CAREER OBJECTIVE

To be a part of a progressive organization that gives scope to enhance my knowledge and skills, which can be used for organizational and personal growth, and contribute to the organization's success.

TECHNICAL SKILLS

- **Operating Systems:** Windows 2008/2010 NT 4.x/9x, MS-DOS, MacOS
- **Development Tools:** Visual Studio, Visual Studio Code, Postman, JMeter, Ready API, Swagger
- **Programming Languages:** C#, .NET, JavaScript, TypeScript
- **Database:** SQL Server, MS SQL, Entity Framework, ADO.NET
- **Frontend Technologies:** HTML, JavaScript, Bootstrap, Angular, React.js, Next.js, Bootstrap, Micro Frontend
- **Backend Technologies:** .NET Core, MVC, ASP.NET, Web API, Microservice, Middleware, Background Services
- **Cloud Platforms:** Azure (Azure Functions, Azure SQL, App Services, Azure Key Vault, Azure Storage, Azure DevOps)
- **Middle Tier:** Internet Information Server, ADO.NET, Entity Framework
- **Integration & Automation Testing:** JMeter, Ready API
- **Security & Encryption:** Hashi Corp Vault
- **DevOps:** GitHub, Docker

WORK & EXPERIENCE

• Engineer - Product and Platform Engineering

Altimetrik (SDE4 at WEX)

[May, 2025 – Present]

- Contributed to designing and developing a new Key Management and Encryption Service (KMS) product, building secure encryption, decryption, and centralized key-management capabilities from the ground up.
- Implemented Vault-based key handling workflows, integrating secure secret retrieval, access policies, and compliance-aligned key-lifecycle processes into the product architecture.
- Performed unit testing, code reviews, debugging, and multi-environment validation to ensure high code quality, stable releases, and consistent performance during product development

• Encryption Library

- Developed a reusable Encryption Library to standardize encryption/decryption operations across microservices.
- Implemented secure key handling, Vault-based integrations, and application-level encryption to ensure consistent data protection across all services.
- Added caching, logging standards, and configurable encryption providers for improved performance and flexibility.

• Key Management Service (KMS)

- Built a centralized Key Management Service enabling secure encryption, decryption, key generation, and automated key rotation for partner and customer data.
- Integrated deeply with Hashi Corp Vault to ensure compliance-driven secret and key lifecycle management.
- Developed both backend APIs and a KMS Frontend Tool (UI built in Angular) to help internal teams securely test, monitor, and validate encryption workflows
- Ensured seamless integration with existing microservices through Vault-based security architecture and environment-aware configuration

• Technology & Tools Used

- **Application Framework and Language:** .NET core, API, C#, Angular, Hashi vault, Ready Api, JMeter, JFrog, Azure
- **Database Server:** SQL SERVER

- **Software Engineer**

Nest Digital (Consultant for Dubai Islamic Bank)

[Feb 2024 – May, 2025]

- Worked on new features for the UAE Central Bank's platform to enable secure and efficient interbank transactions.
- Acted as a consultant to ensure smooth platform integration and functionality alignment with bank requirements.
- Conducted unit testing and code reviews to uphold solution quality.

- **Fund Transfer System (FTS):**

- This project facilitates the transfer of funds between banks and other financial institutions in the UAE through their accounts held with the Central Bank. It ensures secure, efficient, and seamless transactions across institutions, adhering to compliance and regulatory requirements.

- **Technology & Tools Used**

- **Application Framework and Language:** ASP.NET, .NET Core, MVC, API, C#, Angular, Azure
- **Database Server:** SQLSERVER

- **Software Developer**

National Informatics Center (NIC)

[July, 2022 – Feb, 2024]

- Worked on the Direct Benefit Transfer (DBT) platform for Karnataka, facilitating beneficiary payments for government schemes.
- Collaborated on implementing Web API and database features in a 3-tier architecture.
- Resolved issues, enhanced database and API performance.

- **Direct Beneficiary Transfer (DBT):**

- Government of Karnataka has set up a unified Direct Benefit Transfer Platform. All beneficiary-oriented schemes of the Government are being handled through this platform. The payment to the beneficiary is made through this system.

- **Directorate of Social Security and Pension (DSSP):**

- The Government of Karnataka has established a unified platform under the Directorate of Social Security and Pensions (DSSP) to manage all pension-related and social security schemes.

- **Technology & Tools Used**

- **Application Framework and Language** – ASP.NET, .NET CORE, Web API, Angular, React.js
- **Database Server** – SQL SERVER

- **Software Developer Trainee**

Intellirose pvt.Ltd & Abacus system Pvt.Ltd

[Dec 2022 – Jun 2022]

- Contributed to the Goods Management System (Intellirose) by enhancing transport tracking, reporting, and customization features, and developed the E-Grievance System (Abacus) for the Panchayat Raj to streamline grievance resolution processes

- **E-Grievance:**

- Grievance Cell of Panchayat Raj is a centralized procurement, distribution, and management information system, which seeks to automate and overcome the challenges of the current procurement system, reduce duplication of efforts and accumulation and wastage of time and increase the efficiency of the entire grievance solving process of any given organization.

- **Goods Management System:**

- Goods Management System for Transport is a Web-based Technology. Using this Technology the user can customize the transport, tracking, and creating reports. The main job of transport is to provide transport services to the consigner and consignee.

- **Technology & Tools Used**

- **Application Framework and Language** – ASP.NET MVC, .NET CORE, Web API, React.js
- **Database Server** – SQL SERVER

PROFESSIONAL SUMMARY & SKILLS

- An astute performer with relevant experience as a Software Developer in Software and Web Development specializing in C#.
- Involved in coding, development, integration, automation, and unit testing activities, including understanding requirements, design, and implementation.
- Experience in developing 3-tier and microservices architecture-based projects, including secure API development and distributed systems.
- Strong implementation of knowledge of C#, MVC 5, ASP.NET, .NET Core, LINQ, EntityFramework, ADO.NET, and other backend technologies.
- Experienced working with Stored Procedures, Views, SQL Server 2008–2014, and database optimization.
- Knowledge of Internet technologies like HTML, CSS, JavaScript, jQuery, Bootstrap, and modern UI frameworks.
- Strong implementation of knowledge of Web API, API versioning, API security, and middleware development.
- Hands-on implementation knowledge of Angular, React.js, and Next.js for front-end development and Micro Frontend architecture.
- Experienced in Hashi Corp Vault (encryption/decryption), secure key management, partner key handling, and transit engine workflows.
- Practical exposure to load and integration testing using JMeter, ReadyAPI, and Postman, including automation of API workflows and property transfers.
- Implementation knowledge of Azure cloud-based solutions and services such as Azure Functions, Azure DevOps, Azure SQL, App Services, Azure Key Vault, and CI/CD Pipelines.

CERTIFICATIONS

- **_Completed: (DATA SCIENCE, TABLEAU, MACHINE LEARNING) Training from 360 DigiT MG, Bengaluru.**

EDUCATION

- B. Tech- Completed B. Tech in Computer Science Engineering from Raajdhani Engineering College in 2022 with an aggregate of CGPA of 8.51.
- +2 SCIENCE from Jupiter +2 Science College, Bhubaneswar in 2018 with a percentage of 58% from the CHSE Board.
- 10th from Sri Aurobindo int. educ. Centre, Matrubihar, Kalupadaghat in 2016 with a percentage of 72% from the BSE Board.

PERSONAL STRENGTH

- Ability to cope with different situations.
- Adaptable.
- Quick learner of new things and hardworking and enthusiastic.
- Co-operative with others at work and the ability to deal with people diplomatically.
