

KAVYA M P

Senior Test Engineer

[LinkedIn](#) | +91 9916727294 | kavya.mp1404@gmail.com | Bengaluru

CAREER SUMMARY:

Senior Test Engineer with 4.6 years of IT experience in the banking and audit domain, specializing in automation testing using Selenium with Java and Playwright with JavaScript. Proficient in functional testing and API testing (Postman). Experienced in leveraging AI tools to enhance test automation, generate test artefacts, and improve overall testing efficiency. Strong expertise in Agile/Scrum methodologies, defect management, and delivering high-quality, reliable software solutions with improved test coverage and reduced post-release defects.

WORK EXPERIENCE:

Happiest Minds Technologies

Senior Test Engineer | October, 2024 - Present

- Manual Testing: Validated functionality, usability, and compliance of web and mobile applications through structured manual testing, ensuring product reliability.
- API Testing (Postman): Performed API testing to verify request/response flows, error handling, and seamless backend integration.
- Test Design & Execution: Authored and executed test cases, scenarios, and test data based on PBIs, and user stories in Agile projects.
- Defect Management: Collaborated with developers, product owners, and business analysts for root cause analysis, logging, and tracking issues in Azure DevOps to ensure timely resolution.
- Agile Practices: Actively participated in Agile ceremonies (daily stand-ups, sprint planning, retrospectives), supporting continuous delivery, and iterative improvements.
- Quality Assurance: Performed functional, regression, and system testing, contributing to high-quality deliverables and process improvements by addressing test coverage gaps.
- Automation Testing: Built and maintained Playwright based automation scripts in JavaScript to streamline manual testing process and enhance accuracy.
- Leveraged AI tools including Microsoft Co-pilot, ChatGPT, Claude, and Sidekick to accelerate test automation, generate test cases and test plans, and improve overall QA productivity and test coverage.
- Extensively used Microsoft Co-pilot to develop and optimize Playwright automation scripts in JavaScript, reducing development time, enhancing code quality, and streamlining manual testing efforts.

Infosys

Automation Tester | December 2019 - November 2022

- Automation on the PEGA Platform: Delivered automation solutions for client websites on the PEGA platform, reducing manual effort by 30% and improving testing efficiency by 20% within the banking domain.
- Test Automation (Selenium, Java, Cucumber): Designed, developed, and maintained automation frameworks and scripts for functional and regression testing, enhancing coverage and precision.
- Continuous Integration and Delivery: Managed Jenkins pipelines to automate test execution and streamline CI/CD processes, ensuring efficient and error-free software releases.
- Functional and API Testing: Conducted functional and API testing on PEGA applications, identifying and resolving approximately 15 defects per sprint, contributing to a 25% reduction in post-release issues.
- Database validation: Utilized SQL for data integrity checks and database validation, strengthening end-to-end test reliability.
- Agile Collaboration: Partnered with cross-functional teams in Agile projects, contributing to code reviews, process improvements, and a 15% increase in client satisfaction.

SKILLS:

- **Languages:** Java, SQL, Selenium, PEGA, JavaScript (Basic)
- **Databases:** MySQL (basic queries, data validation)
- **Ticketing tools:** Rally, Jira, Azure board
- **Automation:** Selenium, Cucumber, BDD Framework, Gherkin, Playwright, JMeter, Postman
- **Testing:** JUnit, Integration Tests, End-to-End (E2E) testing, API testing and database testing
- **CI/CD & Version Control:** Git, Jenkins (basic exposure)
- **AI tools:** Microsoft Co-pilot, Claude, Perplexity and Chat GPT

EDUCATION:

- University of Leicester | 2023- 2024 | Leicester, United Kingdom
Master of Science - Advanced Computer Science
Graduation with Merit
- AMC Engineering College | 2015- 2019 | Bengaluru, India
Bachelor of Engineering - Information Science
CGPA: 7.5
