PROFESSIONAL SUMMARY

QA Engineer with 5 years of experience in Manual, Functional, and Automation Testing across enterprise SaaS, AI/ML, and e-Government platforms. Skilled in Test Planning, Test Case Design, Bug Tracking, and STLC execution within Agile/SAFe environments. Strong communicator with a track record of delivering quality outcomes under tight deadlines.

WORK EXPERIENCE

Software Test Engineer (SDET) | Omind.ai | Bengaluru / Kolkata, India *Sep 2022 – Present*

Products: AIQMS | ARYA | MWP | CX | MindVoice | SpotBilling | TMS

- Execute manual functional and regression test cases across CRM, Dashboard, Knowledge Management, Audit Sheet, Perform Audit, Calibration, Appraisal/Revision, Salary Slip, Engage, and Attendance Reversal modules.
- Contributed to UI test automation using Katalon Studio alongside primary manual testing responsibilities.
- Perform mobile application testing on Android devices for functionality and usability.
- Validate AI/ML model outputs against ground truth data to ensure accuracy of intelligent features.
- Conduct API testing to validate backend integrations and data consistency.
- Performed performance testing using JMeter to identify bottlenecks and ensure system stability.
- Track and manage defects using JIRA with Zephyr Scale; share test progress reports with Scrum masters and PMO stakeholders.
- Actively participate in Agile/SAFe ceremonies including sprint planning, daily standups, and retrospectives.
- Consistently meet sprint deadlines while proactively reporting risks and contributing to process improvements.

Software Test Engineer | Interra Information Technologies Pvt. Ltd. | Kolkata, India *Feb 2015 – Mar 2016*

Projects: e-Government Services Portal | Policy Holder Insurance Portal

- Performed manual functional testing for Employee Management and Insurance domain projects.
- Tested a state-level e-Government portal enabling citizens to access government services online, reducing physical office visits and streamlining administrative interactions across NPI/SSK delivery channels.
- Tested a responsive Policy Holder Portal — validated login, quote generation, policy management, payment flows, and claims tracking.
- Prepared and executed test cases, test data, and exit reports in an Agile environment.
- Shared test case progress reports with Scrum masters and PMO stakeholders at regular intervals.
- Participated in user story reviews, Test Planning, and TC execution throughout the project lifecycle.

KEY PROJECTS

Omind.ai Projects

AIQMS – AI Quality Management System — *Omind.ai*

- Tested auditsheet creation and configuration, calibration audit workflows, dashboard functionalities, and user onboarding across multiple client configurations.
- Tested the Audit Sheet module where users create and configure audit sheets; validated the AI Assist button functionality that intelligently suggests audit parameters based on context.
- Validated AI-generated quality scores and model outputs against ground truth data for accuracy compliance.

TMS – Ticketing Management System (Zammad Platform) — *Omind.ai*

- Performed end-to-end manual testing and automation testing using Katalon Studio of the TMS module built on the Zammad platform.
- Tested ticket creation, assignment, escalation, and resolution workflows.
- Validated system integrations and data consistency across TMS modules; reported and tracked defects in JIRA.

CX – Customer Experience Platform — *Omind.ai*

- Tested customer interaction dashboards, template creation, campaign running, user journey flows, and user onboarding workflows.
- Validated Template Campaign module — tested campaign creation, template configuration, audience targeting, and campaign dispatch workflows.
- Executed cross-browser and cross-device testing; tracked defects in JIRA with Zephyr Scale.

ARYA – AI-Based Contact Center Automation Platform — *Omind.ai*

- Executed functional, regression, and validation testing across multiple ARYA AI modules.
- Tested Quality Auditor functionality for agent evaluation, compliance validation, and soft-skill scoring.
- Validated Co-Pilot real-time assistance features during live customer interaction scenarios.
- Verified AI-generated coaching suggestions and workflow accuracy within the Coach module.
- Conducted testing of Product Management configurations and dashboard functionalities.
- Validated Digital Cockpit reporting dashboards for operational monitoring and analytics insights.
- Performed AI output validation for call sentiments and training recommendations.
- Collaborated with cross-functional teams to ensure accurate AI behavior and seamless user experience.

MindVoice – Conversational AI / Voice Bot Platform — *Omind.ai*

- Manually tested voice bot conversation flows including intent handling, fallback scenarios, and call transcription accuracy.

MWP – Workforce Management Portal — *Omind.ai*

- Tested attendance reversal, QMS module, and My Team module functionalities.
- Designed detailed manual test cases covering positive, negative, and boundary scenarios.

SpotBilling – Utility Billing System — *Omind.ai*

- Tested billing calculation engine and invoice generation on Android mobile.
- Reported and tracked critical billing discrepancy defects; coordinated fixes with developers.

Key AI QA Responsibilities

- Verified AI model performance through output analysis, data quality checks, and result validation.
- Created test strategies for AI applications focusing on accuracy, edge cases, and system resilience.
- Worked closely with product and data teams to define testing scope and quality benchmarks before deployment.

Interra Projects

e-Government Services Portal — *Interra*

- Tested a state-level citizen services portal reducing physical government office visits.
- Verified integrations with State Portal and E-District infrastructure across NPI/SSK service delivery.

Policy Holder Insurance Portal — *Interra*

- Tested end-to-end insurance workflows: login, quote generation, policy management, claims, and payments.
- Authored manual test cases, tracked defects, and prepared exit reports for each sprint.

TECHNICAL SKILLS

Testing Types	Manual Testing, Functional Testing, Regression, Smoke, Sanity, Exploratory, Mobile (Android), API, Accuracy Testing, UI Automation
Automation Tools	Selenium WebDriver (Java), Playwright, Katalon Studio
Test Management	JIRA, Zephyr Scale, Test Planning, Test Case Design, STLC, Bug Tracking
API Testing	REST API Testing, Postman
Performance	Apache JMeter
Agile / SAFe	Scrum, SAFe, Sprint Ceremonies, Agile Reporting, Stakeholder Communication
Domains	SaaS / AI Platforms, CRM, Insurance, e-Government, Workforce Management, Utility Billing

EDUCATION

Master of Computer Application (MCA)

Techno India, Salt Lake, Kolkata

Bachelor of Computer Application (BCA)

Pailan College of Management and Technology, Kolkata

CERTIFICATIONS

Generative AI Mastermind — Outskill | Issued by Vaibhav Sisinty, Founder, Outskill

How to Break into AI Roles at OpenAI & Anthropic — Scaler Masterclass | 30th April 2026

Issued by Anshuman Singh & Abhimanyu Saxena, Co-founders, Scaler
