WORK HISTORY

Amdocs - Pune

Business Analyst, 04/2021 to 09/2021

System Analyst, 02/2020 to 04/2021

Amdocs provides various Telecom related products like ABP(Amdocs Billing Product), CRM(Customer Relationship Mgmt), OMS(Order Management System) etc. This was data migration project to migrate client's(Globe Telecom) data from legacy system to Amdocs server, which is further used for the products.

Responsibilities:

- Gather requirements from Business Owner & Business Users for the data scope
- Do impact analysis and come up with technical approach to implement the requirement from the users
- Design ETL pipeline using Informatica Tool, PLSQL scripts to load data from legacy systems to Amdocs database
- Design and develop python script for reconciling data at different stages of migration
- Automating manual data quality checks and generating well formatted reports for Business users in better decision making
- Troubleshooting defects and handling bug fixing activity reported by users during migration and make permanent fixes in code.

Tata Consultancy Services - Pune

System Engineer, 09/2016 to 01/2020

Worked on Data Warehousing project for Banking & Finance Client. The FX Data Warehouse is used primarily in the Sales Revenue Reporting division of Morgan Stanley. Both Data Warehouse supports more than 600 business users. Responsibilities:

- Design ETL processes using Informatica Tool to load data from different Sources to Targets using different transformations
- Support and manage enhancements for the Reporting applications using ETL tools, DB2, Greenplum, Perl etc
- The reports are enhanced and developed in BOXI and GUIs like Adhoc, Score, Coverage (internal tools)
- Worked on all stages of SDLC lifecycle from requirement gathering till maintenance
- Experience with migration and testing of data loading from DB2 to Greenplum
- Automate process to reduce manual efforts improving productivity and chances of human errors
