

HARISH NAIK

Software Developer | .NET Core | Microservices | Azure
8105254358 | hnaik814@gmail.com | Bengaluru, Karnataka | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Developer with 5 years of experience building scalable backend systems using .NET Core, Microservices, and Microsoft Azure. Skilled in designing RESTful Web APIs, implementing event-driven architectures with RabbitMQ, and optimizing SQL Server performance. Effective collaborator in Agile/Scrum teams with a strong focus on writing clean, maintainable code.

SKILLS

Backend: .NET Core, ASP.NET MVC, Web API, C#, Entity Framework, LINQ

Architecture: Microservices, RESTful APIs, Event-Driven Architecture, RabbitMQ

Cloud & Database: Microsoft Azure, SQL Server, AWS Elastic Beanstalk

Methodology: Agile / Scrum

WORK EXPERIENCE

Paybooks – A TransPerfect Company | June 2025 – Present

Software Developer

- Architected and delivered microservices using .NET Core Web API with RabbitMQ, enabling asynchronous event-driven communication across distributed systems and reducing inter-service coupling.
- Streamlined SQL Server query performance by rewriting complex stored procedures and adding targeted indexes, cutting average execution time significantly.
- Collaborated cross-functionally in Agile sprint ceremonies — planning, code reviews, and retrospectives — consistently shipping features within sprint deadlines.

Herman Miller (MillerKnoll) | Aug 2023 – May 2025

Associate Application Developer

- development and maintenance of enterprise-grade ASP.NET MVC and .NET Core applications supporting global manufacturing and supply chain operations.
- Tailored SyteLine 8 ERP modules to align with business-specific workflows, eliminating manual processing steps and reducing operational overhead.
- Revamped SQL Server query structures and improving database throughput for high-volume transactional datasets.
- Provisioned and managed application deployments on AWS Elastic Beanstalk, ensuring high availability, zero-downtime releases.
- Produced custom business intelligence reports using Crystal Reports, equipping stakeholders with actionable, data-driven insights.

Rstack Solutions Pvt Ltd | Jul 2021 – May 2023

A2 Engineer

- Constructed RESTful APIs in C# and .NET Core encompassing business logic, input validation, and seamless third-party service integrations.
- Leveraged Entity Framework Core and LINQ to implement efficient SQL Server data access layers, reducing data retrieval latency.
- Crafted responsive UI components using HTML5, CSS3, and jQuery in close partnership with UX designers and product owners.

KEY PROJECTS

Document Management Service (DMS) |

Tech Stack: .NET Core Web API, Azure Blob Storage, AES Encryption

- Implemented a secure microservice for document upload, storage, and retrieval using Azure Blob Storage with AES-256 encryption.
- Established dynamic folder structures keyed by User ID and Use Case; provisioned time-limited SAS URLs for fine-grained access control.
- Introduced an automated background clean-up job to purge files exceeding 30 days, reducing storage costs and maintaining compliance.

Notification Engine |

Tech Stack: .NET Core Background Service, SMTP, Factory Design Pattern

- Conceived and launched a background notification service polling every 60 seconds to dispatch Email and SMS alerts reliably at scale.
- Applied Factory Design Pattern to extend notification channels dynamically without modifying core business logic (Open/Closed Principle).
- Wired SMTP integration with structured error handling and logging, achieving consistent delivery and traceability across all notification types.

Event Management Service (EMS) |

Tech Stack: .NET Core, RabbitMQ, Microservices

- Formulated a dedicated microservice to ingest system-generated events, sanitize sensitive fields, and publish normalized payloads to RabbitMQ.
- Fostered loose coupling and horizontal scalability across the platform by adopting a message-driven, event-sourcing communication model.

EDUCATION

Malnad College of Engineering, Hassan | 2015 – 2019

Bachelor of Engineering (B.E.)

CERTIFICATION

Backend Development for .NET Full Stack — Coursera | [Backend Development for .Net Full Stack](#)
