

Shaik Ajeej Basha

.NET & Azure Developer | API & Microservices

Bangalore, Karnataka | +91 6304020358 | ajeejdev07@gmail.com

Professional Summary

NET & Azure Developer with **5+ years of experience** in building enterprise applications using **ASP.NET Core, .NET 8, Web API, Microservices, SQL Server, and Microsoft Azure**. Skilled in designing **secure, scalable APIs**, cloud-native integrations, and performance optimization. Proven success delivering solutions for **Microsoft** and **Dell Technologies**. Strong in Agile collaboration, problem solving, and backend system development.

Technical Skills

Backend: C#, .NET 8, ASP.NET Core, Web API, REST APIs, Microservices, Entity Framework Core, LINQ

Cloud: Microsoft Azure, Azure Functions, APIM, Key Vault, Blob Storage, Managed Identity, App Services, Azure Monitor

Database: SQL Server, Stored Procedures, Query Optimization

DevOps & Tools: Azure DevOps, Git, Splunk, SonarQube, Swagger/OpenAPI, JIRA

Methodologies: Agile Scrum, SDLC, CI/CD

Professional Experience

Senior Software Engineer

Pyramid IT Consulting Pvt. Ltd. | Mar 2026 – Present Client: Microsoft | Project: New Hire Device Onboarding Platform

- Designed and developed **enterprise-grade REST APIs** using ASP.NET Core and .NET 8.
- Built **Azure Functions** for workflow automation and system integrations.
- Configured **APIM** for API security, routing, and monitoring.
- Implemented **Managed Identity, Key Vault, and Blob Storage** for secure data handling.
- Delivered APIs for **candidate eligibility, device ordering, and order tracking workflows**.
- Participated in **Agile ceremonies** and collaborated with stakeholders.
- Wrote **unit/integration tests** and ensured CI/CD compliance.
- Provided **production support** and resolved critical issues under tight deadlines.
- Created **technical documentation** for API usage and integration guidelines.
- Coordinated with cross-functional teams to ensure smooth delivery and deployment.

Senior Software Engineer

UST Global | Apr 2024 – December 2025 Client: Dell Technologies | Project: Telemetry Management

- Developed **ASP.NET Core Web APIs and Microservices** for telemetry data processing.
- Integrated **Azure services** with **Splunk monitoring** for real-time insights.
- Optimized performance of telemetry pipelines, reducing latency by 30%.
- Documented **API specifications** using Swagger.
- Mentored junior developers on **best practices in API design and Azure integration**.
- Collaborated with QA teams to ensure **end-to-end testing and validation**.
- Provided **production support** for mission-critical systems.
- Conducted **code reviews** to maintain coding standards and improve quality.
- Supported **deployment pipelines** and monitored system health post-release.

Software Engineer

Quest Global Engineering Pvt. Ltd. | Dec 2021 – Nov 2023 Project: Hospital Billing & Medical Sales Management System

- Developed **ASP.NET Web APIs** and SQL Server components for billing workflows.
- Implemented **business validations and backend services** to ensure data integrity.
- Wrote **stored procedures and optimized queries** for better performance.
- Collaborated with stakeholders for **requirement analysis and enhancements**.
- Supported **deployment activities** and participated in bug fixing.
- Contributed to **documentation and knowledge transfer sessions**.
- Assisted in **database design** and applied constraints for consistency.
- Participated in **UAT support** and provided fixes for reported issues.

Junior Software Engineer

Multiapps Technologies | Oct 2020 – Dec 2021 Project: Capture Tool (Internal)

- Developed backend modules using **ASP.NET Core Web API** and SQL Server.
- Resolved production issues and enhanced application functionality.
- Participated in **deployment, version control, and release management**.
- Conducted **unit testing and debugging** to improve system stability.
- Assisted in **requirement gathering and technical documentation**.
- Supported **database optimization** through efficient stored procedures.
- Collaborated with senior developers to learn and apply best practices.

Education

Bachelor of Science (B.Sc.) – Computer Science
Sri Harshini Degree College, Ongole | 2015

Key Strengths

- Web API Development
- Azure Cloud Development
- Microservices Architecture
- Performance Optimization
- Problem Solving
- Agile Collaboration
