<https://www.linkedin.com/in/pragya-sanjana-895644102/>

Modernization Specialist and Senior PL/SQL Developer with 7 years of experience in enterprise application development, legacy system transformation, and database architecture. Proven expertise in analyzing complex Mainframe COBOL systems and translating business-critical logic into scalable Oracle PL/SQL and .NET Core architectures.

Strong leadership experience in requirement gathering, impact analysis, task distribution, and cross-functional collaboration. I am skilled in data migration, system integrity validation, and performance optimization. Focused on delivering modernization initiatives that improve scalability, maintainability, and operational efficiency for large-scale enterprise systems.

CORE COMPETENCIES

- COBOL System Analysis
 - Oracle PL/SQL Development
 - Data Migration (DB2 to Oracle)
 - Requirement Gathering & Client Communication
 - Impact Analysis & Gap Analysis
 - Performance Tuning & Query Optimization
 - ETL & Data Warehousing
 - Agile & SDLC
 - Team Coordination & Code Review
 - Oracle Jobs & Scheduling
-

WORK EXPERIENCE

Accenture

Bengaluru

Oct 2023 – Present

Packaged App Development Specialist

- Converting complex logic into optimized PL/SQL packages, procedures, triggers, and functions while ensuring full functional equivalence and data integrity.
- Conducting requirement gathering sessions with clients and translating business needs into Technical Design Documents (TDD).
- Performing impact analysis and dependency mapping across legacy modules prior to modernization.
- Coordinating and distributing tasks across development teams; reviewing code for quality, performance, and adherence to standards.
- Supporting data migration activities from DB2/Mainframe environments to Oracle.
- Collaborating closely with .NET Core teams to ensure seamless database integration.

Packaged App Development Senior Analyst

- Delivered multiple data-intensive enterprise projects as Senior Database Developer.
- Designed scalable database solutions using PL/SQL including tables, triggers, views, procedures, packages, materialized views, and DB links.
- Improved query performance by 25–30% through indexing strategies, SQL tuning, and bulk processing techniques.
- Optimized Informatica workflows by eliminating redundant data dependencies and replacing staging mechanisms with efficient PL/SQL-based solutions.
- Managed Oracle Jobs including scheduling, monitoring, and performance tracking.
- Led cross-platform data mapping between DB2 and Oracle systems using standardized mapping frameworks.
- Mentored junior developers and reduced code review turnaround time by 20%.

- Contributed to complete SDLC lifecycle including analysis, development, testing, deployment, and production support.

NAV Backoffice IT Solutions

Jaipur, India
Jul 2019 – Jan 2021

Software Engineer

Designed and implemented database architecture and security frameworks.

- Reduced stored procedure execution time by 80% through advanced performance tuning.
- Minimized index fragmentation to below 10% through structured maintenance strategies.
- Developed SSRS reports and supported production monitoring to prevent deadlocks and performance bottlenecks.
- Implemented AES encryption mechanisms for securing client data.
- Mentored junior engineers and conducted code reviews.

Nagarro Software

Gurugram, India
May 2016 – Jul 2019

Associate, Technology

- Developed ETL processes and data warehouse solutions.
- Designed SSIS packages and automated deployment pipelines.
- Built SSRS reports using complex datasets and queries.
- Managed SQL Server backups, restores, and monitoring.

Junior Associate, Technology

- Contributed to migration of SPC application to cloud-based architecture.
- Developed APIs using ASP.NET MVC.
- Worked with Backbone.js, WinForms, and unit testing frameworks.
- Automated build and deployment using Jenkins and GitHub.

EDUCATION

Poornima College of Engineering, Jaipur - Bachelor of Technology, Computer Science and Engineering May 2016

TECHNICAL SKILLS

- Databases: Oracle, SQL Server, MySQL
 - Languages: PL/SQL, SQL, COBOL (Analysis), C#, .NET Core
 - ETL Tools: Informatica, SSIS
 - Reporting: SSRS
 - Tools: Toad, Oracle SQL Developer, Visual Studio, SSMS, Jenkins, Jira, TFS
 - Concepts: Data Migration, Performance Tuning, Modernization, SDLC, Agile
-
