

KOTHOLLA VAMSI KRISHNA

Software Engineer | Full Stack .NET Developer | Angular Developer

+91 89196 11680 | reddyvk1999@gmail.com | <https://www.linkedin.com/in/vamsikrishnaKotholla/>

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in the gaming domain at Light & Wonder, building secure and scalable applications using .NET, REST APIs, Angular, and SQL Server. Strong expertise in API design, authentication workflows, unit testing, and automation tools. Experienced in handling client calls, production incidents, and cross-functional collaboration within a 6-member agile team. Delivered solutions that improved casino operations, including automation that reduced jackpot processing time.

PROFESSIONAL EXPERIENCE

Light & Wonder (L&W) – Software Engineer || Bengaluru, India || Feb 2022 – Present

- Designed and maintained secure REST APIs using .NET Core and SQL Server for casino gaming platforms.
- Implemented token-based authentication workflow for Angular customer application to securely fetch jackpot details.
- Developed auto-import engine to process Excel files from UI, validate data, and create multiple gaming links with EGM assignments.
- Worked in a 6-member agile team, collaborating with QA, UI, SCM team and casino clients via Jira.
- Participated in client calls, production bridge calls, and hotfix deployments.
- Added unit tests for critical payout and configuration modules.
- Optimized SQL procedures for jackpot reconciliation and reporting.

Key Projects:

BEPS – Gaming Management Application

- Designed and enhanced APIs supporting slot management, progressive jackpots, and payout reporting.
- Built complex SQL procedures for real-time reconciliation and compliance reports.
- Added unit test coverage for high-risk financial workflows.
- Supported UAT and production releases for multiple casino sites.

Jackpot Notification System (Solo Project)

- Designed automated email trigger immediately after jackpot events
- Reduced manual processing time from ~6 hours to ~30 minutes.
- Implemented logging, retries, and failure handling in .NET services.

Customer Jackpot Acknowledgement Application

- Implemented token-based access mechanism in Angular application:
 - Client receives a unique token when browsing the link
 - Token is validated via .NET API
 - System retrieves and displays only the corresponding jackpot details
- Ensured secure data access and prevented unauthorized viewing of jackpot information.
- Integrated frontend with backend APIs for real-time data retrieval.

Auto Import & Link Creation Tool (.NET)

- Built feature to upload Excel from UI, validate structure and business rules.
- API layer performs:
 - Data validation & duplicate checks
 - Creation of multiple gaming links
 - Automatic EGM assignment based on input mapping
- Eliminated manual configuration effort and reduced setup errors.

Automation & Deployment Tools

- Created PowerShell silent installers and configuration automation.
- Reduced manual deployment effort across casino sites.

EDUCATION

B.Tech – 2021

Rajeev Gandhi Memorial College of Engineering & Technology, Kurnool

TECHNICAL SKILLS

- **Backend:** C#, ASP.NET, .NET Core, REST APIs
- **Frontend:** Angular, HTML, CSS
- **Database:** SQL Server, Query Optimization, Reporting
- **Testing:** Unit Testing
- **Tools:** Jira, Git, Debugging & Logs
- **Automation:** PowerShell
- **Architecture:** MVVM, MVC, Layered Architecture
- **Languages:** C#, Python

KEY STRENGTHS

- Backend API design & secure authentication workflows
- UI development using Angular with end-to-end API integration
- Production ownership & debugging in live environments
- Strong SQL and business logic implementation
- Automation-driven mindset to reduce manual effort
- Client interaction & cross-functional collaboration
