To develop my career as a **Software Test Engineer** where I will be a valuable team member, contributing quality ideas and work for an organization where there is an ample scope for individual as well as organization growth in Software Design and Development

Experience Summary

I have **10 years** of experience in the field of **Quality Engineering & Assurance**. As part of my assignment, I have been involved in **Requirement Analysis, Test design, Test execution, Defect tracking, Management activities, Automation scripting using Selenium Webdriver with TestNG and Script fixing.**

Currently working as Associate with **Cognizant Technology Solutions Pvt Ltd, Bangalore.**

Career Objective

To provide innovative solutions to enhance the Quality of Software Development, achieve reliability and efficiency thereby gaining the customer's confidence and satisfaction.

Professional Experience

- 10 Years of Quality Engineering & Assurance experience in Telecom domain
- Hands-on experience in Selenium WebDriver, Playwright Core Java, TestNG, Selenium Grid, Firebug, Firepath, Jenkins, JDBC, SQL, Maven, SVN
- Working experience in Middleware application, REST APIs with parasoft as automation tool
- Experience in SoapUI and Postman for REST APIs validation as standard tools
- Involved in feasibility study, writing, executing and maintaining Automation Test Script using Selenium Web Driver
- Well versed with Handling Elements in Selenium Webdriver using XPATH and other locators
- Good Understanding of Core Java and OOPs concepts
- Worked on defect management tools like Jira and Continuous integration tools like Jenkins
- Well acquainted with all phases of Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC)
- Well versed with database concepts and experience in using SQL statements for data validations
- Experience with Agile/Scrum for project management and Rally for project tracking
- Experience in Requirement Elicitation, Feasibility Analysis and Gap Analysis, and Project Documentation

- Extensive experience in Test Plan, Test case development, Test case Review, Test case execution, Defect report preparation
- Pragmatic and competent application engineer with strong communication, presentation and problem solving skills

Project Description

Currently associated with Cognizant Technology Solutions Pvt Ltd., Bangalore from October 2016 to till Date.

Project # 3

du (Emirates Integrated Telecommunications Company), the major UAE telecom provider in Dubai. Du-Telecom is the largest Telecommunication Project which involves Integration of Siebel

CRM System and handling the Customer care process of ER-Telecom, where the process is interacting with different OSS systems to provision the product for the customer. And then to generate final invoice for the customer.

In du communication worked with applications like DSP, BSCS, CRM, Netcracker, OMP and with agile team for integration testing by connecting to all application DB services.

Project # 2

Description:

Comcast Corporation, formerly registered as Comcast Holdings, is an American mass media company and is the largest broadcasting and cable company in the world by revenue. It is the largest cable company and home Internet service provider in the United States and the nation's third largest home telephone service provider. Comcast services U.S. residential and commercial customers in 40 states and the District of Columbia. The company is headquartered in Philadelphia, Pennsylvania.

In Comcast worked with applications like CAFÉ, Work Bench, ComPS, EPC, XM team, currently working with WorkBench.

Project # 1

Associated with **Milan InfoTech Pvt Ltd., Bangalore from August 2014 to September 2016.**

Description:

Bolero is a cloud-based platform which provides a different way to optimize complex international trade chains. Linking trade with trade finance, Bolero dematerializes the trade chain. By providing corporate customers with access to a community of trade enablers, from banks to ocean carriers, users are able to manage their complete financial and trade processes. From multi-banking connectivity, through to the integration of electronic bills of lading, Bolero provides a range of cloud based solutions designed to deliver value to all participants in a trade chain. Bolero customer's benefit from increased operational efficiency, reduced cost of operations and accelerated time to cash.

Bolero delivers this value through a combination of cloud based technology, extensive domain expertise and a unique legal infrastructure that underpins and supports the technology, ensuring practical and cultural barriers to adoption are removed.

Responsibilities

- Create, maintain and manage test plan for sprint depends on the requirement.
- Involved in the preparation of Hybrid framework design.
- Writing and executing Test scripts using Selenium WebDriver. Reviewing test cases.
- Identifying automatable components/manual test cases.
- Involved in In-Sprint automation activities to deliver the scripts with in the sprint.
- Executing Manual test cases for regression.
- Provided production support during deployments.
- Involved in Requirement Analysis and Creating Feasibility Analysis Report.
- Involved in preparing Automation test scripts design and debugging.
- Involved in preparing Automation test scripts design and debugging using Selenium framework- Tool: Eclipse.
- Reviewed the test scripts prepared by the team members.
- Involved in Script Analyzing and Reporting Defects.
- Involved in executing automation scripts on various environments and reported the run results.
- Worked on Defect Management through HP Quality Center ALM.
- Analyzing business requirement, functional specification and connecting with the product owner/clients
- Responsible for Regression Testing of the impacted areas to ensure application readiness.
- Co-ordinate with onsite for daily task and status reporting.
- Follow quality process to ensure standards.

Education & Professional Development

- Bachelor of Engineering (Computer Science).
- Diploma (Computer Science)
- S.S.L.C.
- Completed Training on Certified in Automation Testing(Selenium)

Technical Skills

Manual Testing:

STLC, SDLC, Requirement Analysis, Test Planning, Test Design, Test Execution, Test Estimations, Quality Metrics, Requirement Traceability Matrix and Defect Life Cycle

Automation Testing:

Core Java, Selenium WebDriver, Playwright, TestNG, GitHub.

Test Management Tool Box:

HP ALM, Octane, Jira, Rally, QA Complete, IBM ClearCase, IBM ClearQuest,

API testing tool:

Postman, SOAP UI, Rest API, Parasoft

Database:

DBeaver, Oracle Database, Microsoft SQL Server,
MySQL, Oracle Database, IBM DB2

Skills

- Having zeal to learn new technologies by understanding challenging tasks & responsibilities.
- Confident, Creative and Committed, Comprehensive problem-solving abilities, Adaptability and inquisitiveness.
- Strong but realistic belief in own capabilities and ideas, exhibiting a "can do" attitude & seeing problems as "solvable".
- Hardworking & Eager to accept challenging assignments.

Personal Details

Father's Name - Hiriyantha B
Nationality - Indian
Languages - Hindi, Kannada, English.
Permanent/ Current Address - #7, 3rd cross, Avahalli, Mysore road, Bangalore-560026. Hobbies
- Playing Cricket, listening music, Travelling.

(I solemnly promise you that the above-mentioned details are true to the best of my knowledge.)
