

PUSHPITA BAKSHI

Software Test Engineer (SDET) ■ AI-Aware QA Professional

pbakshi474@gmail.com ■ +91 8017497648 ■ Bengaluru, Karnataka, India ■ linkedin.com/in/pushpita-bakshi

PROFESSIONAL SUMMARY

Detail-oriented SDET with **5 years of experience** in manual and automation testing across **Agile and SAFe** environments. Proven expertise in testing AI-powered platforms — validating ML model outputs, quality audit workflows, and intelligent automation systems. Experienced across HRMS/Workforce Management, CX, E-Governance, and Insurance domains. Skilled in **Selenium, Playwright, Java, API testing, and JMeter** performance testing. Certified in Generative AI (Outskill) and recently upskilled via Scaler Masterclass on breaking into AI roles at companies like OpenAI and Anthropic (April 2026).

AI TOOLS & INTELLIGENT PLATFORM EXPERIENCE

Tested and validated the following AI-powered products at Omind.ai:

- **AIQMS (AI Quality Management System):** Tested Dashboard, Quality Audit Forms, Calibration Audits, and Audit Creation modules. Validated AI-generated quality scoring and audit workflows for contact centers.
- **ARYA (AI Virtual Assistant for Contact Centers):** Tested a cutting-edge AI virtual assistant designed to manage contact center operations, improve agent performance, and deliver superior customer experience — including Quality Auditor, Co-Pilot, Coach, Product Management, and Digital Cockpit modules.
- **Social Listening (AI-driven Insights Engine):** Tested real-time social data ingestion pipelines, sentiment analysis outputs, and AI-generated insight dashboards for accuracy and reliability.
- **OMIND CX AI Platform:** End-to-end testing of AI-powered customer journey templates, campaign automation flows, and experience orchestration modules.

Key AI QA Activities

- Performed data validation and accuracy analysis on ML model outputs to verify prediction reliability.
- Designed test cases for non-deterministic AI features — validating output ranges, confidence scores, and fallback behaviors.
- Collaborated with data scientists and product teams to define acceptance criteria for AI module releases.

WORK EXPERIENCE

Software Test Engineer (SDET)

Oct 2022 – Present

Omind.ai · Bengaluru / Kolkata

Verticals: MWP · AIQMS · ARYA · Social Listening · CX Platform

Project 1 — Workforce Management Platform (MWP)

- Performed QA Automation and Manual Testing in Scaled Agile (SAFe) framework.
- **P-Matrix** — validated performance matrix configurations and reporting outputs.
- **Recruitment** — tested candidate pipeline, interview tracking, and offer workflows.
- **My Team** — verified team hierarchy, reporting structure, and manager views.
- **IT Assets** — validated asset assignment, tracking, and lifecycle management.
- **Training** — tested training assignments, completion tracking, and notifications.
- **QMS (Quality Management System)** — validated quality workflows and audit integrations.

Project 2 — AIQMS (AI-powered Quality Management System)

- **Dashboard** — validated real-time quality metrics, charts, and KPI displays.
- **Quality Audit Form** — tested form creation, field validations, and submission flows.
- **Calibration Audit** — verified calibration session setup, scoring, and result comparisons.
- **Audit Creation** — tested audit configuration, agent assignment, and workflow triggers.
- Validated AI-generated quality scores and audit recommendations for accuracy and consistency.

Project 3 — ARYA (AI Virtual Assistant for Contact Centers)

- **Quality Auditor** — validated evaluation of agent interactions against organisational frameworks, compliance checks, soft skills scoring, and TNA outputs.
- **Co-Pilot** — tested real-time AI assistance features supporting agents during live customer interactions.
- **Coach** — verified AI-driven coaching recommendations and agent performance improvement workflows.
- **Product Management** — tested product configuration and management interfaces within the ARYA platform.
- **Digital Cockpit** — validated the AI-powered operations dashboard providing strategic insights and performance monitoring.
- Verified ARYA's capability to handle repetitive tasks, monitor quality, and surface actionable insights in real time.
- Validated AI output accuracy for agent performance scoring, compliance flags, and training recommendations.

Project 4 — OMIND CX (Customer Experience Platform)

- **Journey Templates** — validated customer journey flows, trigger conditions, and branching logic.
- **Campaign** — tested campaign setup, scheduling, audience targeting, and delivery.
- **Customer Experience Orchestration** — verified end-to-end AI-powered CX workflows.

Project 5 — TMS (Ticketing Management System) using Zammad

- **Ticket Creation & Workflow** — tested end-to-end ticket creation, assignment, escalation, and resolution workflows within the Zammad platform.
- **User & Group Management** — validated agent roles, group configurations, and permission settings.
- **Email & Notification Integration** — tested inbound/outbound email channel integration and automated notification triggers.
- **Search & Reporting** — verified ticket search functionality, filter conditions, and reporting dashboards for accuracy.
- Performed regression testing across Zammad releases to ensure stability of core ticketing functionalities.
- Logged and tracked defects using JIRA; collaborated with developers for timely resolution of platform issues.

General Responsibilities

- Conducted Android mobile application testing for functionality, usability, and cross-platform compatibility.
- Performed data validation and result analysis to improve ML model reliability.
- Managed full defect lifecycle in JIRA with Zephyr Scale; authored detailed bug reports and tracked resolution to closure.
- Executed performance testing using JMeter; identified bottlenecks and reported findings to development teams.
- Participated in sprint planning, daily standups, sprint reviews, and retrospectives as a core Agile team member.
- Worked independently and collaboratively; consistently met deadlines and reported risks promptly.

Software Test Engineer

Interra Information Technologies Pvt. Ltd · Kolkata

Feb 2015 – Jan 2016

Project 1 — E-District DNH (State Government E-Governance Portal)

- Served as a manual functional tester on a state government e-governance portal providing anytime, anywhere access to citizen services.
- Portal features tested: information services, transactional services, SSK shared infrastructure, State Portal integration, and E-district module.
- Validated integration of state department data with NPI (National Portal of India) guidelines.

Project 2 — Policy Holder Portal (Responsive Insurance Portal)

- Tested a responsive customer portal enabling policyholders to manage policies, make payments, and track claims online.
- Customer journeys validated: Login, Quote Generation, Policy View, Payment Processing, and Claim Status Tracking.
- Performed user story analysis, created detailed test cases, and collaborated within Agile testing cycles.
- Identified and reported functional defects; worked closely with developers for timely resolution.

Core Technical Skills	
Test Types	Manual, Automation, Functional, API, Performance, Mobile, Regression, UAT
Automation Tools	Selenium WebDriver, Playwright, Katalon Studio
Languages	Java, HTML
Performance Testing	Apache JMeter
Bug & Test Mgmt	JIRA, Zephyr Scale, Zammad (TMS)
Methodologies	Agile, Scrum, SAFe (Scaled Agile Framework), STLC
Domains	HRMS / Workforce Management, AI/ML QMS, CX Platforms, Insurance Portals, E-Governance

Certifications & Training
Generative AI Mastermind Outskill Certificate of Completion
How to Break into AI Roles at OpenAI and Anthropic Scaler Masterclass Certificate of Participation April 2026

Education
Master of Computer Applications (MCA) Techno India (Saltlake), Kolkata

LANGUAGES

English (Fluent)	Hindi (Fluent)	Bengali (Native)
