ganeshbharathispgc2026@gmail.com
Date of birth - 26/07/1998

PROFESSIONAL SUMMARY

Senior Software Developer with 5.5 years of experience in analyzing, programming, developing and delivering the solutions using Angular, C# .Net Core technologies. Passionate about leading teams, improving software performance, and delivering high-quality solutions that drive business success.

TECHNICAL SKILLS

Angular	C# .Net Core
TypeScript	ASP.NET Core MVC,
JavaScript,	ASP.NET Core Web API,
HTML, CSS,	Entity Framework,
Bootstrap	MS SQL

PROFESSIONAL EXPERIENCE

Senior Software Developer - HTC Global Service, July 2025 - Present
Client - Societe Generale, Bengaluru

Project - ALDAutomotive (Ayvens)

- Worked on enterprise fleet management and vehicle leasing solutions for ALD Automotive (Ayvens), a global mobility and fleet services provider. Contributed to the development and maintenance of applications supporting vehicle leasing, fleet operations, contract management, and customer services. Enhanced system performance, integrated APIs, and implemented business features to streamline fleet lifecycle management and improve user experience.

Roles & Responsibilities

- Designed & maintained full stack applications using Angular, C#, & ASP.NET Core.
- Designed and implemented RESTful APIs for seamless API interaction.
- Worked on implementation of HangFire for the WebService and tracking of those with the HangFire dashboard.
- Created many Angular controls & components which helped to reduce code redundancy.
- Integrated form validations, dynamic routing, and real-time data rendering to front-end with Angular and TypeScript.
- Implemented Lazy Loading and code optimization enhance application performance and reduce page load times.
- Having work experience in both Waterfall & Agile methodologies.
- Worked with Entity Framework Core and SQL server for database design.
- Implemented background job processing using HangFire for scheduled and recurring tasks.
- Participated in code reviews, debugging performance tuning, and production activities.
- Contributed to application security, authentication, authorization and role-based access control implementation.

Project - WGS Launchpad

- Launchpad platform is a borrower/banker portal. Using Launchpad, borrowers are actively engaged in the originating Loans, and processing Credit cards applications based on US & Canadian banking process.

Roles & Responsibilities

- Designed, developed & maintained scalable applications using Angular, C#, ASP.NET Core, & Entity Framework.
- Developed reusable UI components that helps in reducing the code redundancy using Lazy loading techniques.
- Worked on Credit card domain and various functionalities across the product.
- Created many reusable Angular controls & components which helped to reduce code redundancy.
- Integrated form validations, dynamic routing, and real-time data rendering to front-end with Angular and TypeScript.
- Experienced in creating RESTful APIs & integrated into Angular to process the data in Client side application for seamless API interaction.
- Having work experience in both Waterfall & Agile methodologies.
- Worked with DevOps team to understand automation of application build, test, and deployment processes using CI/CD pipelines in Azure cloud.
- Managed source code versioning using Git, GitHub technologies and followed branching strategies using Azure DevOps.

EDUCATION

Bachelor of Engineering - ECE

- Sri Eshwar College of Engineering and Technology

CGPA - 7.79 / 10

Higher Secondary School

- St. Anne’s Higher Secondary School, Kaniyakumari

June 2015 - April 2016

Percentage - 91%

Secondary School

- Government High School, Kaniyakumari

June 2013 - April 2014

Percentage - 97%

TOOLS USED

- Visual Studio IDE 2019, & 2022
- Visual Studio Code IDE
- Postman & SOAP UI (API local testing)
- SSMS (SQL Server)

ACHIEVEMENTS

- Bright Beginner Award
- Spot Awards (twice)
- Teamwork Award
