDRYL SOLUTIONS INDIA PVT LTD (EARLIER IBM-GTS), BENGALURU, INDIA

Bengaluru, IN May 2016 – Present

Lead DBA

- **Leading MSSQL / PostgreSQL Database team:** Directing the MS SQL team, creating and implementing technical, implementation, and back-out plans. Guided the team during SEV1 emergency calls, provided critical support to customers and administering mission-critical databases. Delivered on-call production support effectively.
- **Comprehensive DBA Support:** Led database teams, offering logical and core DBA support. Ensured efficient support and seamless database operations.
- **Database Compliance Specialist:** Acted as the SQL Compliance focal point, collaborating with account teams and directly working with customers. Achieved 100% compliance with Kyndryl / IBM standards and ISO audit requirements.
- **Strategic Planning and Execution:** Successfully planned and executed installations, upgrades, and patching of servers. Led disaster recovery activities and maintained compliance for the account.
- **Major Projects:** Spearheaded significant projects, including NetApp CDOT migration and data center failover activities, ensuring seamless transitions and minimal downtime.
- **Technical Documentation:** Authored comprehensive technical and operational documents to support team activities and maintain knowledge continuity.
- **Automated Server Builds:** Implemented automated server builds to optimize server provisioning times, ensuring efficient deployment processes.
- **Change Management:** Managed weekly change processes, assigning roles and responsibilities, and maintaining a master change calendar to ensure smooth operations.
- **Server Lifecycle Management:** Planned and executed server upgrades, patching, builds, commissioning, and decommissioning, ensuring continuous and efficient server operations

Mphasis Limited

Bengaluru, IN Oct 2006 – April 2016

Project Lead

- **Database Architect for BaaS:** Architected BaaS (Billing as a Service), an on-demand cloud-based billing automation solution, enabling carriers to reduce billing operation costs and improve customer satisfaction. Insurance Domain Expertise: Leveraged insurance domain knowledge and industry best practices to enhance project outcomes. Application DBA for MHYGEA: Served as the Application DBA for MHYGEA, a comprehensive web-based Hospital Management Information System (HIMS) encompassing all clinical, back-office, and support modules required in a hospital setting. clinical, back-office, and support modules required in a hospital setting.
- **HP Voltage Security Tool Implementation:** Developed and deployed secure SSIS pipelines integrated with HP Voltage for automated PII masking, enhancing data privacy compliance across UAT environments
- **Business Analyst Collaboration:** Engaged closely with Business Analysts to ensure all smoke tests and test cases were successfully cleared.
- **Technical Architect for Navi Poultry:** Acted as the Technical Architect for Navi Poultry, a specialized vertical solution for the poultry industry.

- **Business Requirements Analysis:** Interpreted business requirements from clients and Business Analysts, translating them into technical designs.
- **RFP and POC Management:** Managed RFP responses and proof of concepts (POC) as required.
- **Technical and Database Design:** Converted business requirements into detailed technical and database designs.
- **Business Process Flow Analysis:** Conducted comprehensive studies of business process flows and developed functional requirement documents.
- **GAP Analysis and Customization:** Performed GAP analysis by comparing standard ERP products with client requirements, identifying areas for customization and workarounds, and securing customer sign-off.
- **Functional Requirement Development:** Developed functional requirement and design documents for poultry-specific processes, integrating them with the standard NAV product.
- **Customization and User Acceptance Testing:** Oversaw customization development, testing, user acceptance, and user manual creation.
- **Implementation and User Training:** Led on-site implementations, involving key user and end-user training, extensive product knowledge transfer, testing with historical data, pilot runs, master data setup, and other preparatory activities for product rollout, go-live, and post-go-live support.

NEOGYN SOFTWARE CONSULTING PVT LTD.

Gurgaon, IN Nov 2003– Sept 2006

MS DYNAMICS NAV – TECHNICAL CONSULTANT

- **Techno-Functional Consultant and On-Site Coordinator:** Served as a Techno-Functional Consultant and On-Site Coordinator for a leading Mauritian pharmacy company, overseeing warehouse implementation projects.
- **Rapid Customization and Implementation:** Spearheaded the rapid customization and implementation of modules to meet specific customer requirements, ensuring efficient and timely solutions.
- **FEFO Feature Development:** Developed the First Expired, First Out (FEFO) feature in the warehouse module to enhance inventory management.
- **Upgrade Planning and Data Migration:** Planned system upgrades, identified gaps between versions, mapped data, and managed data migration for all open and closed transactions using reports and batches.
- **Field Access and Security Integration:** Developed a field access module and security matrix, integrating third-party tools such as UPS software and Starship with NAV modules.
- **Comprehensive Module Customization and Report Writing:** Customized modules based on specified requirements, engaging in extensive report writing, C/AL code development, table design, form/page creation, report generation, data port configuration, code unit development, enhancement, and application customization to meet client needs.

REYTECH COMPUTER SYSTEMS

Lucknow, IN March 2003 – Oct 2003

SQL SERVER DEVELOPER

- T-SQL development, writing stored procedures, View, functions Hospital management development product.

Mr. ALOK CHAUHAN (CONSULTANT, ZANOMED MEDIZINTEHNIK, GERMANY)

Lucknow, IN Aug 2002 – Feb 2003

NAVISION DEVELOPER

- Customized Sales & Receivables, Relationship Management and Purchase & Payables and developed feature to store future data record modifications to be activated on some future date and customized Change Log functionality to record log for first modification after a defined period to reduce excessive log generation for every record modification. Navision Attain Alternative address functionality was enhanced for Contact persons, to store multiple vacation addresses in advance.

REWARDS & RECOGNITIONS

- IBM Learning Champion 2020
- IBM Best Service Line – Team Award 2016
- Mphasis Best Performer 2007.
