About User Management

A user management module KAVERI 2 allows administrators to manage user accounts linked to application. It typically provides functionality to create, edit, delete, and search for user accounts, as well as manage user roles, permissions, and access control.

This module helps administrators to efficiently manage large numbers of users, organize them into groups, and assign appropriate permissions to each group and user.

Some common features of a user management module include user authentication, password management, user registration and activation, office creation and management, Roles, post creation and management. Overall, the user management module is a critical component of Kaveri 2 applications and helps ensure the security and integrity of user data and resources.

1. User Management Admins

The user management module will be handled by following Roles

1. Super Admin (KPMU)

The super admin is responsible for creating users, roles, groups and granting privileges and access of different functionalities of the Kaveri 2.0 application. KPMU will have the responsibility of user administration of all department users of the entire state.

2. Department Admin

IGR of the Department of Stamps & Registration will be Department admin. The department admin will be a super admin for administrative approvals. Department admin will perform the same action as KPMU and will assign DIGR/AIGR roles to respective users.

3. DIGR Admin

DIGR Admin will assign the roles to DR/HQA/SR/FDA/SDA/DEO users.

4. District Admin

District Admin will be District Registrar will be head of respective district, will handle the mapping of roles and access to HQA/SR/FDA/SDA/DEO users of their respective jurisdiction.

5. Sub-registrar office Admin

Sub registrar office Admin will be Sub Registrar, will head of the sub-registrar office and he/she would be approving authority to personnel reporting directly to him/her. SR admin will handle the mapping of roles and access to FDA/SDA/DEO users of his office.

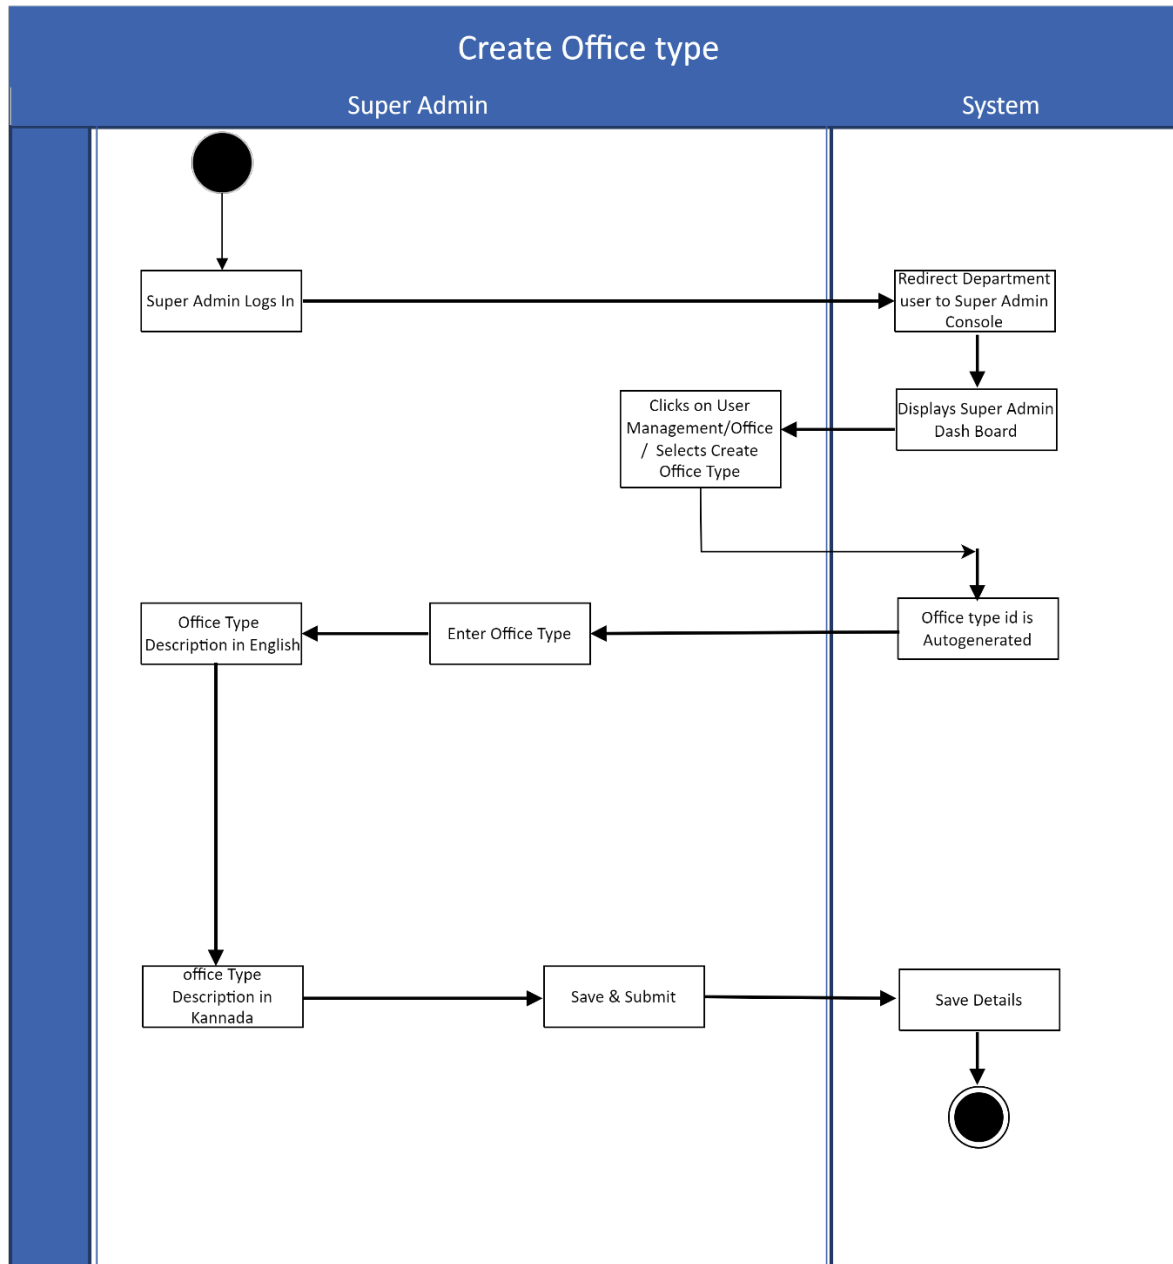

2.Basic User Management Functions

1. **Creates Office Type** - Various office types likes IGRO/DRO/SRO/Additional DRO/Additional SRO will be created using this functionality
2. **Create Office** – Offices like SRO Gandhinagar, DRO Mysore etc., will be created using this functionality
3. **Add Post** – Using this functionality number of post and type of post in each office can be described.
4. **Add Role** - Roles like IGR/DIGR Law & Administration/DIGR Audit/DIGR Intelligence/DIGR Vigilance/DIGR CVC/DIGR Enforcement/AIGR Computers/AIGR Administration/AIGR Audit/Law Officer/Accounts Superintendent/Superintendent Audit/Statistical Inspector/SR Administration/SR Computers/FDA/SDA/DR/SR will be created using this functionality.
5. **View/Edit Role** - This functionality will display list of Role and further provisions an edit option to change role name or enable/disable role. The privilege of view and edit can be set in Modules/Sub module/Functions mapping
6. **Mapping of Roles to Modules / Sub Modules / Functions** – This option shall be used to define access to role with respect to Module, Sub module and Functions. *This will be important functionality which will govern all kind of privileges to user/role.*
7. **Add user** – This functionality will be used create new departmental user to whom application access to be provided .
8. **View/Edit user** – This functionality lists all the user or specific to DRO/SRO. Further based on the privilege Edit User functionality would be provided
9. **Create Group** - A Group can be created using this functionality and roles can be assigned to this group. Group can be like IGR office, DR Office, SR Office. Group privilege will over ride role privilege.
10. **View/Edit Group** – This functionality lists the groups created. Further if the user has privilege edit option wherein group name can be changed, or enable/disable group option will be provided.
11. **Map Group to Modules/Sub Modules/ Functions** - This option shall be used to define access to group with respect to Module, Sub module and Functions. *This will be important functionality which will govern all kind of privileges to user/role.* Privilege set here shall over ride role privilege.

12. **Add Module/Sub Module/Function** – All modules, sub modules shall be added using this option. Functions can be view, print, scan, download etc. *This would be done by development team (CSG)*

3.Flow Diagrams & UI For Each Function

3.1. Create Office type

Functional Step-by-Step Process

Here we create each office of the Department of Stamps & registration to use the Kaveri 2.0 online services. All office types must be created in the following hierarchy. IGRO followed by DRO & additional DRO(if any) which will be followed by SRO.

1. Admin logs in to Kaveri 2.0 application.
2. Admin selects the "User Management->Office->Create office type" option.
3. **Office Type id:** Office type id is autogenerated.
4. **Office Type:** Office type can be IGRO/DRO/SRO/Additional DRO/Additional SRO.
5. **Office Type Description (English):** Description of the Office type in English

Case: Sub Registrar Office.

6. **Office Type Description (Kannada):** Description of office type in Kannada (This shall be used for Kannada label display in application)

**Kaveri Online Services**

3.2. Create Office

**Functional Step by Step Process**

Here we create each office of Department of Stamps & registration to use the Kaveri 2.0 online services. All offices must be created initially in following hierarchy. IGRO followed by all DRO then SRO under each DRO.

Once existing Offices are created any new office can be added as per its jurisdiction

1. Admin login to Kaveri application
2. Admin selects "User Management->Office->Add office" option.
3. Scans & uploads Government Order to Create new office. This would be mandatory going forward if any new office is created other than existing 298 offices.

4. **Office Type:** Select the office type from the list IGRO/DRO/SRO/Additional DRO/Additional SRO. This is mandatory field and list would be auto populated based on Office type created in previous functionality. Based on the office type selected it would ask for jurisdiction it belongs to. Further if any DRO or SRO is created DDO code (used for Khajane II payment) needs to be added. This will be mandatory field incase of DRO and SRO. Same DDO code will be used to pass to Khajane II API for payment specific to this office

Case 1:

If we are creating SRO Yeshwanthapura, List of all DRO's should appear here select appropriate DRO, when we select DRO Rajajinagar, office id of this DRO will be jurisdiction id of SRO Yeshwanthapura.

Case 2:

Creating IGRO does not require selection of jurisdiction ID automatically current officeid will jurisdiction id.

Case 3:

In case DRO needs to be created then IGRO will be the jurisdiction and DDO code specific to this office needs to be added

5. **DDO Code:** For existing offices we need to map these from khajane mapping table. For new offices this needs to be entered. This is mandatory. Only for "DRO" and "SRO".
6. **Office Name (English):** This is the name of the office. Office Name shall be entered in English. This is mandatory.

Example: If we are creating an SRO of Yeshwanthapura, we can input as "SRO Yeshwanthapura".

7. **Office Name (Kannada):** Enter the office name in Kannada. This is mandatory and it would be used where ever kannada name of office is required.
8. **Short Name (English):** A three-character o 4 character(in rare scenarios) short name shall be entered. This will be mandatory field. This short name will be used to create triplet code in final registration number.
9. **Office address:** We can input the office address where the office is located. Office address shall be entered in Address text box. This will be mandatory field
10. **Phone:** Enter landline Number as point of contact. This will be mandatory field
11. **District:** Select the District from the drop down. This is mandatory.
12. **Pin code:** Enter the pin code. This will be mandatory field.
13. **Is active:** To Enable or disable office. This is only for office type SRO and it is mandatory

14. **Anywhere Registration:** This will be applicable only to SRO, incase anywhere registration is enabled then corresponding rules will be applied to this office. Incase anywhere registration is enabled for a particular SRO under a DRO then a message to be shown that anywhere registration would be enabled for remaining SRO under same DRO
15. Then Click on “Save & Submit”. On successful creation of message to be displayed

3.3. Add Post

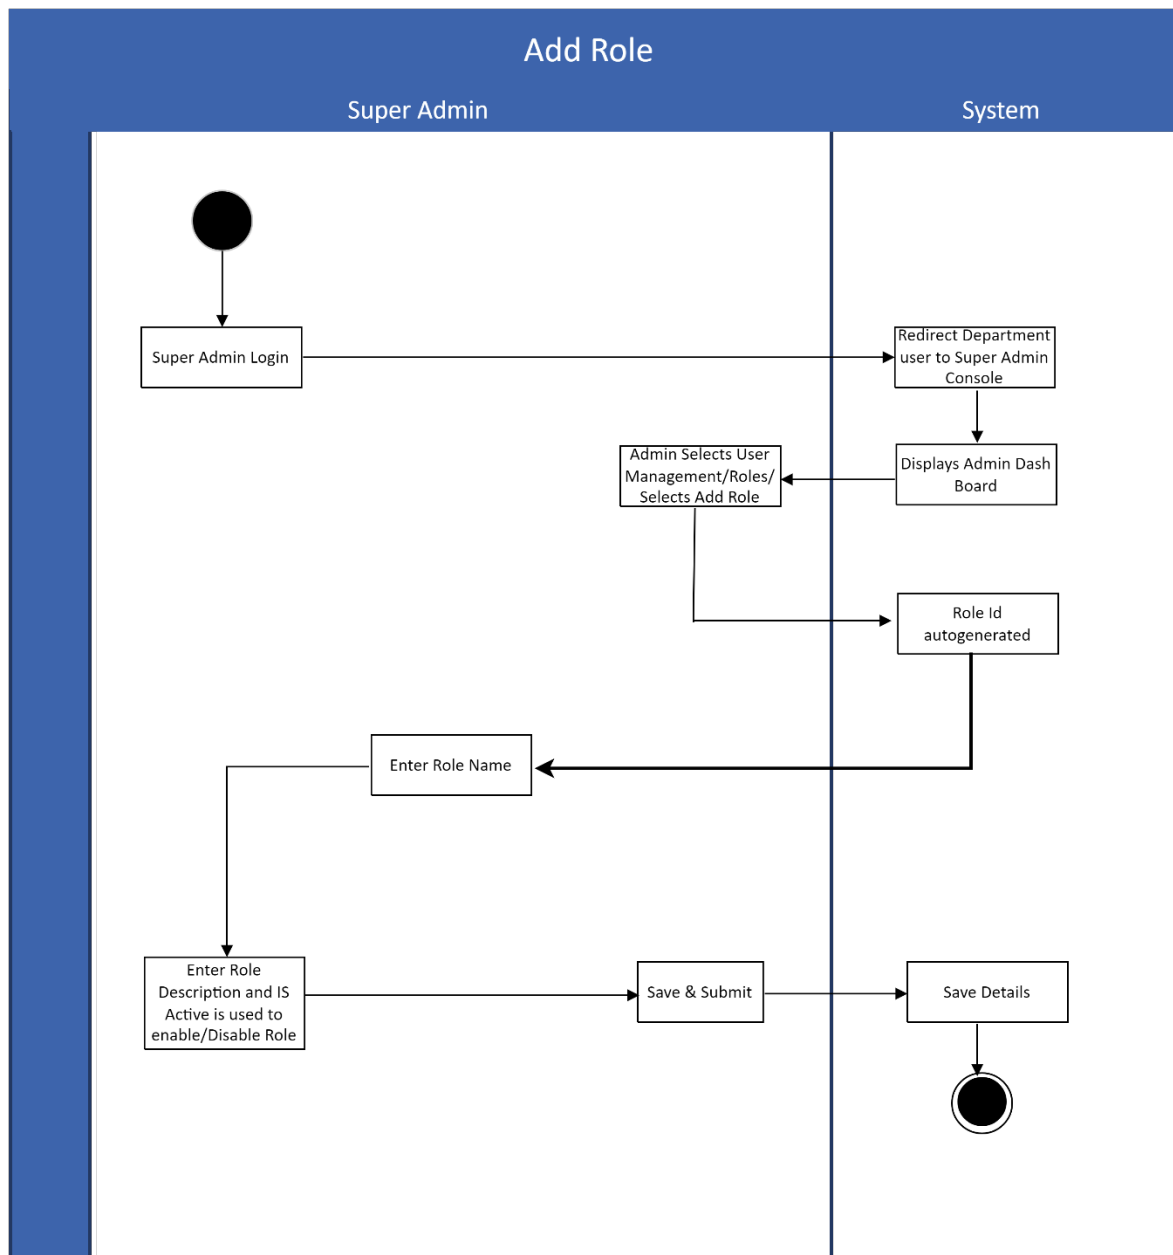

Functional Step by Step Process

1. Here we create posts of Department of Stamps & registration to use the Kaveri 2.0 online services. All posts under each of offices must be created in following hierarchy.
IGR/DIGR Law & Administration/DIGR Audit/DIGR Intelligence/DIGR Vigilance/DIGR CVC/DIGR Enforcement/AIGR Computers/AIGR Administration/AIGR Audit/Law Officer/SR/DR/FDA/SDA etc.
2. Admin logs in to Kaveri 2.0 application.
3. Admin selects "User Management -> Office -> Add Post" option.
4. Scans & uploads Government Order to Create new Post. This will be non-mandatory field

5. **Post ID:** Post ID will be autogenerated.
6. **Office type:** Office type will be selected from the drop down. This is mandatory. Office type can be IGRO/DRO/SRO.
7. **Office Name:** Drop down displays all the SRO's present under the selected district. Select office name from drop down. Office Names can be "SRO Yeshwanthapura", "SRO Chincholi". This is mandatory.
8. **Role:** Select the Role from drop down. Roles can be "FDA", "SDA". This is mandatory.
9. **Post Description:** Role+OfficeName autogenerated. This can be "FDA SRO Chincholi".
10. Then Click on "Save & Submit".

The screenshot shows the 'Kaveri Online Services' web application interface. The header includes the logo, 'Kaveri Online Services', 'Department of Stamps and Registration, Government of Karnataka', a 'XD Index' button, a welcome message 'Welcome, Tanmay Sharma KPMU ADMIN', and a 'Logout' button. The left sidebar contains a menu with 'Dashboard', 'MIS', 'Document Registration', and 'User Management' (which is expanded to show 'Office', 'Create Office Type', 'Create Office', 'Add Post', 'Role', 'User', and 'Miscellaneous'). The main content area is titled 'Add Post' and contains a form with the following fields: 'Upload Government Order/Supporting Document' (with a file upload icon), 'Office Type*' (a dropdown menu), 'Office Name*' (a dropdown menu), 'Role*' (a dropdown menu), and 'Post Description' (a text box containing the autogenerated text 'Role + Office Name'). A 'Save & Submit' button is located at the bottom right of the form.

3.4. Add Role

Functional Step by Step Process

1. It is very important to update all the Roles of Kaveri 2.0 in the user management module. This is required to define the Role of the user based on the functionality of the user.

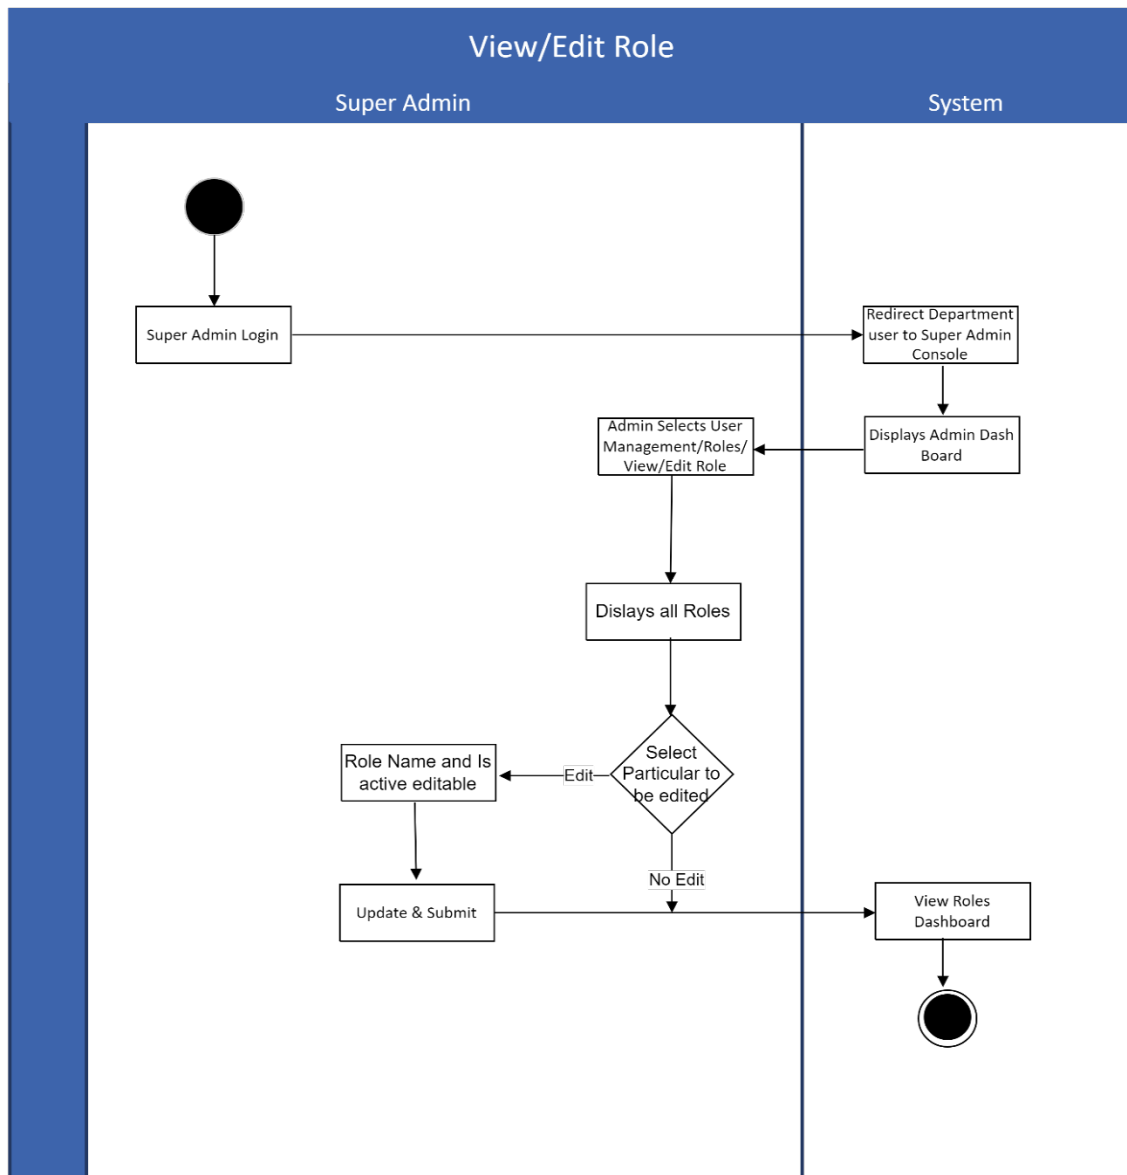

Example :

- Some of the Roles can be IGR/DIGR/AIGR/DR/SR/FDA/SDA/AIGR Computers/SR Administration

2. Department admin logs in to the Kaveri 2.0.
3. System displays Admin Console and Admin Dash Board.
4. Admin selects User Management ->Role ->Add Role option.
5. Role id will be autogenerated.
6. Role Name: Some of the Role Names will be IGR/DIGR/AIGR/DR/SR/FDA/SDA/AIGR Computers/SR Administration
7. Role Description: Enter the short description of roles.
8. **Is active:** To Enable or disable Role.
9. Then click on “Save & Submit”.

The screenshot displays the 'Kaveri Online Services' Admin Dashboard. The header includes the logo, 'Kaveri Online Services', 'Department of Stamps and Registration, Government of Karnataka', a welcome message 'Welcome, Tanmay Sharma', the user role 'KPMU ADMIN', and a 'Logout' button. The left sidebar contains a menu with 'Dashboard', 'MIS', 'Document Registration', 'User Management' (selected), 'Office', 'Role' (expanded), 'User', and 'Miscellaneous'. The 'Role' menu is expanded, showing 'Add Role', 'View/Edit Role', and 'Map Role to Modules/Sub Module/Functions'. The main content area shows the 'Add Role' form with a '< Back' link. The form has four fields: 'Role ID' (Value), 'Role Name*' (Value), 'Role Description' (Value), and 'Is Active' (radio buttons for 'Enable' and 'Disable'). A 'Save & Submit' button is at the bottom right of the form. The footer shows '©2021, Department of Stamps and Registration, Karnataka'.

3.5. View/Edit Role

Functional Step by Step Process

1. This option allows the admin to Enable/Disable created Roles in Kaveri 2.0.
2. Department admin logs in to the Kaveri 2.0.
3. System displays Admin Console and Admin Dash Board.
4. Admin selects User Management -> Role ->View/Edit Roles option.
5. On click on View/Edit roles it displays all roles.
6. If Role need to be edited Click on Edit under Action.
7. When clicked on Edit-> Role name and Is Active can be editable.
8. Edit Role option will be available according to the privileges given by the admin to particular Role.
9. Then click on "Update & Submit".
10. In case User does not want to edit then will be redirected to View /Edit Roles screen.

3.12. Add Modules/Sub Modules/Functions

3.12.1 Add Modules

Functional Step by Step Process

1. It is very important update all the modules of Kaveri 2.0 in the user management module. This is required to give access to the user based on the functionality of the user.

Case 1:

— Some of the Modules are MIS Reports, CVC Module.

2. CSG Developers logs in to the Kaveri 2.0.
3. System displays Admin Console and User Management/Miscellaneous.
4. Admin selects Add Module option.
5. Enter module id,

6. System checks whether this Main or sub module already exists, if yes system displays “Module Already exists” and displays the details else system allows to enter the name of the Module.
7. Then click on “Save & Submit”.
8. We can refer to UserMapping_v0.1_Annexure document.
