Location: Kolkata, India (Open to Relocation)

Professional Summary

.NET Core Full Stack Developer with 3.10+ years of experience building and maintaining enterprise web applications using ASP.NET Core, C#, Angular, and SQL Server. Experienced in developing RESTful and GraphQL APIs, implementing clean architecture patterns, and designing scalable multi-tenant systems. Hands-on experience with Azure deployments, CI/CD pipelines, and security integrated development workflows. Comfortable working in Agile teams and contributing to reliable, production grade systems.

Technical Skills

Languages: C#, C++, SQL, TypeScript, JavaScript
Frontend: Angular(v15 - v20), NgRx, HTML5, CSS3, SCSS
Backend: .NET Core Web API, REST, GraphQL, CQRS, Repository Pattern, EF Core
Architecture: OOPS, SOLID, Clean Architecture, Microservices, Multi-Tenant Design
DevOps & Tools: Git, Azure DevOps, GitHub Actions, SonarQube, Mend, Checkmarx, CI/CD
Cloud: Azure (Container Apps, Functions, Insights, Feature Manager)
Testing: xUnit, Karma
Databases: SQL Server, MySQL

Professional Experience

EY GDS | Assistant Manager

.NET Core Full Stack Developer

August 2022 – Present

- Contributed to a large-scale enterprise tax platform serving corporate clients with secure multi-tenant architecture.
- Designed and implemented RESTful and GraphQL APIs (Queries and Mutations) using ASP.NET Core following CQRS and clean architecture principles.
- Developed scalable Angular applications with NgRx state management and built responsive enterprise UI components using Kendo UI and Bootstrap.
- Designed optimized database schemas and improved SQL query performance for multi-tenant workloads.
- Implemented CI/CD pipelines using GitHub Actions and Azure DevOps with integrated code quality and security scanning tools.
- Deployed and maintained containerized applications on Azure Container Apps and Azure Functions, ensuring stable production releases and operational monitoring.
- Contributed 1300+ commits across several repositories, actively participating in feature development, debugging, and performance improvements.

Projects

- AI-Based Workplace Performance Prediction (Azure ML) :** Built and evaluated 26 regression models using Azure ML, deployed the best performing model as a REST endpoint via Azure Container Instances and designed a basic MLOps workflow. .
- Employee & Project Management System :** Developed full-stack system using Angular, NgRx, ASP.NET Core Web API, and MySQL following clean architecture principles.

Education

B.Tech – Amity University, Jharkhand
CGPA: 8.75/10

2018 – 2022

Achievements

- Solved 500+ Data Structures and Algorithms problems across online/offline platforms.
- Knight at Leetcode
