PROFESSIONAL SUMMARY

Senior Full Stack .NET Engineer with 5 years of experience building enterprise-grade GRC and Insurance platforms. Proven record of designing production-grade distributed systems on AWS (Lambda, SQS, DLQ, API Gateway, Secrets Manager, CloudWatch) and delivering end-to-end features across React and .NET Core microservices. Recognized with a **Spot Award** for sole-architecting a Video Captions Processing System serving 5,000+ enterprise clients at <1% error rate. Active practitioner of Generative AI tooling (GitHub Copilot, Cursor, ChatGPT) — led team AI adoption, increasing active usage by 70%. Top 10 HackFest finalist for building an LLM-powered policy chatbot. Seeking Senior Software Engineer / Tech Lead roles in product-first engineering teams.

TECHNICAL SKILLS

Backend: C#, .NET Core 6/7/8, ASP.NET Web API, MVC, Microservices, REST API, Entity Framework Core, LINQ, xUnit

Frontend: ReactJS, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material UI, Bootstrap

Databases: SQL Server, T-SQL, Stored Procedures, Query Optimization, Indexing Strategies, MongoDB

Cloud & AWS: Lambda, SQS, DLQ, API Gateway, Step Functions, CloudWatch, Secrets Manager, IAM, S3, EC2

Architecture: Event-Driven Architecture, Serverless, Repository Pattern, Dependency Injection, SOLID Principles

AI & Tooling: GitHub Copilot, Cursor, ChatGPT, LangChain, FastAPI, Milvus, Docker, CI/CD, GitHub, Jira, Postman

PROFESSIONAL EXPERIENCE

Software Engineer II - Full Stack | Diligent Corporation

Oct 2024 – Present

Domain: GRC SaaS | Product: Enterprise Platforms | Client Base: 5,000+ Global Enterprises

- **Spot Award - Engineering Director & Product Manager:** Sole-architected a production **Video Captions Processing System** — distributed, event-driven pipeline using AWS Lambda (C#), SQS, DLQ, API Gateway, CloudWatch & Secrets Manager; CRON-triggered, multi-tenant, processing 100–200 messages/min with a 6-stage retry strategy (3 main queue + 3 DLQ) and <1% error rate.
- Architected and enhanced enterprise GRC platforms using **React & .NET Core Web API** with JWT/OAuth authentication, role-based authorization, and a resilient microservices architecture enforcing high compliance and security standards.
- Engineered modular, reusable React component libraries with Redux state management, accelerating feature delivery velocity across multiple product squads.
- **HackFest Top 10 / 35+ Teams:** Built **PoliBot** - LLM-powered internal policy Q&A chatbot using FastAPI, LangChain, Milvus, and React.
- **AI Adoption Lead:** Drove team Generative AI adoption through internal sessions on Cursor, GitHub Copilot, and LLM model selection - increasing active AI usage by **+70%** and reducing idle users by 44%.
- **II Place - Bug Bash Campaign:** Resolved critical P1 production defects under competitive time constraints.

Software Engineer - Full Stack | Cognizant Technology Solutions

Aug 2021 – Sep 2024

Domain: US Insurance | Client: Travelers (USA) | 3+ Years, Full-time

- Architected and deployed a scalable **Insurance Domain SPA** using ReactJS, Redux, .NET Core Web API, SQL Server, and MongoDB - designed full database schema and business workflow data models for US insurance processing.
- Orchestrated serverless cloud backend on AWS using **Lambda, API Gateway, and Step Functions** - built a highly available, auto-scaling architecture handling insurance event workflows.

- Optimized SQL performance via advanced LINQ queries and indexed stored procedures — reducing query latency on high-volume insurance datasets.
- Enforced SOLID principles, Repository Pattern, and Dependency Injection throughout codebase; delivered comprehensive xUnit test coverage and led rigorous peer code reviews.
- Built centralized exception handling and authorization middleware, strengthening API security and observability across all service layers.

Software Engineer Intern | Cognizant Technology Solution

Apr 2021 – Jul 2021

Domain: Training & Development | Stack: React, .NET Core, SQL Server | Duration: 5 months

- Successfully completed intensive training in ReactJS, .NET Core, SQL Server, and modern software development practices.
- Independently built a React & .NET-based Electricity Management System as final project, demonstrating end-to-end development skills. Applied object-oriented programming principles and REST API development concepts to create a fully functional web application.
- Demonstrated strong problem-solving abilities and technical aptitude, leading to successful transition into a full-time development role.

Software Engineer Intern | Rooster Technologies

Aug 2020 – Jan 2021

Domain: Logistics | Stack: React

- Built a cargo shipment monitoring application using React with modular, reusable component architecture; collaborated with senior developers on new features, defect resolution, and performance improvements.

AWARDS & RECOGNITION

- **Spot Award - Engineering Director & Product Manager, Diligent Corporation** | Sole-architected Video Captions Processing System serving 5,000+ enterprise clients.
- **II Place - Bug Bash Campaign, Diligent Corporation** | Resolved critical production defects under competitive time constraints.
- **Top 10 / 35+ Teams - HackFest, Diligent Corporation** | PoliBot: LLM policy Q&A chatbot using LangChain, FastAPI & Milvus.
- **Management Recognition - Diligent Corporation** | Acknowledged for end-to-end ownership, stakeholder communication, and never-say-no mindset.

KEY PROJECTS

Video Captions Processing System - Diligent Corporation (Production)

- Distributed AWS event-driven pipeline: Lambda (C#) + SQS + DLQ + API Gateway + CloudWatch + Secrets Manager. CRON-triggered, multi-tenant, 100–200 msg/min throughput, 6-stage retry, <1% error rate. YouTube API integration for caption ingestion across 5,000+ enterprise customer environments.

PoliBot - LLM Policy Q&A Chatbot - HackFest Top 10 (Diligent Corporation)

- LLM-powered internal policy assistant built with FastAPI, LangChain, Milvus (vector DB), and React. Selected Top 10 of 35+ competing teams at company-wide HackFest — enabling instant natural language Q&A over company policy documents.

EDUCATION

B.E. Computer Science & Engineering - Kongu Engineering College, Erode

GPA: 8.21 | 2017 – 2021
