PROFESSIONAL SUMMARY

Security professional specializing in cybersecurity governance and compliance, with hands-on experience supporting large, regulated environments. Proven ability to work collaboratively with delivery, risk and policy teams to strengthen security posture, ensure adherence to controls, and drive timely remediation of identified gaps. Proven expertise in ISO 27001, audit management, vulnerability governance and security metrics reporting. Strong track record of improving compliance posture, reducing audit findings and enabling data-driven decision making through Power BI dashboards. Known for a proactive mindset, strong attention to detail, and a genuine willingness to learn new technologies, frameworks and processes. Consistently focused on delivering positive, practical outcomes that balance security requirements with business needs.

EDUCATION

Bachelor of Science, Computer Science

St. Joseph's Degree College, Rayalaseema University,
Kurnool, Andhra Pradesh
January 2019

- **Relevant coursework:**
Mathematics, Statistics, Computer Science
- **GPA:** 9.1

PERSONAL DETAILS

Date of Birth: 05/10/1998

LANGUAGES

English

Advanced (C1)

Hindi

Upper intermediate (B2)

TECHNICAL SKILLS

Compliance Frameworks & Standards : ISO 27001 | NIST Cybersecurity Framework (CSF) | CIS Benchmarks | Security Governance Frameworks | Information Security Policies & Standards

Security Tools : Qualys | CMDB Management | ServiceNow | Microsoft Defender Vulnerability Management | Microsoft Defender Security Recommendations

Data & Reporting : Power BI | Microsoft Excel

Security Operations : Vulnerability Management, Incident and Change Management

Cloud & Infrastructure Security : AWS Cloud | Microsoft Azure | Windows Server | Linux | VMware ESXi | Identity & Access Management (IAM)

Security Operations & Monitoring : Incident Management | Change Management | Security Operations Support | Security Metrics Reporting | Security Incident Coordination | Threat Intelligence Concepts | Endpoint Security Concepts

Scripting : Python

Vulnerability Management & Security Assurance : Vulnerability Management | Vulnerability Governance | Vulnerability Remediation Tracking | Security Health Checks | Risk-Based Vulnerability Prioritization | Security Exception Management | Security Control Validation | Security Assurance Reviews

Security Governance & Risk Management : Information Security Governance | Security Compliance Management | Security Risk Assessments | Gap Assessments | Risk Register Management | Risk Treatment Planning | Control Monitoring | Security Policy Compliance | Audit Readiness | Third-Party Risk Reviews

Additional Security Exposure : Microsoft Defender Exposure Management | CVSS Risk Scoring | Vulnerability Lifecycle Management | Threat Intelligence Fundamentals | SIEM Concepts (Splunk, Wazuh) | OWASP Top 10 Awareness | Active Directory Security Fundamentals | EDR/XDR Concepts

PROFESSIONAL EXPERIENCE

December 2021 - Current
Kyndryl (formerly IBM) - Associate – Cybersecurity Assurance, Hyderabad

Cybersecurity Governance & Security Assurance

- Lead cybersecurity governance activities, supporting a major Australian banking client operating within a highly regulated environment.
- Facilitate weekly Security Governance Reviews involving delivery teams, security stakeholders, risk managers, and compliance teams.
- Assess compliance against organizational security controls and client security requirements.
- Conduct security assurance reviews, and identify control gaps requiring remediation.
- Review security exceptions, extensions, and policy deviations to ensure appropriate risk treatment and business justification.
- Coordinate remediation activities with delivery teams, and track progress through closure.
- Support security policy implementation and control compliance across multiple technology domains.
- Perform security health checks and compliance validation activities for enterprise platforms.

Vulnerability Management

- Govern enterprise vulnerability management activities across infrastructure, cloud, and application environments.
- Monitor and analyze Qualys vulnerability findings to identify critical, high, and medium-risk security exposures.
- Review vulnerability aging reports, and drive remediation efforts in alignment with defined service level agreements.
- Partner with infrastructure and application teams to prioritize remediation activities based on risk, exploitability, and business impact.
- Validate vulnerability remediation through follow-up assessments and scan result reviews.
- Track risk acceptance requests, and ensure appropriate approvals are obtained for unresolved vulnerabilities.

- Produce vulnerability management metrics and executive reporting for security leadership reviews.
- Support continuous improvement initiatives to strengthen vulnerability remediation effectiveness.

Microsoft Defender & Security Monitoring

- Review Microsoft Defender security recommendations and exposure insights to identify security posture improvement opportunities.
- Collaborate with endpoint management teams to address security weaknesses, and improve compliance with enterprise security standards.
- Analyze security findings, and support remediation planning for identified endpoint security risks.
- Monitor security posture trends, and provide actionable recommendations to stakeholders.
- Participate in discussions involving endpoint security, attack surface reduction, and security control effectiveness.

Risk Management & Compliance

- Identify and assess cybersecurity risks across infrastructure, applications, and operational environments.
- Facilitate risk reviews with stakeholders, and support the development of mitigation strategies.
- Maintain risk records and governance documentation supporting compliance reporting activities.
- Conduct gap assessments against security requirements, and provide practical remediation guidance.
- Assist business and technology teams in understanding security obligations and compliance expectations.
- Contribute to risk treatment planning and risk reduction initiatives.

Audit Management

- Support internal and external audits across multiple cybersecurity domains.
- Coordinate evidence collection, validation, and submission activities with delivery teams.
- Manage audit observations, findings, and remediation actions using ServiceNow, and governance tracking mechanisms.
- Ensure audit actions are completed within agreed timelines and compliance commitments.
- Assist with audit readiness activities, and security control verification exercises.
- Contribute to reducing repeat audit findings through proactive governance, and remediation tracking.

Security Analytics & Reporting

- Design and maintain executive security dashboards using Power BI.
- Deliver monthly governance reports covering vulnerabilities, risks, audit findings, security exceptions, and compliance posture.
- Automate reporting processes to improve visibility, accuracy, and operational efficiency.
- Present security metrics to leadership teams to support risk-based decision-making.
- Enable data-driven governance through actionable security insights and trend analysis.

Key Achievements:

- Supported cybersecurity governance across 12+ delivery squads within a highly regulated banking environment.
- Improved visibility of security posture through executive-level Power BI dashboards.
- Successfully governed vulnerability remediation activities across enterprise environments.
- Strengthened CMDB compliance by implementing reconciliation and validation controls.

Improved tracking and closure of audit findings through structured governance processes.

CERTIFICATIONS

ISO/IEC 27001 Lead Auditor – BSI

Microsoft Security, Compliance & Identity Fundamentals (SC-900)

Microsoft Azure Fundamentals (AZ-900)

AWS Certified Cloud Practitioner

Microsoft Power BI Data Analyst (PL-300)

Information Security Administrator Associate (SC-401)

AI Fundamentals (External Training Institute)

AWARDS & RECOGNITION

Kyndryl – Mr New Talent Award, Kyndryl – Star of the Month Award
